EDITORIAL STATEMENT

According to the rules of the Young People's Missionary Movement, the Editorial Committee has liberty to make any alterations that it may consider necessary in the manuscripts submitted to it for publication. In making such changes it is customary to consult with the author. The absence of Dr. Smith in China, however, has made it impossible for the Committee to secure his cooperation in its work of revision. It wishes, therefore, to state that Dr. Smith is in no wise responsible for any of the changes in the original manuscript, which have been made with the idea of increasing its effectiveness as a textbook for mission study. The whole of Chapter III and nearly all of Chapter V have been rewritten, and insertions, a part of which are quotations from other writers or from Dr. Smith's other works, have been made in Chapters I, II, and IV. Other changes have been made by way of elision and rearrangement of paragraphs. The Committee regrets earnestly that it has been impossible to confer with Dr Smith on the subject of these changes and to secure his assistance in making them.
INTRODUCTION

This is a most timely message. Very heartily do I commend it to the earnest and prayerful consideration of every student of missions. Dr. A. H. Smith is known to us in China as one of our ablest and most eloquent writers. Here we find him at his best. The subject is congenial, and he handles it with the fullness, the accuracy, and the ease of an expert. Those who desire to have a bird’s-eye view of the Old China and the New, can do no better than procure this book. I know no work on China in which so much valuable information is crammed into a space so small, and presented in a form so readable and attractive. I would strongly emphasize one or two points so ably dealt with in this book.

And, first, I would call attention to the need of renewed effort. Speaking of China I do not hesitate to say that our great need at the present time is more of everything, and greater efficiency in everything. We do not want fewer workers, but more workers and better work. We do not want fewer chapels, but more chapels and better preaching. We do not want fewer hospitals, but more hospitals and better doctoring. We do not want fewer schools, but more schools and
better teaching. We do not want fewer books, but more books and better writing. We want more of everything, and we want to carry everything to the highest pitch of perfection. What we need, as we are entering on the second century of Protestant missions in China, is implicit faith in God, not as a God working independently of means, but as working in and through means; and one of the first duties of the missionary societies is to perfect their agencies, and to bring them up to the requirements of the times and age. And this faith in God, as working in and through means, is one of the greatest needs of the Church everywhere the world over. This faith in God would compel us to give to him our very best of everything, to be used by him in the way that seemeth best in his sight. It would secure all the men and means required to carry on the missionary enterprise with unflagging energy and signal success. Instead of the 3,800 missionaries we have now in China, we shall want 10,000 at least, and instead of the 10,000 native helpers, we shall want 100,000. Almost every mission is undermanned. One of the greatest needs of most of the missions to-day is the doubling of their staff of workers.

I would, secondly, call attention to the need of renewed interest on the part of the Churches in the missionary enterprise. To speak in the
language of another, "The time has come for the full mobilization of the army of the cross. The time is come for the universal recognition of the fact that the chief end for which the Church ought to exist, and for which the individual members ought to live, is the evangelization of the world." This is Christ's world; and he wants the whole of it. Those 840 millions of heathen are very precious to the heart of Christ, and he wants his Church to help him to save them. *He cannot save them without her help.* He wants her money—the silver and gold as well as the copper. He wants her ablest men—the very pick of the churches, colleges, and universities. He wants the deepest sympathy and heartiest coöperation of all her members—of all who call themselves by his name. Though they may not be able to go forth as missionaries themselves, they are bound, as disciples of Jesus Christ, to send out others, and their very best, and, when they are gone, to follow them with their loving sympathy and heartfelt prayers. This is a great spiritual work, and the members of our churches must identify themselves with it, and infuse their spiritual life into it, if they would see it triumphant.

China open. China awake. China's millions waiting to be Christianized! This is a great fact to proclaim at the close of the first century of
missions in the land of Sinim. I cannot think of it without reverential awe and deepest grati-
tude. Let the Church of God in both hemi-
spheres be loyal to her King and faithful to her glorious mission, let her seek a baptism of the Holy Spirit, and go forth clothed with divine power—let her do this, and before the close of the second century China will have become Christ's.

Griffith John.

*Yonkers, N. Y., February 15, 1907.*
FOREWORD

The problem of China is to a large extent the problem of the world. Even to those who have hitherto taken but slight interest in "world-politics," it is becoming dimly discernible that in Eastern Asia the Occident has greater and more difficult questions than it has ever yet settled, or even faced. War, diplomacy, commerce, industrial expansion, governmental reforms, have all had or are having their part in the unprecedented alinement of the Far East, but it is the inevitable weakness of each and all of them that they never settle anything, while they tend to unsettle everything. Those who recognize that moral and spiritual forces ultimately rule the world will increasingly feel that the West owes it to the ancient East to pay back a part of its age-long debt by helping to lay deep the foundation of an Oriental Christian civilization.

In a necessarily compendious outline such as the present, it is impracticable to illustrate adequately the amount and the quality of the work which Christian missions have done and are doing in China. For this reason it is the more essential freely to use collateral helps, to which end a small bibliography is appended. It is
greatly to be hoped that those who read this book may never lose their interest in its subject nor cease their study of it.

In the great century upon which we have entered it is important that the rising generation should have a large funded knowledge of the part which the Far East has played in the history of the world hitherto, and a clear perception of the much larger part which it is to take in the immediate future, and of the duties and privileges of Americans to contribute to the peace of the world by helping to establish in it the kingdom of God.

Arthur H. Smith.

*Shanghai, China, December 25, 1906.*
A GENERAL VIEW OF CHINA
China bulks large because she now has a population of 400,000,000—three fourths the people of the Pacific basin—whose industry, energy, economy, perseverance, and fruitfulness make them the Anglo-Saxons of the Orient. China sustains this immense population wholly by farming and such crude manufacturing as can be carried on by hand. China is just beginning to accept modern inventions and to introduce modern machinery; and with far the largest and toughest, most industrious and most economical laboring class on our globe, an era of vast industrial expansion is immediately before her. Moreover, China is now beginning to construct railroads and to open the largest and finest coal and iron mines thus far known to man. Baron Richtofen, after a laborious investigation of many years, submitted to the German government a three-volume report of the coal and iron resources of China, showing that they are the finest in the world. He found coal in fifteen of the eighteen provinces examined by him; and in the province of Shan-hsi alone he reported enough coal to supply the human race for several thousand years. Side by side with these supplies of coal, Baron Richtofen found vast supplies of iron ore. The German government was so amazed by the Baron’s reports that an expert commission was sent to China in 1897 to re-examine his data, and this commission fully verified Baron Richtofen’s estimates.

—Bishop J. W. Bashford.
I

A GENERAL VIEW OF CHINA

If the unknown people who at an unknown time from an unknown place of departure, but probably from the extreme west of Asia, started on their march to the extreme east, were consciously choosing their destiny, they could not have chosen better nor more wisely. The country which we call China, but for which the Chinese equivalent is Middle Kingdom (now more appropriately expanded into Central Empire), is one of the most favorably situated regions on the earth's surface. Lofty mountains give rise to a magnificent river system; there is a coast-line of perhaps two thousand miles, a fertile soil, a temperate climate, and every variety of production. China lies wholly in what is known as "the belt of power," within which all the great races of mankind have had their origin and have worked out their destiny.

The Chinese Empire\(^1\) is composed of several divisions, known as China Proper, or the Eighteen Provinces, with the dependencies of Man-

---

\(^1\)To maintain unity in customs and religions, the text of this book has been confined to China Proper.
The Uplift of China

China, Mongolia, Tibet, and Chinese Turkestan. A large part of this territory has never been surveyed at all, so that varying estimates of the area are readily accounted for. The figures quoted are from a standard authority, but it must be understood that they are approximations only, and merely represent 'the last guess at the case.'

China Proper comprises 1,532,420 square miles; Manchuria, 363,610; Mongolia, 1,367,600; Tibet, 463,200; Turkestan, 550,340; making a total of 4,277,170 square miles. With this may be compared the area of the United States, together with Alaska, and the Hawaiian Islands, which with both the land and the water area of the last two divisions, is given as 3,567,563 square miles. Manchuria is a little larger than the province of Quebec and three times the size of the British Isles.

The question of the population of China is one of the essentially insoluble riddles of contemporaneous history. In 1904 Mr. Rockhill, after a careful inquiry, came to the conclusion that all the official estimates made within the past one hundred and fifty years are far in excess of the truth, and that the number of the inhabitants of China Proper at the present time is probably less than 270,000,000. The figures usually quoted are those furnished by the Chinese government, as the result of an estimate made for the purpose

1 Statesman's Year-Book, 1906.
2 American Minister to China, 1907.
of the apportionment of the indemnity of 1901. According to this, the population of the Eighteen Provinces is 407,253,030, or about five and one-third times as large as that of the United States at the census of 1900. The population of Manchuria was estimated by the same authority as 16,000,000; that of Tibet at 6,500,000; that of Mongolia at 2,600,000; and that of Turkestan as 1,200,000; making a grand total for the whole empire of 433,553,030. On the whole, one may as well assume the round number of 400,000,000 as a working hypothesis for the population of China, although in the opinion of many good judges the figures may be much too large. On the foregoing basis, the population per square mile would be 266, the most dense being that of Shan-tung, with 683 to the square mile, and the least dense that of Kuang-hsi, with 67.

There is far more uniformity of size in the eighteen provinces than in the States of the American Union. The largest is Ssū-ch'uan, which has 218,480 square miles, which may be compared with Texas with its 262,290 square miles; but while Texas had in 1900 something over 3,000,000 people, Ssū-ch'uan is supposed to have about 69 millions, and that province, with the neighboring one of Kuei-chou (next to the smallest in population of all the provinces) had a population larger than that of the whole United

1 For the pronunciation and location of geographical names, see Index.
The Uplift of China

States at the last census. The smallest of the provinces is Chê-chiang, which is a trifle larger than the State of Indiana, but which has a population nearly five times as great.

To the traveler who passes through beautiful Japan to northern China, with its unvarying levels, the view is distinctly disappointing. But the Chinese Empire is broad and has every variety of landscape, lofty mountains (although these are the exception), the sublime gorges of the Yang-tzū, and in the south-central and southern provinces a semi-tropical luxuriance of vegetation most pleasing and attractive to the eye. In mountainous regions, especially, temples are located with great skill so as to command the most advantageous sites, combining a view of man's industry with a secure retreat from the cares of dusty earth. The pagoda is one of the few benefits which Buddhism has conferred on China, a relic of a period when faith was active and vital, instead as at present a mere historical reminiscence. Many of the bridges over Chinese canals are extremely picturesque, while the suspension-bridges over the rivers of the southwest made of bamboo ropes have attracted the admiration of all travelers. In the southern portions of China, city walls are found mantled with ivy, although undue sentimentalism is perhaps checked by the pervasive presence in the canals below of boatloads of liquid manure.
China is cut through by many great rivers, of which the mighty Yang-tzŭ, and the Huang Ho, or Yellow River, are the chief. Each of these rises in the mountains of Tibet, and finds its way eastward to the sea. The Yang-tzŭ, which is 60 miles wide at its mouth, with its numerous tributaries is to China what the Mississippi and Amazon are to the United States and South America. It is navigable by large ocean steamers to Han-k'ou, more than 600 miles from its mouth. Steam vessels run to I-ch'ang, about 400 miles farther up. Beyond this the famous Yang-tzŭ gorges begin, and although steamers have made the ascent to Chung-ch'ing, about 725 miles above, the rapids are so dangerous that the route is at present impracticable. Each of the "Four Streams," which give their name to Ssŭ-ch'uan, is an important avenue of trade.

The Yellow River, on the contrary, which makes a vast circuit through the northwest of the empire, passing through regions of clay and sand, is not only for the most part useless for navigation, but richly deserves the name of "China's Sorrow," on account of perpetual overflows, its frequent changes of channel, and the immense expense of guarding against the breaking of the artificial banks, which are generally composed merely of earth, reinforced by stalks of sorghum. In the year 1887, especially, when the Yellow River completely altered its course, find-
ing its way by devious routes southward to the sea, it was the occasion of terrible disaster, countless villages being suddenly swept away like ants under a rain spout.

The canals of China, largely found in the central provinces, are numerous, and date from a time when none such existed in Europe. The so-called Grand Canal extends from Hang-chou, the capital of Chê-chiang, crossing the Yang-tzù and Yellow Rivers, to Lin-ch'ing in Shan-tung, there entering a river flowing to Tientsin. The canal was formerly a great artery for the transport of the imperial tribute grain, but upon the adoption of the sea route it became superfluous for that purpose, for which it has not been used since 1900.

All but the mountainous provinces have rivers of considerable importance, and no people ever better understood the art of using navigable waters than the Chinese. Relatively insignificant streams like the Wei River, with which the Grand Canal unites, convey a traffic beyond all proportion to their size. Chinese craft are modeled after the water-fowl, not after the fish, and can traverse very shallow water. Some varieties of specially constructed double-enders carry surprising loads, while drawing only a few inches of water. The sails of cotton or of matting hang loosely to huge masts, and being stiffened with bamboo poles appear cumbrous and clumsy, yet
with these the boatmen can sail very close to the wind, and in general they manage their boats with a skill elsewhere unsurpassed. With a few minutes' work the mast may be removed and laid flat, as in case of head winds, to economize resistance, or in passing under bridges.

In striking contrast to the number and the importance of its rivers, are the fewness and the
unimportance of China's lakes, of which those best known are the P'o-yang, and the Tung-t'ing, each of them shallow, and each highly untrustworthy at certain stages of water.

The Great Plain extends from the Yang-tzū River to the mountains which divide Chih-li from Shan-hsi and Manchuria, and supports a population estimated at more than a hundred millions, reminding one in density of inhabitants of the province of Bengal. It is largely alluvial in its origin. In many wide regions incalculable harm has been done by the devastations of the rivers which the Chinese have not been able to control. Flooding is often followed by the appearance of a nitrous efflorescence, injurious, and often fatal to the growth of crops.

The loess soil occurs mainly in an extensive region of which the province of Shan-hsi is the center. It consists of a peculiar brownish earth penetrated with minute porous tubes running from above downward, which by capillary attraction, when there is sufficient water, draw up moisture from below. At other times drought and famine are synonymous terms. These deposits are now considered to have been formed by age-long dust-storms. The terraces of the loess country are one of the sights of China, as are the caves dug in this soil for dwellings, which, though damp, dark, and smoky, serve as homes for great numbers of the poor. This soil with adequate
rain is naturally rich without fertilization. The loess deposits, owing to the frequent and immense fissures, are a great obstruction to travel, and are proving a difficult problem for the builders of railways.

The Japan Current, prevented by outlying islands from reaching the shore, has less effect upon China than has the Gulf Stream on North America. As Dr. Williams mentions, "the average temperature of the whole empire is lower than that of any other country in the same latitude, and the coast is subject to the same extremes as the Atlantic States. Canton is the coldest place on the globe in its latitude, and the only place within the tropics where snow falls near the seashore." While the climate is in general much more regular in its periodicity than that of the United States, it varies greatly in a series of years. At Peking the thermometer ranges from zero (Fahrenheit) to above 100 degrees, yet the cold is complained of as more penetrating than in much higher latitudes, although the winters are dry. In the warmer months, southern and central China are oppressively hot, and, as in India, the night often gives little relief, while, in the northern provinces, this is not usually the case. Ssū-ch'uan is largely damp and steamy in summer, the number of clear days being few when compared with the north. In northern China there are peculiar electrical conditions which af-
fect unfavorably the nervous system of many foreigners.

Rainfall

The so-called rainy season in China is to a considerable extent dependent upon the southwest monsoon. The amount of the rainfall varies from 70 inches in Canton, to 36 in Shanghai, and 16 in Chih-li, which are the averages of several annual observations, but the variations in successive years are marked. On the Great Plain three fourths of the rain generally falls during July and August. In that region the spring rains are generally scanty and often almost absent. That this is no new circumstance is indicated by the ancient adage that "Rain in spring is as precious as oil." Among the many reforms needed in China a redistribution of the rainfall is one of the most urgent—a much larger supply in spring and in the late autumn, and much less in summer.

Typhoons

The coast of China is liable to terrible typhoons, one of the most terrific of which occurred in September, 1906, in Hongkong, almost without warning, resulting in the loss of many thousand lives, in the wrecking of steam vessels of all sorts and sizes, and involving a loss estimated at five million dollars, all in the space of less than two hours. The destructive land tornadoes so common in the United States, appear to be almost or quite unknown in China.

Diseases

Epidemic diseases, while common in China, are much less fatal than in India. At intervals
Asiatic cholera commits fearful ravages which are practically unchecked. Small-pox, diphtheria, and some other diseases may be said to be both endemic and epidemic, never wholly absent, and not infrequently recurring with extreme violence. The bubonic plague has firmly rooted itself in the southeastern part of China, and in Hongkong, and the percentage of mortality, largely although not exclusively among the Chinese, is in this time of enlightenment unprecedented. Tubercular affections are perhaps the most fatal to the Chinese. Many of the foregoing diseases are entirely preventable, the high death-rate being due to the dense population, and to the equally dense ignorance of sanitary laws, as well as to complete indifference to them when pointed out. Yet foreigners in China are probably as healthful as in their native lands, with similar climatic conditions. It may be mentioned incidentally that in the early part of 1903 there were seven men still engaged in active missionary service in China who arrived in the 'fifties.'

The mineral resources of China appear to be practically inexhaustible, and are as yet virtually untouched. Coal and iron, twin pillars of modern industry, exist in quantities elsewhere unsurpassed. The coal-bearing areas alone have been estimated at 419,000 square miles, a territory larger by some 13,000 square miles than that of all New England, together with all the
states bordering on the Atlantic coast from New York to Florida. Every traveler through Shan-hsi is struck with the evidence not only of overwhelming riches of coal and iron, but of many other minerals, including almost all which are of economic importance. It is a remarkable fact that instead of being limited as in the United States to a few favored districts, the coal measures of China are found all over the empire and in every province. Pure magnetic iron ore is produced
in the greatest abundance. Some of the mines furnish a grade of coal quite equal to the best Pennsylvania anthracite. "The mineral wealth of Yün-nan alone is something enormous and almost inexhaustible. . . . Rubies and sapphires, garnets and topazes, amethysts and jade, abound in the western prefectures; gold, silver, platinum, nickel, copper, tin, lead, zinc, iron, coal, and salt also abound. Copper is especially abundant; its ores are of excellent quality and have been worked for ages in over one thousand places." 1 Gold has also been found in paying quantities in the sands and alluvial deposits of Mongolia. Salt has always been a government monopoly. It is produced not only by evaporation from sea-water, but from natural deposits, and in Ssŭ-ch'üan from brine brought up from deep wells. That this vast potential wealth soon to be made available, has been hitherto useless, is chiefly due to three causes: profound ignorance of geology and of chemistry, invincible superstitions about geomancy, fêng-shui, 2 and official exactions especially in mining the precious metals.

China is perhaps the only country in the world which in the past has been entirely capable of

1 Little, The Far East, 126.

2 The belief held by the Chinese in relation to the spirits or genii that rule over winds and waters, especially running streams and subterranean waters. This doctrine is universal and inveterate among the Chinese, and, in great measure, prompts their hostility to railroads and telegraphs, since they believe that such structures anger the spirits of the air and waters, and consequently cause floods and typhoons.
supplying its own wants. Its inhabitants, originally pastoral, early became agricultural, and they devoted themselves to tillage with an assiduity and a success elsewhere unequaled. Their farming is frequently characterized rather as gardening. They are a race of irrigators. They understand the rotation of crops, and in a crude way something of the qualities of soils. Ages ago they learned to apply fertilizers with a fidelity and a patience without which they would long since have been unable to support so great a population. The country is unusually fertile. The extensive province of Ssū-ch’uan, for example, has a salubrious climate, ranging from the temperate to the subtropical. Its soil is rich and most products yield three or four crops annually. Wheat, barley, maize, millet, peas, and beans are cultivated in the north, while rice, sugar, indigo, cotton, opium, tea, and silk are produced in the south.

Currency

The only currency of China until recently has been the brass cash with a square hole for stringing, the size varying from an American five cent silver piece up to a diameter of more than an inch. These last were for the most part issued one hundred or two hundred years ago. It is not uncommon to meet with coins in daily use which were minted in the T’ang dynasty, perhaps a thousand years ago. A single cash represents the smallest unit of value, ranging from one-fifteenth to one-twentieth of an American cent. Silver, in
the form of bullion weighing fifty ounces (taels), more or less, or in lumps of ten ounces or less, still forms the medium of the greater part of Chinese exchange, but there is a system of banks, by drafts on which money may be transferred from place to place. The tael is divided decimally, as are all Chinese weights and measures, with the exception of the catty (equal to one and one-third pounds), which as a rule contains 16 ounces, though the number varies up to 28 ounces.

The standards of weight are never the same in any two places (unless by accident), and the same place may have an indefinite number of silver or other weights, making the losses in buying and selling alike serious and inevitable. Within the past few years the various provincial mints have been pouring forth so-called "ten cash" pieces (worth in reality only from two and one half to six of the old cash) at the estimated rate of between one and two billions every year. The people would only take them on condition that they were available for the payment of taxes. When at a later period this was forbidden, a financial crisis ensued, prices rose, and much distress ensued. The central government is now taking over all the provincial mints, but there is still no assurance of a uniform copper or silver currency for the whole empire.

In view of its immense resources the question is natural: Is China a rich country? It contains
almost illimitable possibilities, yet the people taken as a whole are poor. So fierce and so continuous is the struggle for mere existence that it is natural that whatever once for all puts an end to it, should be regarded as divine. In many parts of China the god of wealth is the most popular divinity. In the triad which sums up all that man can ask or hope for, wealth, official emoluments, and old age, the place of honor is given to the most important, without which the others would be barren. With the exception of the purchase of land, the supply of which is limited, there are few safe investments. In every business the risks are great. Interest on loans varies from 24 to 36 per cent. or even more.

In view of the wealth of China and the poverty of its inhabitants, the question naturally arises, what are the causes, and what improvements can be inaugurated to ameliorate conditions. The wasteful habits of the people, especially in the north of China, have resulted in the entire obliter-ation of the forests, so that the lack of wood not only for fuel but for economic purposes is severely felt. Deforestation of large areas has also reacted on the climate, causing long periods of drought. True to the instinct of economy among the people, they have not hesitated to grub the roots of plants and grass, as a substitute for firewood, and have in this manner denuded the soil. The surface of the soil thus deprived of
its natural protection is exposed to the dust-storms which occur several times annually. One of these dust-storms it has been calculated bears out to sea several million tons of fine loess soil. By the introduction of scientific agriculture for soils and for seeds, the improvement of old plants and the introduction of new ones, the encouragement of cattle raising and the afforestation of barren mountains, the soil would be protected and the climate moderated so that vast sections would be reclaimed and China's resources marvelously increased.

As has already been suggested, the floods along the Yellow River are frequent and are always fraught with widespread destruction. The weak attempts of the Chinese to curb the course of the rivers have availed nothing. This is due to a lack of engineering skill and the dishonest peculations of the mandarins supervising the work. While the Chinese are pioneers in irrigation and have extended their system, yet there is urgent need for the deepening and broadening of the countless artificial waterways, the employing of modern engineering methods to remove rapids and other obstructions to navigation, and the construction of reservoirs to control the flood waters of the great rivers. These and other innovations will make a new physical China, put an end to famines, and enable the country to sup-
The Uplift of China

port much more than its present population with far less difficulty than is now felt.

It is not at all improbable that China can double both her population and her products. At any rate, the development of her immense natural resources has not as yet seriously been touched and "commercial and industrial changes are but beginning. With only three thousand miles of Chinese railway,¹ experience since 1900 has shown the most conservative Chinese that here is an Aladdin's lamp which they have but to rub to produce a wealth beyond the dreams of even Oriental avarice. The line from Peking to Niu-ch'uang is supposed, during the past year, to have netted the Chinese government between three and four thousand dollars (silver²) per month. Is it strange that Chinese geomancy (fêng-shui) practically disappears as an inhibitory force, and that the dreaded earth-dragon crawls down a little deeper to be out of the way of the rumble of trains and the piercing of mining shafts? The new industrial China will involve one of the mightiest transformations in the history of mankind,—hundreds of millions of sturdy agriculturists metamorphosed into manufacturers. The great plain of China produces unlimited

¹This is the railway mileage in operation (1907); while the total,—in operation, under construction, and projected, including the railroads built under the Manchurian concession,—approximates nine thousand miles.

²The Mexican silver dollar, used extensively in the Orient, and having a value of about fifty cents.
cotton. Its teeming population are all potential agents by which steam and electricity will revolutionize the empire of the East. The city of Hank'ou, on the Yang-tzü River, is probably destined to become one of the greatest manufacturing centers of the world. Shanghai is rapidly becoming the commercial metropolis of the empire, much as is New York that of the United States. To control this unprecedented development, and to have a share in its potentialities, is the ambition of every trading country."

The theater of commercial and political activity in this century is the Pacific Ocean. Situated in closest proximity to one half of the world’s population, China is destined to play a leading part in the concert of the nations. With her two thousand miles of coast-line facing the Pacific; with a people equal to if not superior to the Anglo-Saxons in industry, economy, and perseverance; with millions of cheap laborers and almost unlimited raw material; with improved methods of agriculture and the introduction of modern machinery in mining and manufacturing; with the expansion of navigation and the extension of roads and railroads; with the establishment of a staple monetary system and commercial confidence; with the peopling and development of the vast hinterland of Manchuria,

1 The Outlook, March 24, 1906, page 704.
Mongolia, Tibet, and Turkestan, is it not reasonable to suppose that when the strongest race in the Orient is awakened, the mastery of the Pacific commercially and politically will be in the hands of the Chinese?

China has long been a commercial field coveted by great powers. The greed of Western nations has by degrees thrust open her doors. China is open! But who shall enter,—Occidental civilization with her vices and materialism?—or the Church with her message of life and salvation? In this strategic period of transformation, shall not Christianity outstrip all other competitors in the uplift of China?
SUGGESTIONS FOR USING THE QUESTIONS

Most of these questions are thought questions. That is, they require for their answers some original thinking. This form of question has been chosen for insertion in the text-book (1) because questions which constitute a mere memory test of the facts of the text can easily be constructed by any leader or member who makes an outline of the principal facts, and (2) because mere memory questions, although they have their uses, yield far less than thought questions either in mental development or in permanent impression. In some cases complete answers will be found in the text-book; usually statements that will serve as a basis for inference; but a few questions appeal solely to the general knowledge and common sense of the student. The greatest sources of inspiration and growth will be, not what the text-book adds to the student, but what the student adds to the text-book; the former is only a means to the latter.

In using these questions, therefore, let the leader first gather from the chapter or from previous chapters all that relates to the subject. It will be found profitable to jot down this material so that it will be all under the eye at once; then think, using freely all the knowledge, mental power, and reference books available. For the sake of definiteness, conclusions should be written out. It is not supposed that the average leader will be able to answer all these questions satisfactorily; otherwise, there would be little left for the class session. The main purpose of the session is to compare imperfect results and arrive at greater completeness by comparison and discussion.

It is not supposed that the entire list of questions will be used in any one case, especially when the sessions last only an hour. The length of the session, the
maturity of the class, and the taste of the leader will all influence the selection that will be made. In many cases the greatest value of these questions will be to suggest others that will be better. Those marked * require more mature thought and should be made the basis of discussion.

There has been no attempt to follow the order of paragraphs in the text-book in more than a general way.

QUESTIONS ON CHAPTER I

Aim: In View of Her Resources and Probable Future, to Determine the Importance of China's Evangelization

I. The Natural Resources of China.

1. If you had to live in Asia, in what zone would you choose to live?
2. In which of the five zones of the earth are the present world powers located?
3. Has location anything to do with their prominence?
4. How does the latitude of China compare with that of the United States?
5. Could you choose in Asia a more favorable latitude than China possesses?
6. What is the advantage, especially in Asia, of having a position on the seacoast?
7. Of what advantage is it for a country to extend over several degrees of latitude?
8. Compare the area and population of Ssū-ch'üan province with that of France.
9. Compare the area and population of Shantung province with that of Illinois.
10. Compare the area and population of the eighteen provinces with that of the United States.
11. Construct a chart that shall present the vastness of the population of China in the most striking way possible.

12. How does the coast-line of China compare with that of the United States. (Consult map.)

13. What signs of appreciation of the value of China's harbors have been shown by European powers?

14. What other waterways in the world compare in navigability with the Yang-tzü?

15. How do these compare in the extent of population which they serve?

16. For climatic reasons would you care to live farther north in Asia than the northern boundary of China?

17. Would you care to live farther south than the southern boundary?

18. What quality of soil is usually found in great river basins?

19. What other soil in China is of special fertility?

20. How do the mineral deposits of China compare with those of any other country you know?

II. Hindrances to Economic Progress that may be Removed.

1. Why does not the mere possession of such a favorable location and such immense resources make China at present a rich country?

2. In what ways will the introduction of railroads affect the wealth of the country?

3. Which population may safely become more dense, an agricultural or a manufacturing population?
4. What will be the effect on China of the introduction of manufactures?  
5.* Examine carefully Chapter I to see what recommendations you should make if you were appointed forestry commissioner of China.  
6.* What do you think could be accomplished by energetic measures along this line?  
7.* What should you recommend if you were commissioner of irrigation?  
8.* What should you hope to accomplish by this?  
9.* What effect would the evangelization of China have upon her economic condition?  

III. China's Probable Future.  
1. How does China rank among the nations of the earth in potential resources?  
2. Which will probably grow more rapidly in the next fifty years, the numbers of the population of the United States, or the general intelligence of the population of China?  
3. Which population will be the more valuable economically at the end of that time?  
4. What effect will the development of China's natural resources have upon the standard of living and general intelligence of the people?  
5. How will China rank among the nations of the earth when this material development is realized?  
6. Is this development likely to be long delayed?  
7.* What will be China's influence in the world if she remain unevangelized?  
8. What is the greatest problem of the twentieth century before the Church?

A GREAT RACE WITH A GREAT INHERITANCE
When Moses led the Israelites through the wilderness, Chinese laws and literature and Chinese religious knowledge excelled that of Egypt. A hundred years before the north wind rippled over the harp of David, Wung Wang, an emperor of China, composed classics which are committed to memory at this day by every advanced scholar of the empire. While Homer was composing and singing the Iliad, China's blind minstrels were celebrating her ancient heroes, whose tombs had already been with them through nearly thirteen centuries. Her literature was fully developed before England was invaded by the Norman conquerors. The Chinese invented firearms as early as the reign of England's first Edward, and the art of printing five hundred years before Caxton was born. They made paper A.D. 150, and gunpowder about the commencement of the Christian era. A thousand years ago the forefathers of the present Chinese sold silks to the Romans, and dressed in these fabrics when the inhabitants of the British Isles wore coats of blue paint and fished in willow canoes. Her great wall was built two hundred and twenty years before Christ was born at Bethlehem, and contains material enough to build a wall five or six feet high around the globe.

—J. T. Gracey.
II

A GREAT RACE WITH A GREAT INHERITANCE

It is a popular Chinese proverb that antiquity and modern times are alike, and that All-under-Heaven (China) are one family,—a saying which may be regarded as an epitome of her history. "No other nation," says one of the most recent writers upon China, "with which the world is acquainted has been so constantly true to itself; no other nation has preserved its type so unaltered; no other nation has developed a civilization so completely independent of any extraneous influences; no other nation has elaborated its own ideals in such absolute segregation from alien thought; no other nation has preserved the long stream of its literature so entirely free from foreign affluents; no other nation has ever reached a moral and national elevation comparatively so high above the heads of contemporary states."¹

Chinese historians begin their legendary history at a period about thirty centuries before the Christian era, but where it ends and where solid

¹Brinkley, Oriental Series: Japan and China.
footing begins is in the minds of Western scholars quite unsettled, some deciding upon 2300 to 2000 years B. C., others selecting the beginning of the Chou dynasty, 1122 B. C., and still others a later date. The important fact is that, thirty-five, forty, or perhaps even forty-five centuries ago, the institutions of the Chinese people, their language, arts, government, and religion, had begun to develop on lines from which no departure has ever been made.

Confucius was born in the Chou dynasty, B. C. 551, and with his face set toward the even then immeasurable past, lamented the good old times of Yao and Shun, from fifteen hundred to two thousand years before him, and the Chinese people, following his lead, have continued lamenting them down to the present time.

For a student of the outline of China's development to burden his memory with the names of monarchs and the dates of dynasties is wholly unnecessary. But it is essential to gain a distinct impression of the fact that, from mythical, semi-mythical, semi-historical, and historical times, the evolution of China and the Chinese has been continuous and uninterrupted.

Aside from her great sages, the name which perhaps most Occidentals are disposed to place first in importance is that of Shih Huang-ti, the self-styled First Emperor, who not only built the Great Wall, abolished feudalism, and unified
the empire, but out of vanity ordered the complete destruction of most of the literature of China, the more important parts of which were afterward recovered. Dr. Williams terms him "the Napoleon of China—one of those extraordinary men who turn the course of events and give an impress to subsequent ages," but Chinese historians detest his name and his acts.

The Han dynasty (B. C. 202-A. D. 221) is of special interest because the northern Chinese still style themselves "Sons of Han," because in it the competitive system of examinations had its rise, and because its emperors "developed literature, commerce, arts, and good government to a degree unknown before anywhere in Asia."

The T'ang dynasty (618-907) marks another of the high-water periods of Chinese history, when China "was probably the most civilized country on earth," an era of schools and literary examinations, of the cultivation of poetry, of the incorporation of the inhabitants of the southern coast (who still call themselves "Sons of T'ang") into the main body of the people, and of the extension of the empire to the banks of the Caspian Sea.

In the Sung dynasty (960-1127) lived the famous historian Ssŭ-ma Kuang, a great socialist minister of state named Wang An-shih (who anticipated many modern communistic theories and incidentally nearly ruined the empire), and
Chu Hsi, the acute and profound commentator on the classics, whose interpretations have continued the standard of orthodoxy down to the present time.

In the Yüan, the first foreign (Mongol) dynasty (1280-1368), under the great Kublai Khan, Marco Polo made his memorable visit to Cathay. The Mongol dynasty was short-lived, and was replaced by the Chinese Ming dynasty (1368-1644), during which time European ships first visited Chinese waters, the empire being at last face to face with the West.

From 1644 to the present time China has been ruled by a race of Manchus, invited in to assist one of the parties in internal disputes and judiciously deciding to remain and keep the empire for themselves. They have styled theirs the Great Pure, or Ta Ch'ing dynasty.

The apparent monotony of Chinese history is mainly due to the fact that similar causes have always produced, with minor variations, similar results. The founders of dynasties were necessarily men of action and of force, who concentrated their power, returned to the old ways, abolished abuses, gradually tranquilizing and unifying the empire. After a certain (or rather an uncertain) period the original impulse, under degenerate descendants, was exhausted, abuses again multiplied, rebellions increased, and the decree of Heaven was held to have been lost.
Much paralyzing disorder ensuing, a new dynasty gradually got itself established, to repeat after a few score or a few hundred years the same process.

"The government of China is that of an absolute, despotic monarchy. The emperor rules by virtue of a divine right derived direct from Heaven, and he is styled 'The Son of Heaven.' This divine right he retains as long as he rules in conformity with the decrees of Heaven. When the dynasty falls into decay by the vices of its rulers, Heaven raises up another who, by force of arms, the virtue of bravery, and fitness for the post, wrests the scepter from the enfeebled grasp of him who is unfit to retain it any longer. This idea has exerted a beneficial effect on the sovereigns of China, who feel that on the one hand they are dependent upon high Heaven for the retention of their throne, and who humbly and publicly confess their shortcomings in times of floods and drought. On the other hand, though there is no House of Commons to exercise a check on the unrestrained power of the sovereign, there is the general public opinion of the people, who, being educated in the principles that underlie all true government, are ready to apply them to their rulers when they forget, or act grossly in opposition to, them. To see the system of patriarchal government carried out in its entirety, one must come to China. The em-
The emperor stands in loco parentis to the common people, and his officers occupy a similar position. The principles which have formed the framework of government for millennia among these ancient, stable, and peace-loving people, may be found in a study of the rule of the ancient kings, Yao and Shun, and their successors, and in the precepts inculcated by Confucius and Mencius.  

Prominent among the inheritances from China's past must be placed the teaching of her sages. This should be considered as one of the largest gifts ever bestowed by the Father of Lights upon any race of the children of men. The defects and the errors of this teaching are not to be blinked, but these do not alter the fact that a Power that makes for righteousness is recognized, that a lofty ideal of virtue is perpetually held up, and that wrong-doing is threatened with punishment.

A conception of moral order and a theory of human government singularly adapted to the people is one of the priceless assets of the Chinese which they have received from antiquity. The principles which underlie the Chinese system may be said to be in China undisputed, and indeed indisputable. Even the forms of political administration have their roots in the earliest of the Chinese classics. The numerous wars and rebellions of Chinese history are to be regarded,
not as a protest against the ideals, but against the failure to carry them into execution. It was not the system which was thought to be at fault, but the men who had perverted it.

The only aristocracy in China has been the student class, and yet under their democratic system of education examinations have been open to men of every rank. Official position being the reward of success, the system has stimulated general participation and has undoubtedly elevated the standard of education. It has also attracted a superior class to public office, because only men of ability could qualify. As the classics studied have moral worth, they have improved the character of the people. Although not more than one in fifty has obtained official position, the unsuccessful have been influential in molding and controlling public opinion and have done much to maintain a stable, united, and peaceful China.

One of the greatest virtues among the Chinese is filial piety, while disobedience is one of the greatest crimes. From early childhood they are taught to obey their parents. While the duties of children to parents are exacting, they have nurtured a respect for parentage that children of the West would do well to emulate. The system also insists upon the proper care of the body, as it is received in perfect form from the parents. It has imposed upon the nation a sense
of obedience and subordination that has prevented revolt and anarchy. That filial piety has been in China a mighty unifying force, and that the days of the Chinese people have indeed been long in the land that the Lord has given them, are indisputable facts.

There is no caste in China and very little caste feeling. It is said that one of the T'ang dynasty emperors tried to introduce caste into China and failed. Any one, with few minor exceptions, may aspire to rise and many constantly do so, after starting from the humblest beginnings. A native writer thus describes the gradations in society:

"First the scholar: because mind is superior to wealth, and it is the intellect that distinguishes man above the lower orders of beings, and enables him to provide food and raiment and shelter for himself and for other creatures. Second, the farmer: because the mind cannot act without the body, and the body cannot exist without food; so that farming is essential to the existence of man, especially in civilized society. Third, the mechanic: because, next to food, shelter is a necessity, and the man who builds a house comes next in honor to the man who provides food. Fourth, the tradesman: because, as society increases and its wants are multiplied, men to carry on exchange and barter become a necessity, and so the merchant comes into existence. His oc-
ocupation—shaving both sides, the producer and consumer—tempts him to act dishonestly; hence his low grade. Fifth, the soldier stands last and lowest in the list, because his business is to destroy and not to build up society. He consumes what others produce, but produces nothing himself that can benefit mankind. He is, perhaps, a necessary evil."

A complex group of race traits form an important part of the inheritance of the Chinese people, a few of which are here selected, not of course as a complete enumeration, but merely as illustrations.

The Chinese are a hearty people, fitted for any climate from the subarctic to the torrid zones. The average Chinese birth-rate is unknown, but it may be doubted whether it is elsewhere exceeded. Infant mortality is enormously high, floods, famine, and pestilence annually destroy great numbers of adults, yet in a few years the waste appears to be repaired. Aged people, who everywhere abound, may often be seen engaged in heavy manual labor, occasionally working as masons and carpenters, and frequently in the fields, when past eighty years. Every dispensary and hospital in China contains records of a wide range of diseases and surgical cases often long neglected and chronic. Yet under skilful treatment even these frequently make the most sur-

1 Quoted by Beach, *Dawn on the Hills of T'ang*, 45, 46.
prising recoveries. Almost all Chinese exhibit wonderful endurance of physical pain, constantly submitting to surgical operations without anesthetics and without wincing. As a people the Chinese have constitutions of singular flexibility and toughness, and upon occasion can bear hunger, thirst, cold, heat, and exposure, perhaps (with the exception of the Japanese), to a greater degree than any other race. From a physical point of view, there is no group of mankind now in existence, if indeed there ever has been any, better qualified to illustrate the survival of the fittest, than the Chinese.

While the Chinese are not an inventive race, they possess a phenomenal capacity for adaptation to their environment. Having only the rudiments of natural science, they ages ago empirically made discoveries of the latent capacities of earth, air, and sea. Gunpowder,¹ the mariner’s compass, and the art of printing from blocks were familiar to the Chinese ages before they were known in the West. Thorough fertilization of the land, the practise of terracing hills and cultivation of the slopes, systematic and general irrigation, rotation of crops, the use of leguminous plants as food and their cultivation for resting the soil, the care of the silkworm and the weaving of silk, the carving of wood and of

¹The compounding of gunpowder first by the Chinese is disputed by some writers.
ivory, the manufacture of lacquer, as well as a host of other industries, are all instances of this talent, and the list might be indefinitely extended. No people are more fertile in resource, more skilful in the application of mind to problems of matter, but when steam and electricity become universally available throughout the empire, the present high efficiency of the Chinese will be multiplied many fold.

This wonderful gift is exhibited on a vast scale in the perpetuation of the Chinese race from prehistoric times till now, without check from without, without essential decay from within. In classical times, as is shown by many warnings in ancient books, there was the greatest danger that strong drink would be their ruin, but by degrees that peril was surmounted. Within the past two centuries opium, by far the most deadly evil in their long history, has even more seriously threatened to transform the Chinese, as one of their leading statesmen expressed it, "into satyrs and devils."¹ In the year 1729 a drastic imperial edict was issued against the use of this poisonous drug, but the growing foreign commercial interest in its importation rendered the decree a dead letter. The determined effort of Commissioner Lin in 1839 to drive opium out of China, brought on war. In 1906, after a lapse of 177 years, the imperial prohibition is renewed, and an

¹ Chang Chih Tung: *China's Only Hope*, 73.
apparently resolute effort is set on foot to put a stop to the smoking of opium and probably also to the cultivation of the poppy plant,—although the latter is still in the future tense. The Chinese, as we have seen, have twice\(^1\) been overrun by other races, and in each instance by sheer superiority have eliminated or absorbed their conquerors, and the ancient regime has gone on essentially undisturbed. Were this test to be indefinitely repeated, the result would almost certainly be the same. By overwhelming physical power the Chinese might indeed be 'conquered,' but without their help China could never be administered. For the compulsory assimilation of the Chinese people to other standards than their own, even geologic epochs would not suffice.

In this age of steam and electricity, Western civilization has developed a conspicuous nervous system. The twirling pencil, the twitching fingers, and anxious face, are daily reminders of taut nerves. The Occidental composure is easily shattered by delay and disappointment, while to the Chinese it matters not how long he is required to remain in one position; and he will stick steadily to his work from morning till night, plodding faithfully at the most monotonous task. Even the children display a capacity for keeping quiet that would drive a Western child insane.

\[^1\] By Genghis Khan in the thirteenth century and by the Manchus in the seventeenth.
The Chinese cannot understand why an Occidental should participate in athletics without pay. Taking exercise is an unknown art among them. They are not subject to worries and anxieties. They have the ability to accept lawsuits, famine, and disaster calmly. Whatever the future impact of the Chinese with the Occidental, it is not unreasonable to assume that in the twentieth century in the race for world supremacy the most enduring will be the tireless and phlegmatic Chinese.

If the Chinese have any talent at all, they have and have always had a talent for work. If the physical empire which they have inherited be itself regarded as a talent, by laborious, patient, and intelligent development of their inheritance, they may be said to have gained ten other talents. They rise early and toil late. Farmers in particular toil ceaselessly. Artificers of all kinds ply their trades, not merely from dawn till dark, but often far into the night. In the early hours, long before daybreak, may be heard the dull thud of the tin-foil beaters of Canton or that of the rice hullers of Fu-chien. The stone-cutters of Kuang-hsi crawl up the steep mountain sides before sunrise, have their food sent up in buckets, themselves returning after sunset, while all day long through fog and even in the drizzling rain may be heard the steady click of their chisels. Merchants great and small ex-
hbit the same talent for toil, and yet more those peripatetic dealers, who with a carrying-pole on their shoulder, or a pack on their backs, transport bulky commodities to great distances, and for the most trifling profits. With the exception of the period just following the New Year, the holidays are infrequent.

The cheerful industry of the Chinese has always attracted the admiring attention of the discerning observer. The Chinese themselves understand far better than any outside critics can do the imperfections of the system under which they live, but they are profoundly aware that many of them are inevitable, and they are convinced that it is better to bear the ills they have than to fly to others that they know too well. Yet in despair and especially for revenge they will on very slight provocation commit suicide. Chinese contentedness is not at all inconsistent with an idealism which finds expression in the secret sects and societies. Their capacity for work, for adaptation, and for content, make the Chinese in every land where they have settled, excellent immigrants. Without their assistance, it is difficult to see what is to be done to develop the tropics. With their assistance, in due time the whole earth may be subdued.

The entire civilization of China is an illustration of this native gift. Perhaps no form of human government was ever more adroitly con-
trived to combine stability with flexibility, apparent absolutism and essential democracy. That the genius of the Chinese is fully equal to reshaping their institutions to accommodate modern needs, as a schooner may be fitted with auxiliary steam attachments, may be taken as certain, if only there were an adequate supply of the right kind of men. Scholars readily combine in solid phalanx against officials who invade their rights, while merchants by suspending all traffic, can force the hand of oppressive mandarins in resisting illegal exactions. The mercantile and trade guilds of China resemble those of Europe in the Middle Ages, but with a cohesion reminding one of a chemical union, against the action of which it is impossible to protest. Boats, carts, sedan-chairs, and other modes of transportation are all managed by guilds which must always be reckoned with. All China is honeycombed with secret societies, political, semipolitical, and religious, all forbidden by the government, and frequently attacked with fury by the officials and dispersed. But while readily yielding to force, like mists on the mountain top, the constituent parts separate only to drift together elsewhere, perhaps under variant names and forms. Individual and class selfishness, together with that ingrained suspicion with which the Chinese, in common with other Orientals, regard one
another, serve as a check upon what would otherwise be an inordinate development of this talent. But perhaps it is in intellectual tasks that the industry of the Chinese is most impressive. To commit to memory the works called classical is an alpine labor, but this is merely a beginning. On the old plan of examination essays, every scholar’s mind (literally ‘abdomen’) must be a warehouse of models of literature from which, according to arbitrary rules in competition with hundreds and perhaps thousands of others, he might make selections in the weaving of his own thesis or poem. Indefinite repetition of such examinations under conditions involving physical and intellectual exhaustion, with an utmost chance of success of scarcely two in a hundred, might qualify the successful contestant to become a candidate for some government appointment—when there should be a vacancy. Perhaps, after all, no men in China are so hard-worked as the officials, who not infrequently break down under the strain. In all these and in many other ways the Chinese display a wonderful talent for work.

With a theory of the universe which explains the relation between heaven, earth, and man as one of moral order, the Chinese have a profound respect for law, for reason, and for those principles of decorum and ceremony which are the outward expression of an inner fact. Once con-
WATCH TOWER IN EXAMINATION HALLS
NANKING

GOVERNMENT EXAMINATION HALLS
NANKING
vinced that anything is according to reason, they accept it as a part of the necessary system of things. Military force has always been recognized as necessary, but as a necessary evil. Military officers have always been far outranked by civil officers, and it is only now, that the Western civilization of force is becoming influential, that these two branches of the State's service are to be put on an equality. Even the mere symbols of thought are regarded with the greatest respect. The gathering up and burning of written or printed paper (for which special furnaces are provided) is an act of merit. To study, to learn, is considered as at once the highest duty and the greatest privilege. The Chinese have always depended upon education as the true bulwark of society, and of the State. Perhaps into no people known to history have the principles of social and moral order been more uniformly and more thoroughly instilled. Government, law, and all their emblems are regarded with what appears to a Westerner an almost superstitious veneration, but as a result, when ruled upon lines to which they are accustomed, the Chinese are probably the most easily governed people in the world.

For their own immeasurable past the Chinese entertain the loftiest admiration. The universal memorizing of the most ancient classics, the all-pervading theatricals for which they have a pas-
sion, and the tea-shop, the peripatetic story-teller, the popular historical novel, all unite to render the period of say two millenniums ago, quite as real as the present, and of far more dignity, not to say of more importance. Yao and Shun, who stand at the outermost horizon of Chinese history, figure to-day in conversation, in examination essays, in editorials of the press, in antithetical couplets pasted on the doorways of palace or of hovel, as objective and influential realities. In a sense every Chinese may be regarded as a condensed epitome of the reigns of say 246 emperors in 26 dynasties.

He is not easily swerved from his uniform course, because from the beginning this has been the way of All-under-Heaven. Without this strong bond of conservatism China would like other empires have long since fallen in pieces. With it, the face of all the people being turned to the past, she has been practically immovable. But now, under new conditions, impelled by fresh impulses, we behold the wonderful spectacle of the most ancient and the most populous of empires, with one hand clinging to that mighty past, while with the other groping for a perhaps still more mighty future. With this galaxy of race traits, not to speak of many others, the Chinese may be said to be outfitted for the future as no other now is, or perhaps ever has been.
Here then is the most numerous, most homogeneous, most peaceful, and most enduring race of all time. Its record antecedes the pyramids of Egypt. The reign of the Emperor Yü antedates the period of Moses eight centuries, and Confucius preceded Christ more than five hundred years. The history of Greece and Rome is modern compared with China. Of the peoples of ancient history, the Jews and Chinese alone survive, but the Jews have lost their country, language, and nationality, while to the Chinese these remain. Subjugated by Genghis Khan in the thirteenth century and by the Manchus in the seventeenth, they have maintained their language, government, religion, and customs, and absorbed their conquerors. To the world’s progress they have contributed their share. Books were produced in large numbers in China one thousand years before Gutenberg was born. The mariners’ compass, forerunner of steam and electricity, was used by the Chinese several centuries before it was used in the West. Gunpowder, which has revolutionized all military science, was first compounded by the Chinese, and they were pioneers in the manufacture of porcelain and silk. The Great Wall and the Grand Canal are striking evidences of the engineering skill and enterprise of the people. All these with its language, literature, philosophy, and powerful race traits, mark the Chinese as one of the most gifted divisions
of the human family. When it is remembered that all of these achievements were consummated, isolated by ocean, mountains, deserts, and their own exclusiveness, the conclusion cannot be avoided that this is a great race with a great inheritance worthy of the consecrated energies of the most capable manhood and womanhood of the Church. To capture this race for Christ means the early conquest of the whole world.

QUESTIONS ON CHAPTER II

AIM: TO REALIZE THE IMPORTANCE OF WINNING THE CHINESE RACE FOR CHRIST

I. Qualities of the Race Indicated by its Wonderful Past.

1.* What physical causes have helped to preserve China in such isolation?
2. Compare the Chinese Empire in age with the Roman Empire, the Papacy, the English Monarchy, and the United States Government.
3. Compare the principles of governmental restraint in China with those of the other great empires before Christ.
4. What trace is left of those other empires at present?
5. In the days of Paul, which was the more promising race, the Chinese or our Anglo-Saxon ancestors?
6.* Compare the amount that each race has received, from without, since that time.
7. How should you feel toward principles of government that had preserved your country while others decayed?

8.* What are some of the advantages and what some of the disadvantages of having a golden age so far in the past?

9. In what respects did the attitude of Confucius and Mencius differ from that of the Hebrew prophets?

10.* Name all of the reasons you can why the Chinese system of government has endured so long.

11. How has filial piety affected the stability of the government of China?

12. In what ways has the educational system been a bulwark to the government?

13.* What can you infer from a comparison of the Chinese ranking of occupations with that of the order of castes in India?

14. On the basis of their past history, how would you rank the Chinese among the races?

15. What physical hindrances has the race had to contend with?

16. What will be the effect on the Chinese of improved sanitation and food supply?

17. Why are the Chinese desired as laborers, but unpopular as immigrants?

18. What sort of troops do you think the Chinese would make?

19.* What are the advantages and what the disadvantages of the absence of nerves?

20. How will the Chinese be fitted to enter into
The Uplift of China

industrial competition when they possess machinery?

21. Why do we speak of a yellow peril, but not of a brown peril or a black peril?

22.* What do you understand by the yellow peril?

23.* Compare the strong and weak points of the Chinese with those of the Anglo-Saxon.

24.* How will the races rank when they have freely borrowed from each other?

25.* What traits that they lack do you think the Chinese might acquire?

26.* What principles should you keep in mind in introducing changes into China?

27. In view of the natural resources of the country and traits of the race, what is the probable future of China?

28. How do you rank China among the mission fields of the earth?

THE DEFECTS OF THE SOCIAL SYSTEM
But in speaking of the home, it must not be forgotten that it includes something more than the devotion of child to parent. There is a duty of parent to child, and in addition to this, there is an obligation existing between brothers and sisters. The Chinese home is built upon a philosophy which to us seems one-sided, much being said about the child's duty to the parent, and the younger brothers' duty to the eldest, but less about the mutuality of domestic relations. Do not the parents owe something to the child? The child enters life without his own volition; when he becomes conscious of existence, he finds himself environed by others, and certain relations fastened upon him. He is taught to address one person as father, another person as mother, a third as brother, and a fourth as sister. As he does not select the parent whom he is to revere, neither does he determine whether he shall be the elder brother or the younger, or even how many brothers and sisters are to surround him. Can it be that thus brought into the world, he is under greater obligation to his parents than his parents are to him?

—William Jennings Bryan.

Woman is made to serve in China, and the bondage is often a long and bitter one: a life of servitude to her parents; a life of submission to her parents-in-law at marriage; and the looking forward to a life of bondage to her husband in the next world; for she belongs to the same husband there, and is not allowed, by the sentiment of the people, to be properly married to another after his death.

—J. Dyer Ball.
III

THE DEFECTS OF THE SOCIAL SYSTEM

In the preceding chapter has been presented the bright side of Chinese character. Manifestly it is a race with tremendous possibilities. Lacking some of the leading traits of the Anglo-Saxon, it has others which go far to compensate it, and which under conditions by no means improbable may even turn the scale in its favor.

But there is also a dark side to the picture. Along with features that compel our admiration, Chinese society as a whole stands in sore need of Christianity. It would be alike unnecessary and undesirable to attempt to conform society in China to that of the Occident. Much as it owes to the spirit of Christ, Western civilization is not yet ready to pose as a model for non-Christian nations to copy in detail. But it confidently offers to every nation and kindred and tribe and tongue, the salt that has preserved all that is best in it from putrefaction.

Why does the Chinese social system especially need the influence of our religion? To answer this question, we must study the structure of the
family in China and trace its consequences. In the history of social development in the West, we must go back for hundreds of years before we find ourselves in the patriarchal stage. Early Greek and Roman society was organized on this basis, and we confront many of its features in the Old Testament. The scheme is a natural device for lending stability to the social order. The family becomes a close corporation, with authority concentrated in the father, its head. With its welfare that of the individual is not permitted to conflict.

In the West, when a son marries, he usually separates and becomes the head of a new family, which revolves henceforth in an orbit of its own. For the development of his own individuality and that of his wife, this is undoubtedly the wisest course. But in the East, the development of the individual is not taken into consideration; the maintenance of the family as a unit is alone of importance. Therefore, the son remains under the paternal roof and continues under his father's authority, while his bride becomes a minor subordinate, whose relations with her former home have been severed, and whose duty it now is to serve the parents of her husband. Even her selection, which we regard as a sacred and inalienable right of the individual, subject to the woman's free decision, is in China purely a concern of the family. The parents arrange
for the marriage through the medium of a professional match-maker, sometimes when the young people concerned are mere infants, and a man usually sees the face of his wife for the first time after the wedding ceremony has been performed.¹

The typical Chinese household, then, consists of the parents, their sons, who probably have been married while still in their teens, the daughters-in-law, who have come without courtship or pretense of affection into their new home to be the servants of their mother-in-law, and their children. The daughters of the family, on arriving at marriageable age, have become members of other households and are seen only on occasional visits in a circle where they no longer have any rights. Property is held in common, though it is sometimes divided before the death of the father. The rights of the parents over their children are absolute. The father, and after his death, the mother, may chastise, sell, or even kill a son² or daughter. As for the wife, from the moment she enters the house of her husband, "she ceases to

¹Archdeacon Gray tells of a wedding which he attended, where the bride turned out to be a leper. She was at once divorced, but the bridegroom was unable to recover more than part of the sum he had paid to her parents. Gray, China, Vol. i, 188.

²In the North China Herald for June 11, 1903, is reported a case in which a worthless son who refused to reform was strangled by his own mother, with the approval of the clan.

Dr. Nevius mentions an opium smoker who sold his wife to procure opium, and his son to defray the expenses of being cured. Nevius, China and the Chinese, 253.
have a wish that he is legally bound to respect."

Even after the branches of the family separate into different households, the worship of their ancestors preserves a bond between them, and beyond this lies the constraint of the clan, the members of which live together in villages and have an ancestral temple in common.

What will be the practical effect of this state of affairs on social life and the development of individual character? It is evident, in the first place, that innovation will have a hard time of it in such an order. Large bodies proverbially move slowly. They must do so in order to hang together. To move an entire Chinese family at a brisk trot would imply an immense amount of initiative and decision in the character of its head. But the aforesaid heads are not apt to possess initiative in abounding quantities, even if the idea of progress in some explicable way should happen to enter their minds. They are old, and the impulses characteristic of youth are dried up within them. While in theory a Chinese becomes of age at sixteen, as a practical matter he is often not his own master until late in life. His father, his uncles, his elder brothers, all coerce him and control his actions, so that only natures of the strongest sort can hope to retain their independence of spirit. The average man becomes the head of his family with the powers

of personal judgment and initiative largely atrophied by disuse, and is little fitted to lead along new paths.

The mutual responsibility of the family also tends to check innovation as well as wrong-doing. The father is responsible for the son as long as they both live, and the son is held accountable for his father's debts. In case of crime, other members of the family who have not had the slightest share in its commission may be punished. The clan, the neighbors, and those who have had the most distant relations with the culprit may also be involved. Archdeacon Gray cites a case in which a man flogged his mother, aided by his wife. In consequence, the pair were flayed alive; the granduncle, uncle, two elder brothers, and head of the clan to which the men belonged were executed; the neighbors who lived on each side, the father of the woman and the head representative of the literary degree which the man held, were flogged and banished; the prefect and district ruler were for a time deprived of their rank; and the child of the offenders was given another name.¹ Such mutual responsibility, if it be unavoidable, makes people watchful of each other, and especially makes the elders look with suspicious eye upon any aberration from the accustomed order on the part of their subordinates.

¹ Gray, China, Vol. I, 237, 238.
Even if the entire family should be united in its desire to adopt new ideas, it would be held in place by the traditions of the clan. The power of the clan elders, which extends in certain circumstances even to capital punishment, may surely be counted upon as on the side of well-seasoned precedent. The clan traditions, like those of the family, are not considered matters of mere convenience, but as possessing the sanctity of religion. In early society, custom and morals are identical, and from this attitude of mind China has not yet emerged. The worship of the family and clan ancestors has formed an effective barrier to change. Reverence for parents combines with fear of offending the spirits, in keeping the feet of the living in the paths which their fathers have trod. If a man should depart from the way approved by the past generation, he might bring a curse upon the whole community.

Filial piety in China has been developed and exalted as in no other nation under heaven. It includes not only the honor of parents while living, the imitation of their excellences after they are gone, but the holding up in general of the standards of propriety which they followed. Thus the constraints of one generation have been handed down unchanged to those following. It is recorded of the Emperor Ch‘ien Lung that "after ruling sixty years, he resigned for the
very Chinese reason that it would not be filial to outdo his grandfather," who had reigned for sixty-one years.

The officials in China have been for centuries chosen only from the ranks of those who succeed in passing the public civil service examinations. They and the host of others who continue their trials year after year are the only educated men in the empire and are the leaders of public opinion. But they have derived their ideas, not from the latest theories of political and social science, but from the classics which hold up as the ideal to be followed the golden age of Yao and Shun, usually dated in the third millennium B.C. Up to within a decade, Chinese education has gloried in the fact that the teaching which it furnished was absolutely free from all adulterations of modern spirit. It would be difficult for us to overestimate the influence, as a conservative force, of having the only men in the community who know anything, to know nothing else than the opinions of philosophers who lived more than a thousand years ago. If we should ordain as the sole condition and requirement for office holding the passing of severe examinations on the works of the medieval theologians, and could exclude from the education of the candidates all more recent influences, we yet should

probably have an administration more liberal in temper than that which China has enjoyed.

The character of the examinations has also an important bearing on the amount of practical illiteracy in the empire. Schools are numerous and are attended for a time at least by a large proportion of the male population. Their purpose, however, is not to fit men for the ordinary positions of life, but only to prepare the candidates for examination in the classics, and in consequence, those who never complete the preparation,—a very large majority of the whole,—receive comparatively little benefit. In estimating the percentage of illiteracy, it must be borne in mind that many of those who are classed as readers are about as fluent as most of our college graduates of twenty years standing are in Greek and Latin. They are not altogether illiterate, but on the other hand, they cannot read with accuracy and fluency. The number of those whom we should consider readers probably does not exceed ten per cent., and has been estimated by competent judges even lower.

The patriarchal system has its drawbacks in government as well as in social life. The close union of the family and clan not only checks individual development on the one hand, but hinders a broad patriotism on the other. Each group thinks only of its own interests. Cliquishness always destroys public spirit. It is signifi-
cant that the recent signs of a national patriotism in China come mainly from students who have separated from their families to study in the provincial colleges and in Japan.

What the father is to the family, and the elder or headman to the clan or village, that is the local magistrate to his district, the governor to his province, and the emperor to the whole empire. Each official has authority over those below him, and is responsible to those above him for the general good behavior of his constituency. While in theory the government, like the oversight of the father, is for the welfare of the people, in actual practise the power granted to those in office is usually utilized for selfish ends. A great variety of civil and criminal functions are concentrated in the hands of one man, which gives him great opportunity for abuse. There is a system of checks and balances whereby oppression is kept within limits, but overtaxing, acceptance of bribes, minor extortion, and irregularities are the rule and not the exception. Professor Parker says: "I have myself seen enough with my own eyes, and had innumerable free-and-easy conversations with both magistrates and runners, to enable me to state with absolute certainty that a downright bad magistrate, succeeding to a post dominated by a nest of evil-minded runners with a long-established tyrannical habit ingrained in their hearts, and practising among a stupid,
timid, or malignant population, can with impunity assassinate any one he likes in his own jail, accept any bribe, commit or condone any injustice, make his fortune, and even preserve his reputation in spite of all this. On the other hand, I have seen completely honest, simple-minded, benevolent magistrates, perfectly clean-handed (subject to custom), anxious to do right, loyal to their superiors, beloved of the people, and quite capable of restraining the police."

The people are long-enduring by disposition and have a wholesome fear of the government. Unless an injustice is of so grievous a nature as to rouse a whole village or clan it is apt to be borne. The principal concern of a magistrate is therefore not to administer equal justice to every citizen, but to keep the more influential sections of the population sufficiently satisfied not to appeal against him. Even if they should do so, he may succeed in checking their appeal. "There is no way of sending a petition, a telegram, or any communication whatever, to any one in authority, without running the gauntlet of a great many persons who will thoroughly sift the message, and will do their best to suppress, or at least counteract, whatever runs counter to their views or interests. One of the reforms most needed in China is a speedy and certain way to get the ear of those in authority."
It is probable that a magistrate has found it necessary to bestow a number of judicious "presents" to open the way to his appointment; it is quite certain that the amount he receives as salary will be altogether inadequate to defray his expenses. He is consequently practically driven to employ arbitrary means to recoup himself. If he overdoes the matter of exactions, he may get into trouble with his superiors; if he underdoes it, he will be out of pocket. The situation is far from ideal.

The unjust system of holding an official accountable for troubles he could not have foreseen or prevented leads many a man to suppress bad reports of his district, instead of investigating and righting the evil. It emphasizes the necessity of merely preserving appearances that will satisfy the inspection of those above him.

In such an atmosphere the people of China have lived in isolation for many centuries. The training they have received accounts for much of their wonderful homogeneity and for their respect for law and moral precepts. It accounts for their talent for combination, but it also accounts for China's lack of progress during the last thousand years. It is probably largely responsible for the lack of originality so often thought to be a race trait. The system under which it has lived would certainly seem well calculated to discourage every impulse toward
variation that the race may possess. It may be that the Chinese will some day, when their faculties have been set free from the binding force of precedent, exhibit greater originality than we have ever given them credit for.

It is also easy to understand their contempt for foreigners. It is a peculiarity of human nature that those most hidebound are among those most supercilious. It is not to be expected that they should regard those who violate so many of the ancient rules of propriety as we do otherwise than as barbarians.

We who have been so long time emancipated from the rule of custom should not overlook the fact that, in the maintenance of their traditions, some of the best instincts of the Chinese mind and conscience are enlisted. We have no right to approach their system as mere iconoclasts. Modern Anglo-Saxon society has been organized so as to open very wide limits, within which the individual is free to move. When any innovation,—a new breakfast food, or hair restorer,—lies within these limits, it has only individual conservatism to overcome in winning its way. No one is in the least lowering himself in the eyes of his fellows if he chooses to accept this sort of novelties. But there are things at which easy-going American society draws the line. Forms of the so-called "rational" costume for women, for instance, have not yet won the approval of
Defects of Social System

public opinion, and consequently they seem to the average person to be too ridiculous even to discuss. A woman would instinctively shrink from arraying against herself the sentiment of the entire community by adopting a style of dress it had agreed to condemn. Such an instance will help us to realize how hard it is to defy society as a whole even in a matter of mere convention.

Fortunately for us, the texture of our society is so loose, and its demands are comparatively so few, that we are hardly conscious of any constraint whatever. But in China, the man who undertakes to violate custom runs counter to his family, his clan, the whole force of public opinion, his feeling of reverence for his ancestors, and fear of their spirits, the only ethics he has ever been taught, the views of the most learned men he has ever known, and, last but not least, the most ingrained habits of his life. Change is coming in China. It will be well if it come not too rapidly to permit of the gradual preparation of the individual and the family to receive it. Otherwise, social and ethical chaos may be the result.

Let us next look at the relation of the patriarchal system to the individual. Surroundings of the kind that we have described are not apt to develop what we call individuality. The very conception of this implies the right of one individual to differ from another, of the present, if
need be, to differ from the past. It is not a gift which we inherit full-blown, but a potentiality which requires exercise and expression for its development. Precisely this expression is what the Chinese social system consciously and unconsciously represses. A youth is not encouraged to be himself, nor to express his own ideas. No one bears with his crudities and seeks to draw him out, in order to promote his mental growth. Instead of this, his elders control and snub him until the very idea of intellectual independence is starved within him. We are speaking of the average case; for in China, as everywhere else, there are natures which make some headway even against the most untoward conditions. It is easy to see that the average Chinese will be sadly lacking in those qualities of independence, initiative, and originality upon which Western society sets such a premium. And the case of the woman will be infinitely worse.

The Chinese is always under the public eye and under the constraint of public opinion. He knows almost nothing of privacy. He could not understand the lines of Lowell:

"If chosen souls could never be alone
In deep 'mid silence open-doored to God,
No greatness ever had been dreamed or done.
The nurse of full-grown souls is solitude."

The separation of families in the West and the arrangement of houses insures to all but the
very poor a certain amount of privacy. This in turn has the tendency to cultivate self-reliance and independence of action. But not so in China. The way in which population swarms in his family court-yard, in his village, and along the whole daily path of the Chinese prevents him from knowing the culture that solitude offers. Hence he loses all taste for it, and endures without concern crowding that would set us distracted.

Oriental custom has never demanded more than external conformity. A man may hold what opinions he likes so long as they do not affect his behavior. The result of this has been to exalt appearance as all-sufficient. Among the sayings of Confucius and Mencius are praises of sincerity, which is reckoned as one of the five constant virtues. But it is easy to see that a training which from childhood merely represses is not fitted to develop this characteristic. A Chinese says of his own youth: "The boy attains to the ideal character only when he habitually checks his affectionate impulses, suppresses his emotions, and is uniformly respectful to his superiors and dignified with his inferiors. Therefore the child is early taught to walk respectfully behind his superiors, to sit only when he is bid, to speak only when questions are asked him, and to salute his superiors by the correct designations. . . . If he is taken to task for any-
thing he has done, he must never contradict, never seek to explain . . . but suffer punishment in silence, although he may be conscious of no wrong-doing. . . . I lived the years of my childhood in a shrinking condition of mind. Like all youngsters, I wanted to shout, jump, run about, show my resentments, give my animal spirits and affectionate impulses full play. But . . . my tongue was bridled and my feet clogged by fear of my elders." It would be a rare exception when one could grow sincere in such an atmosphere.

A phrase which of late is often quoted in our popular literature is "to save face." Of the feeling which this denotes the Chinese have no monopoly, but their social ideals have developed it to an extraordinary degree. "Face" is the sense of having fulfilled the demands of appearance. The same training which smothers sincerity, feeds the desire to be above all things "proper." This desire has its good side. It holds people up to the performance of social duties which are too often repudiated in the West. A man would "lose face" if he neglected his parents or was backward in showing the customary hospitality. On the other hand, it fosters deceit, touchiness, and unwise extravagance. Falsehood is not permitted to stand in the way of face. Any violation of this false sense of

dignity will arouse instant resentment. The display at weddings and funerals demanded by "face" may plunge a family into debt for a lifetime.

It is impossible for a community to regard truth lightly and yet to preserve a sense of mutual confidence. Those who are willing to resort to falsehood when under pressure themselves, have no reason to believe that others will be absolutely truthful under similar pressure. The result is that no one in China accepts the statements of another at their full face value. This lack of confidence is shown in public affairs by the absence of "trust" institutions and of opportunities for the investment of capital as compared with the West.

A number of influences combine in rendering Chinese social life somewhat conspicuous for the absence of sympathy. The extreme poverty of great masses of people, a poverty that requires millions of families to practise every possible economy to escape starvation, renders them callous to suffering and want which they are unable to alleviate. The absence of nerves tends in the same direction. As a race they must be regarded as cruel.

Superstition aids in repressing manifestations of sympathy. Misfortune is believed to result from the ill will of some demon, who may transfer his persecutions to any one that attempts to
thwart him. Cases of distress are also neglected for fear lest the government officials should hold the would-be rescuers responsible for the evil.

The family system only aggravates this tendency to withhold sympathy. Affection could hardly be expected to run far outside the family or clan, but, even inside, the conflicting claims of sons and their wives are a great source of bitterness. Brothers and sisters-in-law too often look upon one another as competitors for the largest share of the common property. But perhaps the main difficulty lies deeper yet. Whatever represses individuality, whatever exalts formality at the expense of sincerity, whatever emphasizes the inequalities of position and privilege, whatever makes it hard for persons to read each other's thoughts,—these things tend to weaken the sense of sympathy.

While the Chinese is extremely sensitive and yielding to the force of public opinion, he has not had large opportunities to cultivate independent self-control. Hence we find him at once submissive and passionate, the latter especially when he thinks he has been subjected to a social slight. The man who has been denied the exercise of his manhood during so much of his life must expect to inherit streaks of childishness to his dying day. Dr. Gibson remarks on the anomalies of Chinese character: "Very slow to strike, though ever ready to curse and quarrel, capable of great self-
constraint, patient, peaceable, law-abiding, industrious, observant of the rights of others; and at the same time vengeful, implacable, 'pig-headed,' and obstinate, carried away, often on slight occasions, by passions of ungovernable fury."

Are such individuals, with all their valuable race traits and economic virtues, well prepared, just as they are, to face an era which calls for the most highly developed individuality? Can they be expected to acquire the needful traits of character without introducing a new spirit into their social system?

Let us consider, finally, the atmosphere of the Chinese home and its effect on womanhood and childhood. The ideas of propriety emphasize the duties of the inferior to the superior and say very little about the correlative duties of superiors to those beneath them. A Chinese woman enters the household of her husband's family tagged with the double inferiority of sex and age. She is only a woman, and she is probably the youngest woman on the premises. She is expected to serve her mother-in-law and to defer to her older sisters-in-law. If these individuals were gifted with any instinctive sympathy with youth, or if they felt under any special obligation to be considerate and forbearing, the percentage of happy households would be greater.

1 The East and the West, October, 1903, page 369.
But the young wife is more apt to be greeted with the regard which sophomores and upper classmen entertain for freshmen, so that her life becomes a burden to her from the very start. Where property is held in common, her presence means so much less for the share of each of the others, and the feeling is not unnatural that she must be made to earn her way. In case of the quarrels which are practically unavoidable in such a situation, she may be without the sympathy even of her husband. Theory demands that he should side with his mother rather than with his wife, and he has no affection for the latter that would make him seek to comfort her. In many a household a young Chinese husband would be ashamed to be seen even talking with his wife, while to show her any consideration would expose him to the ridicule of the entire family. It is no wonder that suicides of young Chinese wives are far from infrequent.

The wife has few legal rights. She may be put to death for infidelity, but has no right to complain of it in her husband. She may be divorced if she beats him, while he is free to chastise her in any way short of inflicting a wound. She is not even allowed to leave the house without his permission, and if she disobeys he may sell her as a concubine.¹

The fact that a girl at her marriage becomes a member of another family discourages her parents from giving her an education. Especially in the south of China it is not uncommon for girls to receive some instruction, but those who proceed far enough to be able to read for profit or recreation are probably less than one per cent. of the whole; Dr. Martin, of Peking, estimates not more than one in ten thousand.

The unhappy practice of foot-binding has no necessary connection with the patriarchal form of the family, but it adds greatly to the disabilities under which Chinese women labor. Mrs. Archibald Little, whose position as president of the "Natural Feet Society" has given her special reason for investigation, says: "During the first three years (of foot-binding) the girlhood of China presents a most melancholy spectacle. Instead of a hop, skip, and a jump, with rosy cheeks like the little girls of England, the poor little things are leaning heavily on a stick somewhat taller than themselves, or carried on a man's back, or sitting sadly crying. They have great black lines under their eyes, and a special curious paleness that I have never seen except in connection with foot-binding. Their mothers mostly sleep with a big stick by the bedside, with which to get up and beat the little girl should she disturb the household by her wails; but not uncommonly she is put to sleep in an out-house. The
only relief she gets is either from opium, or from hanging her feet over the edge of her wooden bedstead, so as to stop the circulation.” For a Chinese woman to confess that her feet gave her pain would be considered most indelicate, so that it is safe to say that there is much more of suffering than ever appears on the surface. In addition to this it is a great check upon freedom of movement.

There are some happy marriages in China and affectionate husbands. The wife who becomes a mother is treated with more respect, which increases as she advances in years. It remains true, however, that the social system as a whole is terribly deficient in providing for the natural and divine rights of woman. That the present situation does not cause the same amount of unhappiness that it would if Chinese women had ever known anything better is no excuse for its continuance.

The Chinese home in its present state does not furnish an ideal environment for childhood. To begin with, the ignorance and disregard of sanitation is responsible for a large mortality rate, and many of those who survive the unhealthy diet and careless treatment they receive, probably carry enfeebled constitutions through life. There is not the manifestation of sympathy between parents and children that means so much
in Western homes. A Chinese father who loves his children tenderly will yet consider it beneath his dignity to romp with them or enter into any of their games. A Chinese tells us that when a boy of twelve he left his mother to go to America, there was no embrace, although the mother’s eyes were wet. The little fellow gravely prostrated himself four times, and the parting was over. What would our own childhood and parenthood be, if we felt obliged to observe such a code of propriety?

Another thing we should miss in China is the family meal. This, as we know it, is an institution peculiar to Christendom. We could ill spare from our lives the memories of its social spirit and table-talk. In China men and women eat apart, and a child seldom sits at the table with both his father and mother. Nor has the Chinese child any knowledge of the books and magazines from which our children derive so much. The mental atmosphere of his home is far from stimulating. Even if he belongs to the small minority who learn to read with sufficient facility to enjoy it as a pastime, he is the rare exception, if he possesses anything suited to his comprehension. The quarreling between the women of the household, which he cannot help witnessing, aids in degrading his idea of home.

The evils we have mentioned may be consid-

---

ered as at least typical. Some of them may disappear with a development of China's resources, and the consequent rise in the standard of living. The spread of an education fitted to the actual needs of life will do more. But the root of the difficulty lies deeper. The Chinese family needs a new spirit, which shall lay stress on the duties of superiors to inferiors, on the worth of each individual soul in the sight of a loving Father, on the sense of personal responsibility to him and not to custom. It needs to learn that a man should forsake his father and mother and cleave to his wife, to love her as his own flesh. It needs to learn that "dignity is not one of the fruits of the Spirit." It needs to experience the liberty wherewith Christ has set us free from the bondage of the past.

QUESTIONS ON CHAPTER III

Aim: To Realize the Need of Chinese Society for Christianity

I. The Tendencies of Chinese Society.

1.* What are some of the more important things that you think Western society owes to Christianity?

2. What incidents can you recall from the Old Testament that remind you of the Chinese family system?

3.* Think out in detail how your own family life would have been different from your birth till
now, if Chinese customs had prevailed in this country.

4. How would this have affected your father and mother, uncles and aunts?

5. How should you feel toward the head of your family, if he had the rights which Chinese law allows?

6.* How much initiative would your father probably have developed, if he had lived under the Chinese régime?

7. What in general are the good and bad sides of the theory of mutual responsibility?

8. What important influences would never have come into your life, if you had felt compelled to conform to your family traditions?

9. How would it affect our progress, if no learning was regarded with respect but that of Greek and Latin?

10.* What qualities that China will need for her future development does her system of government fail to foster?

11. What qualities ought officials to possess to make the system a beneficent one?

12. If you wished a boy to develop initiative, what sort of training should you give him?

13. If you wished a girl to become perfectly sincere, what should you tell her to do?

14. How would the restrictions of Chinese family life hinder development along these two lines?

15.* Do you know any persons who lay great stress on appearances? How is their character affected by this trait?

16. What special good has come to you from hours that you have spent alone?
17. When a man is repressed by those above him, how is he apt to treat those below him?
18.* With what individuals do you share the deepest personal sympathy, and why?
19.* How many of the conditions that foster this sympathy are present in the Chinese social system?
20. What is the relation of "face" to sincerity?
21. Would you care to send a son or daughter to a boarding-school where you knew that school-opinion was all-powerful? Why not?

III. Its Influence on Woman.
22. If you were a Chinese girl, with what feelings would you look forward to marriage?
23. How would you feel to have your sister married to a man she had never seen?
24.* What difference will there be in married life when there has been no winning of affection in the first place?
25.* What effect will the provisions of Chinese family law have upon the character of the husband?
26. In view of the differing customs, what do you think would be the relative proportion of happy marriages in China as compared with the United States?

IV. Its Influence on Childhood.
27. For what influences of your childhood home life are you most grateful?
28. To what extent are these influences present in the average Chinese home?
29.* In what ways does the Chinese home violate the principles of child training that you would advocate?
30.* What sort of a man would you expect your son to be if he had lived from babyhood in a Chinese family?

31.* What sort of a woman would you expect your daughter to be under the same circumstances?

V. The Need of Christianity.

32.* In what ways do you think you might influence a Chinese home for the better, if you had made the acquaintance of the family? What would be your method of approach?

33.* How far do you think you could get without the aid of Christianity?

34.* Give all the reasons you can why Christianity will be indispensable in making the Chinese home what it ought to be.

THE STRENGTH AND WEAKNESS
OF THE RELIGIONS
China is popularly supposed to have three religions,—Confucianism, Buddhism, and Taoism.

The first is not, and never has been, a religion, being nothing more than a system of social and political morality; the second is indeed a religion, but an alien religion; only the last, and the least known, is of native growth.

—Herbert Allen Giles.

There is little hope for China, politically, morally, or religiously, until Taoism is swept from the face of the land. It is evil and only evil.

—H. C. Du Bose.

It [Buddhism] excites but little enthusiasm at the present day in China; its priests are ignorant, low, and immoral; addicted to opium; despised by the people; held up to contempt and ridicule; and the gibe and joke of the populace. The nuns likewise hold a very low position in the public estimation.

—J. Dyer Ball.

The higher class of Chinese should carefully consider the situation and should tolerate the Western Religion as they tolerate Buddhism and Taoism. Why should it injure us? And because Confucianism, as now practised, is inadequate to lift us from the present plight, why retaliate by scoffing at other religions? Not only is such a procedure useless; it is dangerous.

—Chang Chih-tung.
IV

THE STRENGTH AND WEAKNESS
OF THE RELIGIONS

The Chinese are not naturally a religious people. Although to the superficial observer they appear very religious, yet on closer examination it is evident that most of their worship is empty formalism. While the Hindus are passionately fond of the metaphysical and speculative, the Chinese are practical and do not burden themselves with the mysteries of the invisible world. As in nearly all lands, the women are the most devout worshipers: many of the educated men are skeptics, making only an outward acknowledgment of forms of worship. However, there are some earnest souls, seeking satisfaction for their heart yearnings, in the various sects.

Minor Faiths

Before entering upon a discussion of the three great religions of China, brief mention must be made of two minor faiths. The Mohammedans are scattered through China, especially in the western and southwestern provinces, to the pos-
sible number of twenty millions. They are more lax in their practises than their co-religionists in India, but they do not intermarry with the Chinese, and keep up the forms of their faith, making, however, for the most part no effort to proselyte. As yet very few have become Christians, but there is no reason why there might not be a movement in this direction when larger efforts have been made on their behalf,—an enterprise which ought at once to be seriously undertaken. Their moolahs, or priests, are often more bitterly opposed to Christianity than those of the sects of Tao or Buddha.

There is in K’ai-fêng, the capital of Ho-nan, the remnant of an ancient colony of Jews, but their synagogue has long since been pulled down and its timbers, and the sacred books as well, sold. The melancholy history of this sect is of special interest, and a concrete instance of how one of the most unimpressible faiths known to history may, having lost its original impulse, be disintegrated by the slow corrosion of the mingled polytheism, pantheism, and atheism of Confucian civilization.¹

Three forms of religion are recognized, Confucianism, Taoism, and Buddhism. The two former are indigenous, while the last-named came from India. Dr. Martin discriminates the re-

¹ For a summary of what is known of the origin of the Jews in China, see Yule, *Marco Polo* (edited by Henri Cordier).
ligions of China as ethical (Confucianism), physical (Taoism), metaphysical (Buddhism). Buddhism has adopted the deities and spirits of other religions. Taoism has imitated the trinity of Buddhism. Confucianism despises, rejects, and adopts both! Every Chinese is a Confucianist, but most of them are likewise Taoists and Buddhists. They practise all three on different occasions and for different purposes. Because these religions have been mingling so closely for centuries, it is really impossible to trace all the elements of Chinese religion to that which gave them birth.

Gibbon remarked of the Roman Empire that to the common people all religions were equally true, to the philosopher all were equally false, and to the statesman all were equally useful, an observation of which the student of Chinese religions will often be reminded. The definition of Religion in the Standard Dictionary is as follows: "A belief binding the spiritual nature of man to the supernatural being on whom he is conscious that he is dependent. Also the practise that springs out of the recognition of such relations." There is, however, in the Chinese language no word which embodies this concept, its place being generally taken by a term denoting instruction, which contains quite a different idea. The phrase p'ai shên, signifying "to
worship," or to pay one's respects to gods or spirits, is a vague substitute for a word which should mean religion.

Confucianism

Confucianism presents itself to the inquirer partly as a system of political and social ethics and partly as a State religion, embodying the worship of nature, of the spirits of departed worthies, and of ancestors. From one point of view it is therefore a religion, while from another it is not. Confucianism does not conform to the idea of a religion which binds the spiritual nature of man to a supernatural being upon whom he is consciously dependent. It must also be remarked that the term Confucianism is at once vague, inaccurate, misleading, and indispensable. It would naturally imply a system of thought to which Confucius is related in some such way as Gautama to Buddhism, or Mohammed to Islam, but this is by no means the case.

Confucius was a Chinese philosopher and statesman who lived in the sixth century B. C.1 In the days of the weak Chou dynasty and at a time when China was divided into a great number of petty feudal states, owing only nominal fealty to the emperor, Confucius appeared, at once an officer and a teacher. In the former

1 Born 551, died 478, B. C.
Strength and Weakness of Religions  89

capacity his services were never long continued, owing to the reluctance of the kings of the several states to be guided by his austere teachings. The great work of Confucius was in gathering about him a body of disciples to a reputed total of 3,000, many of whom were deeply impressed with his doctrines, some of them taking great pains to see that they were perpetuated.

Worship during the periods of Yao and Shun was probably monotheistic. Shang Ti was the supreme ruler of the universe and was regarded as a personal being. But nature and ancestral worship succeeded this monotheism. Confucius countenanced the existing worship of ancestors and of spirits, but laid almost exclusive emphasis on ethical relations. He never taught the duty of man to any higher power than the head of the State or family. The Emperor, being the Son of Heaven, exercises his authority under the direction of Heaven. Right government consists in directing the affairs of State in harmony with the Law of Heaven.

According to the Chinese ritual, Heaven is worshiped only by the emperor at the two solstices in the Temple of Heaven, in the southern city of Peking, where the Altar of Heaven is the spot at which the ruler of China's millions, having by fasting and meditation prepared himself, with an elaborate and a solemn ceremonial pros-
trates himself before Heaven as its agent, its servant; and sometimes, as in cases of rebellion, flood, drought, and the like, as guilty of sins against Heaven which require confession. This was done by the Emperor Hsien Feng in 1853 when the T'ai P'ing rebellion was at its height, imploring on behalf of his suffering people the compassion of the Sovereign of the universe. In this act the emperor recognizes that he rules by the authority of Heaven, to whom he is responsible for the use of his power.

Confucius laid great stress upon the personal character of the ruler, and attributed to his example an efficiency which has never been illustrated in human history. The theory is that if the prince is virtuous and all that he ought to be, the people *must* likewise be virtuous and all that *they* ought to be. This assumption has been crystallized in the dictum of a Chinese philosopher who lived B. C. 200: "The prince is a dish, and the people are the water; if the dish is round the water will be round, if the dish is square the water will be square likewise."

The teachings of Confucius, as to the means by which this good government is to be brought about, are fragmentary. What was needed, he thought, was a renewal of the old ways, and nothing else. "I am not," he said, "an originator, but a transmitter." His favorite disciple once in-
quired how the government of the State should be administered, and Confucius replied: "Follow the seasons of the Hsia dynasty; ride in the carriages of the Yin dynasty; wear the ceremonial cap of the Chou dynasty; let the music be the shao with its pantomimes. Banish the songs of the ch'ing, and keep far from specious talkers." Thus in his view the past was the golden age, to the restoration of which he gave all his energies and his life, yet he died with a lamentation upon his lips over his failure. His conception of the origin of government is embodied in a passage in the Book of History: "Heaven protecting the inferior people has constituted for them rulers and teachers, who should be able to assist God, extending favor and producing tranquillity throughout all parts of the empire." Accordingly, the most able and the most worthy ought to rule, and should they lose their character they would also lose the right to reign, and Heaven would bring about their downfall.

The admirable ethical system of Confucius expounds the "Five Constant Virtues": benevolence, righteousness, propriety, wisdom, and sincerity. As it is difficult for one to catch the exact interpretation of these words, a few qualifying clauses under each will give the general scope of their meaning. Benevolence implies an unselfish and active interest in public affairs, a charitable and forgiving spirit toward others,
gratification of the wishes of parents, and the merciful treatment of the fatherless and widows. Righteousness, more fully defined, means manly courage, fraternal feeling toward elders and younger persons, justice, integrity, and modesty in all things. Propriety demands a respectful attitude toward all persons, preserves conjugal harmony, declines much, and accepts little. Wisdom means a thorough investigation of the past, knowledge of men and nature, and the constant practise of virtue. Sincerity urges a simple and uniform life, and such absolute purity in the inner life that the words of the inner chamber should bear repeating in the palace. While these are very commendable virtues, they have hopelessly failed among the Chinese, because the only help Confucius could offer for their realization was, "When you fail, seek help in yourself."

One of the characteristics of the teaching of Confucius is its insistence upon social relations. The Five Social Relations are those of prince and minister, husband and wife, father and son, elder and younger brothers, and friend and friend. "In the above order of relations, with the exception of the last, the superior is set over against the inferior, with the result that the family and social life in China is largely dominated by a type of repressive formalism." Dignity, seniority, author-

ity are correlated with subordination, dependence, servility; and the spirit of freedom, self-initiative, and spontaneity find little scope for exercise."

The existence of spirits is not denied, but much more depends, according to his view, upon men than upon spirits, who can interfere in the affairs of men only to execute nature's behests. If one lives according to nature and lays up good deeds, he reaps the benefits in blessings, otherwise he is injured, perhaps destroyed, but it is his own doing. As the Book of Changes says: "He that complies with Heaven is preserved; he that rebels against Heaven is ruined." To investigate the laws of the unknown and the unknowable spiritual world is vain. Confucius made man alone the subject of his study, and abstained from discoursing on wonders, brute force, rebellion, and spirits. On this topic he said that the art of rendering effective service to the people consists in keeping aloof from spirits, as well as in holding them in respect. "We have not yet performed our duties to men," he says, "how can we perform our duties to spirits?" "Not knowing life, how can we know about death?" "He who has sinned against Heaven has no place to pray." The laws of nature, and of the spiritual world as well, lie beyond the comprehension of all men but those en-

1 Sheffield, in Religions of Mission Fields, 209.
dowed by nature with the spirit of wisdom. To present before the people questions and problems that are incomprehensible and incapable of demonstration serves only to delude them by a crowd of misleading lights, and leads to error and confusion.

One of his disciples asked him the crucial question: "Do the dead have knowledge of the services we render, or are they without such knowledge?" The Master replied: "If I were to say that the dead have such knowledge, I am afraid that filial sons and dutiful grandsons would injure their substance in paying the last offices to the departed; and if I were to say that the dead had no such knowledge, I am afraid lest unfilial sons should leave their parents unburied. You need not wish to know whether the dead have knowledge or not. There is no present urgency about the point. Hereafter you will know it for yourself." This, as Dr. Legge justly remarks, was scarcely the treatment of a profound subject which was to have been expected from a sage who boasted that he had no concealments from his disciples.

Of the far-reaching influence of the negative and cautious attitude of their greatest philosopher and teacher toward the spiritual world, the Chinese are but dimly aware, until they have received enlightenment from a source higher than
his. The gradual but inevitable effect of such an illumination is to put in a clear light the defects of the teachings of the great Master, while yet emphasizing the many and important points in which his system coincides with the teachings of revelation.

All Chinese cities must be provided with temples to Confucius (but without priests), in which are included also tablets to other sages as well, and here the Master is officially worshiped with elaborate ceremonies, and with costly offerings of silk and other gifts.1 His tablet is placed in the schools throughout China, and he is worshiped as the patron of learning. On entering and departing from the schoolroom the students are required to make their bows to the tablet. The homage which is offered is real worship, and, as Dr. Legge says, could not be more complete were he Shang Ti himself. The widely spread clan of Confucius (the K'ung family) have certain valuable privileges, and its head enjoys the title of the Holy Man, although he is

---

1 "The sacrificial animals, consisting of an ox and several pigs and sheep, are killed, dressed by scraping, and placed in kneeling posture upon the altars. All civil and military officers are required to attend the ceremony. In Peking the emperor himself officiates at the head of the worshipers; in the provinces this is done by the highest mandarin. The silks, among which there are fine brochades, are burned. It has been calculated that 27,000 pieces of silk, each ten feet long, are annually destroyed in the temples of the empire in honor of Confucius. The cost of one celebration amounts to $125, or about $500,000 annually for the whole empire, not counting the cost and repair of the temples." Dr. Faber, Problems of Practical Christianity in China, 22.
seventy-two generations distant from the ancestor who gave the family its fame. From the foregoing sketch of some of the more prominent aspects of Confucianism, it may be perceived that many of the questions ordinarily arising in regard to a religion have in this connection little place. Confucius, as we have seen, is worshiped, and with him the early emperors Yao and Shun, Wen Wang, Wu Wang, and Duke Chou. Every magistrate is required to perform officially various idolatrous ceremonies at certain temples, especially those of the tutelary god of each city, and of the god of war, Kuan Ti.

There is also an extensive and complicated system of nature worship which has been adopted by Confucianism, such as the worship of the deities of the hills and the rivers, the gods of the wind and of the rain, those of the land and of the grain, and many others. Every one, officials and people alike, is more than willing to do reverence to whatever seems likely to be of service in an emergency.

The paramount cult among the Chinese is the worship of ancestors, which existed before the time of Confucius and was simply recognized by him. It is the Gibraltar of Chinese belief, underlies their religion, and is the guiding influence in their daily conduct. "Social customs, judicial decisions, appointments to the of-
WORSHIPING AT THE FAMILY ALTAR

BLUE DOME, IN TEMPLE OF HEAVEN, PEKING
fice of prime minister and even successors to the throne are influenced by it." The Chinese believe that a man possesses three souls, which after death enter respectively the ancestral tablet, the tomb, and Hades. As these souls have the same needs after death as before, the survivors, especially the eldest son, must minister to them by transmitting to the spirit world (by burning) clothing, household effects, paper money, and other articles. Food is set before the tablets on certain occasions in the belief that the spirits will enjoy the offerings. The food is afterward eaten, but pious Chinese believe that the flavor of the food has been abstracted. Similar offerings are also made at the tombs of the ancestors once a year. The motive for the worship arises out of the belief that ancestors favor everything that is good and frown upon every unworthy act. Success in worldly affairs depends upon the support given to the spirits in Hades. From the above it is very evident that fear is the spur to filial piety toward deceased ancestors, and that the offerings are not made altogether in the spirit that prompts us to decorate graves, adorn statues, or hold memorial services.

One of the direct benefits of this belief is the reverence that has been inculcated for parents and rulers. "It has also promoted industry and has cultivated habits of domestic care and thrift

1 Quoted by Ball, Things Chinese, 30.
beyond all estimation." On the other hand, it has been said that not less than $150,000,000 is annually expended in ancestral worship out of the poverty of China. As it is necessary to be buried near the ancestral hall or among relatives, it prevents the colonization of the thinly populated sections of the country. It also concentrates love upon the home and thus precludes the development of patriotism. Furthermore, it destroys individual liberty, by imposing extreme parental authority, and most of all substitutes the worship of dead ancestry for the True and Living One.

As Confucius did not define man's relation to a supreme being, but merely set forth an ethical system, it is evident that his teaching cannot be called a religion. Perhaps the words of Dr. Legge are a fairer statement: "He was unreligious rather than irreligious; yet by the coldness of his temperament and intellect in this matter, his influence is unfavorable to the development of true religious feeling among the Chinese people generally, and he prepared the way for the speculations of the literati of medieval and modern times which have exposed them to the charge of atheism."

In an elaborate essay read by Mr. P'ung at the World's Parliament of Religions he remarked that, to a Confucianist, Christianity in China is

Strength and Weakness of Religions

devoid of interest, although it is not obvious in what sense this can be the case. The late Li Hung-chang in speaking at a dinner given to him in New York, said that, having read the New Testament, he saw very little difference between its teachings and those of Confucianism, and this is probably the professed attitude of many Confucianists. Mr. P'ung complains, as in view of its contrast to the minuteness of the Book of Rites he well might, that the New Testament directions for social conduct are very meager. Confucianism has been very carefully studied by Western scholars, and its excellences and its defects have been thoroughly presented. If at a former period there was an excess of antagonism to it on the part of some missionaries, there is now a tendency to a wholesome reaction, and it is regarded rather in the light of a preparation for Christianity. The point where there appears to be an irreconcilable opposition is in regard to the worship of ancestors.

Confucianism is a wonderful system of thought. Its strength lies in the inherent rectitude of its injunctions, which, if followed, would make the world a very different place from what it now is. But it altogether fails to recognize the essential inability of human nature to fulfil these high behests, and for this inability it has neither explanation nor remedy. In its worship
of Confucius, and other worthies, its face is ever toward the past. Its worship of ancestors has at present no ethical value, and is quite destitute of any directive or restraining power. Confucianism fails to produce on any important scale the character which it commends. While it has unified and consolidated the Chinese people, it has not, as the Great Learning enjoins, renovated them, and it never can do so. What it can do for China, it has long since accomplished. It must be supplemented, and to some extent supplanted, by a faith which is higher, deeper, and more inclusive.

Taoism

Taoism, like Confucianism, is indigenous to China, owing its reputed beginning to Lao-tzu, the Old Master, in distinction from Confucius who is the Master. The only work attributed to Lao-tzu is called the "Canon of Reason and Virtue," a treatise of but little more than 5,000 characters, remarkable alike for its brevity and its profundity.

Taoist literature is vast in quantity, but with the exception of the classic mentioned is of little value, and is irreducible to a system.

According to tradition, Lao-tzu (who was fifty years the older) and Confucius once met, but while the latter spoke of the former with respect, he did not repeat his visit. "The 'Book of
Changes’ is the connecting link between Confucianists and Taoists, the fundamental canon of both.” Confucianism teaches attention to social duties and to etiquette. Taoism seeks for “the pill of immortality,” having altogether lost its original character and become blank materialism. Although the soul is more refined than the body, it is a material substance, and while liable to dissolution, may by proper discipline escape it. Even the body may become etherealized and be “wafted away to the abodes of the genii.” There are in Taoist speech “Eight Fairies,” often represented as aged men of venerable appearance leaning on a staff, or sitting under a gnarled old tree. They ride on clouds and at will mingle in human affairs. The influence of this conception on the Chinese mind has been very great.

While there has been keen rivalry between these religions in past ages, there is at present the peace of senility. The native religion is under extensive obligations to the Indian. “The Sutras of Taoism in form, in matter, in style, in the incidents, in the narrative, in the invocations, in the prayers,—leaving out the Sanscrit,—are almost exact copies of Buddhist prayer books.”

A being is worshiped having the same name as Shang Ti, or Supreme Ruler of the Confucianists. But in practise he has delegated his

1 Du Bose, in Religions of Mission Fields, 164.
power to an inferior divinity called Pearly Emperor Supreme Ruler, who is regarded as a deification of a man named Chang, an ancestor of the present hierarch of the Taoist religion. The latter lives on a mountain in Chiang-hsi, where he enjoys great state, being in reality a spiritual emperor. He is styled by foreigners the "Taoist Pope." It is said that in his dwelling evil spirits are kept bottled up in large jars sealed with magical formulæ. Like the emperor he confers buttons denoting rank, and gives seals to those invested with supernatural powers. He is the chief official on earth of the "Pearly Emperor" in Heaven. His main function is the driving away of demons by charms and their expulsion by the magic sword, and is known as "Chang the Heavenly Teacher."

One of the most common temples is that of the "Three Rulers," those namely of Heaven, Earth, and Sea, sometimes represented as brothers, denoting the three primordial powers of Taoist philosophy. But there are "Three Pure Ones" who stand at the head of Taoist gods, one of whom is generally regarded as a personification of Lao-tzū. One of the "Eight Immortals" was a man named Lu (A. D. 755), now, strange to say, the god of barbers!

There is a Dragon King ruling floods, often worshiped in the form of a serpent, either aquatic
or otherwise. This ceremony was performed by the late Li Hung-chang, when Governor-General of the metropolitan province of Chih-li, and during the year 1906 by Yüan Shih-k'ai, holding the same office. As no one can certainly know when a snake embodies the Dragon King it is not always safe to kill them promiscuously.

The spirit world is supposed to be in all respects a duplication of the present one. Each city has a tutelary god in whose temple is a series of rooms depicting the horrors of the future life when the soul shall have passed the Taoist Styx and is tried for the crimes of this life. Here are pictures, or oftener images, of men and women climbing mountains of ice, only to fall back again; caught on spears and tossed back and forth to executioners; ground between millstones or sliced up with sharp swords, with a little dog running about licking up the blood.

Each village generally has one or more temples to the local god, who stands to the city god in the relation of a constable to a sheriff. On occasion of a death the family go there at set times to wail. The original of the local god is considered to be a famous T'ang dynasty scholar named Han Wên-k'ung.

The Taoist mass for ferrying souls across the Styx is an important one. Other masses are said at certain times according to custom. Even
Confucianists of the most agnostic type feel obliged to have either Taoist or Buddhist priests, or both, read their sacred books at funerals, otherwise no one knows what might be the consequences.

The priests are almost invariably uneducated and ignorant, acting in this capacity merely for a subsistence. Many of them were given away in their childhood by their parents on account of poverty, and know no other home than their temples. They are universally despised, but are considered as indispensable evils. Their functions are demon expulsion and devil worship. Taoism has a monopoly of the business of geomancy, which is interwoven with the entire life of the Chinese, and which has important relations to such innovations as telegraphs, railways, and mining. The hold of this superstition is to some slight extent relaxing.

It is difficult to find in Taoism at the present day a single redeeming feature. Its assumptions are wholly false, its materialism inevitably and hopelessly debasing. It encourages and involves the most gross and abject superstitions, such as animal worship of "The Five Great Families," namely, the Fox, the Rat, the Weasel, the Snake, and the Hedgehog. On the drum-tower at Tientsin it was common to see richly dressed merchants kneeling to an iron pot containing in-
cense burned to "His Excellency the Rat," and the like.

The effect of a belief in Taoism is to bring the living Chinese into bondage to demons, and to the innumerable spirits of the dead. Incredible sums are annually wasted in burning mock-money (made of yellow or white tinsel paper in the shape of ingots) to ward off imaginary evils. Chinese demon possession, however explained, is a real and terrible evil. It is firmly believed that invisible agencies cut off cues, kidnap children, and do other bad deeds. From time to time large portions of the country are subject to serious panics in consequence, as in 1877, when there was a cue-cutting mania, and in 1897, when it was believed that children were kidnapped, in each case leading to the wildest and most uncontrollable excitement. The latent superstitions arising from Taoism are endless, and they are as dangerous to the Chinese themselves (and yet more to foreigners) as powder-mills and dynamite factories, which they actually are. The entire Boxer movement was a gigantic illustration of this truth, when all the laws of nature were apparently thought to have been suddenly repealed. Men who are positive that no sword was ever forged which can cut them, that no rifle bullet can penetrate their charmed bodies, that no artillery can injure them, are in
the twentieth century perilous elements in any civilized land. China to-day is full of such men.

Buddhism

Origin This faith was introduced into China in the first century of the Christian era, in consequence of an embassy sent to India by the Emperor Ming Ti, to procure the books of the new religion. At different periods it encountered great opposition both from the agnostic Confucianists, and the materialistic Taoists. By different monarchs it has been alternately patronized and repressed, although it was always able to reassert itself.

Doctrines The Chinese, unlike the Hindus, are practical, and not contemplative. The creed of Nirvana and of annihilation could not get a fair hearing, hence Buddhism, which is able to transform itself in many ways, has allowed the craving for immortality to be expressed in the worship of Buddha under the name of O-mi-t'o Fo (Amita Buddha), in allusion to a happy hereafter and an expected paradise. The indefinite repetition of this name will bring great felicity, hence the devout Mongols spend most of their spare time in uttering the mystic syllables. The Indian doctrine of the transmigration of souls came to China with Buddhism, and is almost universally

1 The end of all personal existence.
believed, leading to a wide range of superstitions. Animal and insect life thus becomes sacred, since no one can be sure that any particular lamb (or louse) is not another form of one's grandmother. Matter is non-existent, the knowledge and the pity of Buddha are infinite. "All evils are summed up in ignorance. To acquire knowledge of the emptiness of existing things is to be saved."

The literature of Buddhism, like that of Taoism, is appallingly extensive, embracing a wilderness of translation from the Sanskrit, as well as transliterations of Sanskrit sounds in Chinese characters, of necessity quite unintelligible to the uninitiated. There are also innumerable original works in Chinese. Most Chinese scholars neither know nor care anything about these laborious productions; yet the popular tenets of Buddhism are deeply engraved on the heart of the Chinese people.

They have tended to make the Chinese more compassionate to the brute creation than they would else have been. It has introduced into China the graceful but costly pagoda, and the dagoba, or memorial tope over the ashes of dead priests. Buddhism has done little to relieve the sense of sin, and has long since degenerated into a mere form. Its priests, like those of Taoism, are for the most part idle, ignorant, vicious parasites on the body politic. The religion, like
many of its temples, is in a condition of hopeless collapse.

Here and there a Buddhist priest has embraced Christianity, giving up his precious bowl and beads, together with the mystic certificate of membership in the ranks of those who in any temple are entitled to support. Now and then with the willing consent of the people a temple has been turned into a Christian chapel. Under the exigencies of the present poverty of national resources, all Chinese temples not officially listed are liable to have their lands confiscated for the support of local schools and academies. This revolutionary move is sometimes accompanied with a prohibition of the further enlistment of young pupils, for whose support there would then be no provision. Were this regulation carried out generally, both Taoism and Buddhism would within the next fifty years have very little external expression, albeit the superstitions which they represent might perhaps remain latent but persistent.

The number of Buddhist temples is greatly in excess of those of Taoism. Many of the finest and most costly are scattered through deep and retired valleys, or situated on mountains accessible with difficulty, where, retired from earthly contamination, the priests may perpetually drone through their routine rituals.
The most popular divinity is the goddess of mercy, Kuan Yin (sometimes represented as a man), who is able to save from evil and to bestow ultimate Nirvana. A p'ũ-sa is an inferior Buddha, of whom Kuan Yin is one, two other principal ones being Wên Shu, the god of wisdom, who rides on a lion (especially worshiped at Wu T'ai Shan in Shan-hsi), and P'u Hsien, the god of action, who mounts an elephant, the former typifying courage and eagerness, the latter caution, gentleness, and dignity. "The image of the Fo (Buddha) or that of the p'ũ-sa is intended to combine in its appearance wisdom, benevolence, and victory; the wisdom of a philosopher, the benevolence of a redeemer, and the triumph of a hero."

The power of Buddhism in China has arisen from the fatal weakness of Confucianism, which has nothing to say of the hereafter, or of retribution, whereas Buddhism teaches that "Virtue has virtue's reward, vice has the reward of vice; though you may go far and fly high you cannot escape." The Recorder in one of the temples is represented with a book and a pen in his hand, over which is the legend, "My pen cannot be evaded." The insistence with which this teaching is emphasized has not been without its beneficial effect upon the Chinese conscience.

In the mind of the reader the question naturally arises what has been the result of this amal-
gamated triumvirate of religions that has swayed one-fourth of the world's inhabitants for centuries. One of the best tests of any religious system is its effect upon the moral life of its devotees. "By their fruits ye shall know them" may be a trite expression, but it is an admirable challenge to the inefficacy of these Eastern cults. The moral precepts of Buddhism and Confucianism elicit our praise, but their powerlessness to uplift the people morally is evidenced by the prevalence of deceit, dishonesty, lying, mutual suspicion, and the total eclipse of sincerity. These lapses, the precariousness of female childhood, the inferior position of womanhood, and some unmentionable vices clearly show that some external force is needed to transform the moral life of the people. Christianity will uplift these millions morally, invigorate the whole country, give them right relations to the Father, and provide salvation through Christ.

QUESTIONS ON CHAPTER IV

Aim: To Realize How Christianity Fulfils Both the Ideals and Needs of the Chinese

1. Which do you consider is most responsible for the non-religious character of the Chinese, their inherited nature or their surroundings and training?
2. What does the condition of Islam in China indicate as to the prospects of other entering religions?
3. What is there that you approve in the teaching of Confucius concerning government?
4.* What is there that is lacking in this teaching?
5. Have you any criticism for the five constant virtues?
6. How do they compare with the fruits of the Spirit?
7. Do the five social relations cover everything that is necessary?
8.* What is the advantage and what the disadvantage of laying such stress on these relationships?
9. Why do you think that Confucius took the attitude that he did toward the spiritual world?
10. Is Confucianism better or worse for the deities that it worships?
11.* Try to imagine yourself a Confucianist. What that Christianity now provides for you should you miss most?
12. What motive should you have for doing right?
13. What do you think should be the attitude of a missionary toward ancestral worship?
14. If a convert brought you his ancestral tablets, how should you treat them?
15.* What care should a missionary take in regard to social behavior?
16. Is it an advantage or a disadvantage to the missionary that the ethical teachings of Confucianism are so high?
17.* If you were a missionary, how should you approach a sincere Confucianist?
18. With what spirit should you deal with him?
19. How should you endeavor to overcome his prejudices?

20.* How should you try to show him that Christianity met both his ideals and his needs?

21. Do you think that Taoism could possess the influence that it does, if it were built on no real need in human nature?

22. What need do you think it has endeavored to supply?

23. Do you agree that it has absolutely no redeeming features?

24. What sort of people have most to fear from the Taoist hells?

25.* What to your mind are the most serious evils of the system?

26. Try to imagine yourself a sincere Taoist. Should you be glad or not to be able to believe that your superstitions were false?

27.* How do you think that Christianity could be presented most attractively to a Taoist?

28. How should you deal with his superstitions?

29. To what needs of human nature does the spread of Buddhism in China testify?

30. What do you consider the best features of Buddhism?

31. Why is Kuan Yin the most popular deity?

32. In what ways does Buddhism seem to you weakest?

33. Which should you prefer to be, a sincere Confucianist or a sincere Buddhist?

34.* How do you think that Christianity could be most attractively presented to a Buddhist?

35.* If you could combine all the best points of Confucianism, Taoism, and Buddhism, what sort of a religion would you have?
36. What would be the strongest motives in such a religion?

37. How would it compare with Christianity?

38.* How would Christianity fulfill both the ideals and needs of such a religion?

UPLIFTING LEADERS
They climbed the steep ascent of heaven
Through peril, toil, and pain:
O God, to us may grace be given
To follow in their train.

—Bishop Reginald Heber.

Pioneering, in any line of life, involves difficulty, distress, discouragement, and especially is this the experience of a pioneer missionary’s early years. Nor is he generally dowered with buoyant hope above his fellows, though, happily for himself and his work, his call has shaken his soul to unwavering steadfastness, and enriched him with a calm trust, sufficient for triumph over obstacles that often, even to himself, seem insurmountable. The thought of the sublime faith and perseverance of that great man, Robert Morrison, and of those who followed him, is ever an inspiration to the successful, and a tonic to the depressed worker.

—W. E. Soothill.

The missionaries have not sought for pecuniary gain at the hands of our people. They have not been secret emissaries of diplomatic schemes. Their labors have no political significance, and last, but not least, if I might be permitted to add, they have not interfered with or usurped the rights of territorial authorities. A man is composed of soul, intellect, and body. I highly appreciate that your eminent Boards (Foreign Missionary Boards of the United States) in your arduous and most esteemed work in China, have neglected none of the three.

—Li Hung-chang.
V

UPLIFTING LEADERS

Early Nestorian Work and Olopun

It is not perhaps strange that, although there are traditions of the introduction of Christianity into China at a period not long after the time of the Apostles, all historical traces of such an event should have been lost in the dim mists of antiquity. But it is certainly singular that, after it had once gained a firm footing and even imperial favor, the Christian faith in the form of Nestorianism\(^1\) totally disappeared from the empire, so that its very existence was forgotten. Had it not been for the casual discovery in the year 1625 of a deeply buried black marble tablet near Hsi-an containing nearly 1,700 Chinese characters, and a long list of names of priests in Syriac, the fact that such a sect rooted itself in the Celestial Empire would never have been believed, as indeed after the tablet was unearthed it was for a long time discredited. Its date is 781 A. D., during the illustrious dynasty of

\(^1\)An early sect of Christians, named after Nestorius, patriarch of Constantinople, in the fifth century A. D.
The Uplift of China

T'ang. It records the arrival of a Syrian priest named Olopin, in the year 635 A. D., who was kindly received by the second emperor of that dynasty, whose title was T'ai Tsung. The style of the inscription on the Nestorian tablet is florid and highly obscure, yet one who already knows what the Christian doctrines are, might readily identify them, though buried under Oriental imagery.

The melancholy history of Nestorianism in China is not encouraging to those disposed to rely upon the precarious favor of emperors, or officials, however exalted; nor to those who omit to evangelize the people, and who preach a Christ who is human rather than divine. The followers of this faith were no doubt bitterly antagonized by the aggressive Mohammedans who arrived in China later than they,—the Nestorians in turn persecuting the early Roman Catholic missionaries. Not a building which the Nestorians erected, not a page which they wrote in the Chinese language, has even by tradition been preserved, save only the Nestorian tablet.¹ This is in itself a valuable and irrefragable certificate to Chinese

¹ About the year 1725 there was discovered in the possession of a Mohammedan, the descendant of Christian or Jewish ancestors from the west of China, a Syriac manuscript in the same characters as that of the Nestorian tablet. It contained the Old Testament in part, from the beginning of the twenty-fifth chapter of Isaiah to the end of that book, the twelve Minor Prophets, Jeremiah, Lamentations, and Daniel, including Bel and the Dragon, with the Psalms, two songs of Moses, the Song of the Three Children, and a selection of hymns. Wylie, Chinese Researches, 92.
worshipers of antiquity that Christianity is an ancient and world-wide faith, which, more than twelve and a half centuries ago flourished in the central Flowery Empire.

Roman Catholic Efforts and Matteo Ricci

The missionary efforts of the Roman Catholic Church in seeking to win the Chinese belong to two periods, the first of which may be called the medieval attempt. This was undertaken in the thirteenth century, and the principal results were gained at the time when the Mongol, Kublai Khan, was in control of China. While there had been an earlier papal embassy, it was John called Monte Corvino who, having first visited India, joined a caravan to China in 1291 and was received by Kublai Khan in the same spirit in which the T'ang emperor had welcomed the Nestorians. Under Corvino's leadership a church was built at Cambaluc (later called Peking), thousands were baptized, an orphan asylum was projected, and the New Testament and Psalms were translated into the Mongol language. But the mission was not followed up with adequate reinforcements, and after Corvino died at the age of eighty the movement quickly came to an end.

The Roman Catholic modern attempt was largely inspired by Francis Xavier and the Jesuit
The Uplift of China

influences which he set in motion, though he himself died at the threshold of China in 1552 without having been able to enter the empire. This was accomplished in 1580 by Michael Roger and young Matteo Ricci, both of the Jesuit order.

Ricci soon became the leader, was able to secure entrance to Peking in 1601, and met with a kind and even patronizing reception from the Emperor Wan Li. One of his most famous converts was a native of Shanghai, named Hsü, who took the name Paul. A part of his family estates near Shanghai still form the most unique and interesting center of Catholic influence to be found in China.

The death of Ricci in 1610, at the comparatively early age of fifty-eight, turned out, as he foresaw, greatly to the furtherance of his cause, in consequence of the reply to an elaborate memorial of Father Pantoja asking for a burial place for the distinguished Western scholar who had given his life to China. Not long after the imperial edict was issued, Ricci was buried with a splendid funeral, which was rather an exhibition of triumph at the favor shown than of grief for the death of the one whose fame had made it possible.

Several points in the subsequent history of Roman Catholicism in China should be mentioned. During the seventeenth century there were bitter controversies over the right attitude
toward ancestral worship and the proper term to designate God. From 1724 to 1858, during which Christianity was under a ban, Roman Catholics suffered more or less of persecution. In the period from 1858 to the present, the tendency of the Church to seek and to wield political power has endangered the interests of all other missionaries and even of all foreign residents in China.

Robert Morrison

"I conceive it my duty to stand candidate for a station where laborers are most wanted." So wrote Morrison in 1804, at the age of twenty-two, when offering himself for foreign service with the London Missionary Society; and when it became evident that China was to be his destination, he regarded the result as an answer to his prayer "that God would station him in that part of the missionary field where the difficulties were the greatest, and, to all human appearance, the most insurmountable." ¹

The remarkable application of Morrison to reading, to study, and to the hardest of intellectual tasks redeemed any aspect of being dull that he may have had in his boyhood. As a young man, though engaged in manual labor

from twelve to fourteen hours a day, he read and re-read such books as he could secure, had his Bible open before him during his hours of labor, and studied far into the night. A little later, to the extent of his opportunity, he pursued courses of study and preparation for his future work in the academies at Hoxton and Gosport. But more astonishing than his acquisition of mental training through these avenues was his utilizing to the utmost any means open to him in England of gaining a knowledge of the Chinese language. It was understood at the time that but one British subject had a knowledge of Chinese, Sir George Staunton, who was in China as president of the Select Committee of the East India Company.

Most providentially for Morrison, a native of South China, Yong Sam-tak, was in London at this time. He proved to be irascible in temper, but even this was a source of discipline in patience, of which Morrison would need a limitless store in the trying situation awaiting him in the East. There were also found in the British Museum in London a manuscript copy of most of the New Testament in Chinese, translated by an unknown Catholic missionary, and a Latin-Chinese Lexicon in manuscript form. Taking in hand for the first time the camel's-hair pencil and acquiring from his teacher a little familiarity in writing the Chinese characters, Morrison now began and in a few months completed copies of both
of the above-mentioned works. This is sufficient evidence of the unremitting diligence and determination by which throughout his active career he achieved marvelous literary labors.

As the ships of the East India Company denied to missionaries the privilege of a passage, Morrison embarked, January 31, 1807, for China by way of the United States; and as illustrating the gains of a century in navigation it may be noted that seventy-eight days elapsed before the harbor of New York was reached, the passage now requiring a little over five days.

His reception by the Christian workers, especially of New York and Philadelphia, was most hospitable and cordial, and when he sailed for his distant post, he was accompanied by the earnest wishes and prayers of a newly made circle of American friends. Without doubt, his brief sojourn in the United States had a direct bearing upon the subsequent enlistment of American missionary effort on behalf of China; and, as a part of the recompense for this influence, he bore a letter from James Madison, Secretary of State, to the American consul at Canton, and lived for a year after his arrival in the factory of some New York merchants.

After a voyage of four months from New York, Morrison arrived at Canton, September 7,

1 Townsend, Robert Morrison, 32.
2 The term "factory" designates the building where the trade operations of a foreign company were conducted.
1807. Single-handed, as a representative of the religion of Christ he found himself face to face with the task of winning for his Master the world's most populous empire. In New York the ship-owner in whose vessel he sailed, being skeptical concerning his purpose, had said sneeringly, "And so, Mr. Morrison, you really expect that you will make an impression on the idolatry of the great Chinese empire?" "No sir," Morrison replied, "I expect God will."¹ In this same unshaken confidence he now began his work.

Having a letter of introduction to Sir George Staunton, he found in him a man of noble spirit, and the acquaintance thus begun ripened into a life-long and ardent friendship. In many ways this leader of British commercial enterprise in the East was helpful to the missionary, at once being of assistance to him in obtaining as teacher the services of Abel Yun, a Roman Catholic Chinese from Peking. Morrison's first work was the more thorough study of the language, and in this he made astonishing progress.

His marriage to Miss Mary Morton, the daughter of a foreign resident at Macao, occurred February 20, 1809. It was also at this time that he received a request from the East India Company to become their official translator, a position which gave him the necessary security

for the prosecution of the great task for which he had been especially commissioned by the London Missionary Society,—the translation of the Scriptures into Chinese.

Perhaps the work of no other missionary translator has been so far-reaching and profound in its influence as has that of Morrison. The tremendous difficulties that had to be overcome before the whole Bible could be put into Chinese are to be considered. It does not detract from the essential honor that belongs to Morrison to say that he had the aid in the New Testament of the version by the unknown Catholic translator, and of the assistance in the Old Testament of Dr. Milne. Thirty-nine of the sixty-six books were his own translation. Nor does it make his achievement materially less to recognize that it was not entirely successful in its terms for certain spiritual ideas, like that of the word for God, and that it has been superseded by later translations. These are disadvantages incidental to almost every pioneer version. None the less it served as the basis from which others could work out higher results.

It was with peculiar joy that Dr. Morrison was able, November 25, 1819, to write to the directors of the London Missionary Society, informing them that the Bible had been translated into Chinese. He at once received the earnest and enthusiastic congratulations of missionary
and Bible societies throughout the world, and everywhere the announcement was an inspiration to enlarged endeavor.

The next goal of his translation and literary efforts was the completion in 1823 of his Anglo-Chinese Dictionary, upon which he had been engaged for sixteen years. It was issued by the East India Company at a cost of sixty thousand dollars, and contained forty thousand words expressed by the Chinese characters, filling six large quarto volumes. The work is almost as much an encyclopedia as a dictionary, and abounds in biographies, histories, and descriptions of national customs, ceremonies, and systems.

As the missionary service of Dr. Morrison came to a close by his death, August 1, 1834, it covered but twenty-seven years, yet in view of the circumstances, and the difficulties of the time his achievements are almost incredible. One of his latest biographers sums them up as follows: "Any ordinary man would have considered the production of the gigantic English-Chinese dictionary a more than full fifteen years' work. But Morrison had single-handed translated most of the Bible into Chinese. He had sent forth tracts, pamphlets, catechisms; he had founded a dispensary; he had established an Anglo-Chinese college; he had superintended the formation of the various branches of the

1 Rev. Sylvester Horne.
Ultra-Ganges Mission; and he had done all this in addition to discharging the heavy and responsible duties of translator to the East India Company, and preaching and teaching every day of his life. No wonder he had achieved a reputation almost world-wide for his prodigious labors on behalf of the kingdom of God."

Peter Parker

If Morrison was able to show in a provisional manner the advantages which would arise from the use of the healing art as an aid to missionary endeavor, it was left to Peter Parker, throughout his long and splendid career, to demonstrate that medical missions form one of the essential agencies of completely developed mission work.

Born at Framingham, Massachusetts, June 18, 1804, he united with the Church at sixteen, and became a teacher in the Sunday-school at nineteen,—a most unusual advancement in service in those days for one so young. Interested friends gave material aid in his education, which was secured at Wrentham Academy, and Amherst and Yale Colleges.

It was at Yale that he decided to devote his life to the foreign field, and when his preparation was complete, it included courses in both medicine and divinity. He went out, therefore, both as an ordained and a medical missionary, under the American Board. And so providentially had
his call and years of study been timed, that not three months elapsed between the death of Dr. Morrison at Canton, August 1, 1834, and the arrival there of Dr. Parker, October 26, of the same year.

A part of the first year was spent at Singapore, but on the 4th of November, 1835, he opened his Ophthalmic Hospital in Canton, and it quickly grew into a general hospital and dispensary. Soon thousands were seeking admission. The remarkable cures awakened toward this founder of medical missions, feelings of wonder, admiration, gratitude, trust, and deep devotion. Morning by morning the approaches were crowded with patients coming for aid, some in their eagerness rising at midnight, others spreading their mats the previous evening and sleeping by the threshold, that they might be the more certain of early admission.

Dr. Parker was successful in performing some of the most delicate and difficult surgical operations, so that the blind were made to see and the lame to walk. His cures were pronounced miraculous, and the news of such wonderful results carried through the eighteen provinces drew still wider circles of the afflicted to Canton for treatment. On many days this devoted servant of Christ, walking in the footsteps of the Great Physician, dealt with more than a hundred cases,

1 Stevens, Life of Peter Parker, 118.
till by night he was so weak and exhausted that
he was in fear of falling or fainting, but the next
day he would again be at his post.

While Dr. Parker was seeking to restore the
body, he was no less eager to bring to the soul a
knowledge of Christ's power to save, and he
found his grateful patients receptive to his gospel
teachings both collectively and individually.
Thus it happened that in three months the suc-
cessful cures from his hospital did more to re-
come the frowning wall of Chinese prejudice and
restrictive policy than could have been accom-
plished by years of customary missionary work.
To use Dr. Parker's favorite expression, he was
"opening China at the point of the lancet."

The interest in the work inaugurated by Dr.
Parker now became widespread; friends were
gained of every rank from near and distant prov-
inces; some of the brightest native young men
began acquiring a knowledge of English, with a
view to studying medicine, while others applied
for situations in the hospital. In order to make
the work more secure financially and to provide
for its development, there was established in 1838
the Medical Missionary Society in China. As it
was the first society organized for the purpose of
combining the healing of disease with the teach-
ing of the gospel, it marks an era in the growth of
modern missions, and not long afterward the hos-

1 Stevens, Life of Peter Parker, 129.
hospital which Dr. Parker had started was placed under the patronage of this new society. It encouraged physicians to come and practise among the Chinese; and from its influence the hospitals now found in the empire, with their equipment, their trained physicians, assistants, and nurses, and the education of native youths in medicine and surgery have largely come.

The bitter feeling kindled by the Opium War between Great Britain and China made it necessary for Dr. Parker to close his hospital for a time and he used the opportunity to return to the United States after seven years of intense labor. Here he told of China's medical uplift. At Washington he enlisted the government in an effort to establish friendly relations with China. In Great Britain and France he powerfully presented the cause of medical missions. Before he left the home land on his second voyage to the East, he was married to Miss Harriet Webster, a relative of Daniel Webster and Rufus Choate, and they arrived at Canton November 5, 1842. Amid fearful conflagrations and fresh forms of opposition, he resumed and prosecuted his work with remarkable effectiveness.

The time had now come when the United States could enter into terms of intercourse with China, and Caleb Cushing was sent as Commissioner to negotiate a treaty between the two nations. As a result, Dr. Parker was appointed
by President Tyler, secretary and Chinese interpreter to the legation in China.

Having planted so firmly the medical movement for China that he could safely entrust it in a measure to other hands, though scarcely abating at all his own medical and missionary labors, Dr. Parker gave increasing attention to the development of right international relations with the empire. In 1855, worn out with the struggle to bring China's leaders to adopt the right attitude, he sought respite in America, but was so strongly importuned that he at once returned as United States Commissioner to China, so continuing till 1857, and having as his reward the ratification of the treaty of 1858. In the years from 1857 to the time of his death in 1888, Dr. Parker resided at Washington, active till the end of his eighty-three years of life for the Christian advancement of China, America, and the world.

William C. Burns

As the life-story of William C. Burns is unfolded, it is seen that more fully than with the other missionary pioneers of China his work is that of a sincere, self-forgetting, intense evangelist.

He was born in the parish of Dun, in Angus, Scotland, in 1815, and was the son of a minister, who had the calm dignity of the oldtime pastor,
The mother presented the complementary qualities of blithesome activity and joyousness. In the presence of her elastic good cheer and courage, labor became light and duty pleasant. These contrasted characteristics of the father and mother were in large measure combined in the son, in whose nature there was always a deep seriousness but at the same time a peculiar winsomeness and attraction that drew his hearers to him and melted them into submission to Christ his Master.

It was at Kilsith, the scene of his boyhood home, where his father had become pastor, that at a communion service in July, 1839, while young Burns was preaching, the Holy Spirit came upon the people, and a remarkable revival began. The same work was witnessed at Dundee, where Mr. Burns was serving in the absence of the pastor for a few months, and hundreds were converted and added to the churches in these parishes. This wonderful work changed the plan of Mr. Burns of going at once to the foreign field, and he continued without cessation in evangelistic services throughout Scotland, Ireland, and Canada, from 1839 till near the close of 1846.

In the spring of 1847 Mr. Burns accepted the call of the English Presbyterian Church, and sailed as their first missionary to China, and with surprising success mastered the language during
the first year or two of residence at Hongkong and Canton. It is said of him that he "spoke Chinese, wrote Chinese, read Chinese, heard Chinese, sang in Chinese, and prayed in Chinese." It was this entire absorption in the very spirit of the language that enabled him to acquire such a command of it that he could go from one part of China to another and yet always remain an evangelistic preacher to the people. It also gave him a preparation to translate the Pilgrim's Progress into both the Amoy and the Peking dialects, as well as many hymns into colloquial Chinese, some of which are still in use.

Scarcely was he started in learning the language when he went to the prison at Hongkong, seeking to talk and pray with three Chinese condemned to death. Like his divine Master it was ever his delight to care first of all and most of all for those whom others overlooked, to leave the ninety and nine that were in safety and go after the utterly lost in the heathen wilderness. He already began to move forth among the masses of the people and to win the friendly reception and good humor with which a Chinese crowd seems ready to greet the man of genial sympathy, of quiet self-possession, and of quick and apt response to their questions.

His first preaching tour outside of Hongkong is characteristic. He left his assistants to direct
the boat to any point they thought best on the long-extended coast, while he went through the villages and towns, making the gospel known by tracts and addresses. As soon as he reached a village, he would begin reading his Bible aloud, perhaps under the shade of a tree. Soon the people would gather, and he would explain to them the nature and purpose of the gospel. Usually some one would ask him at meal-time where he was to eat, and he would accept the hospitality of the friendly villager, and go on trusting in the same manner for his night's shelter, thus often preaching the Word from week to week, and lacking nothing.

Four hundred miles northeast of Hongkong is the teeming hive of human life made up of Amoy and more than a hundred towns and villages, and in 1851 this became the field of Mr. Burns' labors. In March, 1852, he crossed over to the mainland from Amoy, which is located upon an island, and in the course of seven days made a circuit of thirty villages, everywhere sowing abundantly the precious seed. The next year he reached Chang-chou, thirty miles distant, with its population of about half a million, and he says: "I do not think, upon the whole, that I have spent so interesting a season, or enjoyed so fine an opportunity of preaching the Word of Life since I came to China, as during these nine
days." The fire thus kindled at Chang-chou was never wholly extinguished.

The results of Mr. Burns' earnest evangelistic work now began to appear especially at Pechuia and one or two other towns, not far from Amoy. There was a movement of quickening and conversion running through many of the families of these communities. The preaching place was crowded to a late hour night after night, idols and ancestral tablets were destroyed, and some shops were closed on the Sabbath, even when it fell on market days. "What I see here," wrote Mr. Burns, "makes me call to mind former days of the Lord's power in my native land."

There now came a brief visit to Great Britain, and on his return to the East the aggressive missionary evangelist sought, from Shanghai as a base, to penetrate even into the lines of operation that marked the contact of the imperial and insurgent forces in the T'ai-p'ing rebellion. Going up the Yang-tzü River as far as he could possibly induce his boatmen to venture, he entered the Grand Canal, and at one point such was the eagerness of the men to get the Christian books that he was distributing, that they would swim to his boat from the bank of the canal, fasten the books to their heads by their cues, and swim back again! Again, as they passed through Souchou, many reached forth from their doors and

\[1\] Memoir of Rev. William C. Burns, by his brother, 251.
windows with bamboo basket-hooks, with which they received Scripture portions and tracts. Thus living most of the time in his boat, for some months he followed the course of the canals and rivers which spread like a network over the whole country to the west and south of Shanghai, carrying far and wide the quickening gospel leaven.

The closing period of his career may be said to date from the spring of 1856, when he began work first in the region of Swatau, a hundred and twenty miles southwest of Amoy. Here he ventured to make a missionary visit to Ch'ao-chou, but was arrested as a foreigner, and after inquiry had been made into the case, was taken to the British consul at Canton. After his liberation it was not deemed prudent to return to Swatau, so he revisited the scenes of his revival labors at Pechuia, confirming the hearts of the Christian disciples, reorganizing the churches, and even at that very early date making a beginning in self-support. Next, Fu-chou was for a time the scene of his activities. That he might secure governmental protection of some of the native Christians who had been despoiled of their goods, he went to Peking. Here occurred his translation of the Pilgrim's Progress into Pekingese. Then came the final choice for this intrepid pioneer and breaker of new ground whether he would go to Shan-tung or to Manchuria. But his knowledge of the needs of the
more northern field led him to go in that direction. Soon after reaching Niu-ch’uang in Manchuria he was taken ill with a cold and fever from which he died, April 4, 1868.

Thus closed the life so fervent and consistent in its devotion to Christ as to leave an indelible mark on two hemispheres, three continents, and many countries. "His grave stands on the borders of the great kingdom of Manchuria, the advanced post of Christian conquests, beyond the northern limits of China. The little mound casts its shadow over many lands, for where is not Burns loved and mourned. But his life is the Church’s legacy, and his indomitable spirit beckons us to the field of conflict and of victory."

*James Addison Ingle*

In the autumn of 1890 Archdeacon Thomson, a veteran of thirty years’ service in China, came to the seminary at Alexandria, Virginia, told of the difficulties and blessings of the work and asked for volunteers. He then put the closing question: "Gentlemen, must I go back alone?"

In his audience was one whose ability and consecrated life had earned from his classmates the title of 'Bishop.' He was the senior student, who had charge of the chapel for colored people near the seminary buildings; a man of large

---

ideals, who was also thoughtful of little things. He had begun to make a path through the soft ground between the seminary and his chapel by using the ashes from his stove each day. A fellow student asked him, "Why do you bother with the path, Bishop; you won't be in the seminary long enough to enjoy it?" "No," was the reply, "but it will always be here for the other fellows." The pathmaker was James Addison Ingle, and as he listened to the old missionary, he saw the opportunity for a pathmaker in the Orient. He applied for appointment to China at a time when the Board of Managers felt unable to increase its financial responsibilities; and in order to carry out his purpose raised his own traveling expenses and a year's salary. Shortly after his arrival at Shanghai, in 1891, there arose a pressing need for a foreign worker at Han-k'ou. He went to this post six hundred miles up the Yang-tzü River, looked over the situation, and decided to undertake the work. Within a year and a half his senior worker retired permanently from the mission, leaving Mr. Ingle in charge.

He had been in China less than two years, and had devoted himself zealously to the study of the people and their language, but still he was lacking in much of the practical experience, which is so large a part of the missionary's capital and so important an element in the missionary's influence. In spite of these disadvantages,
he was left as the only American representative of his Church in the great heathen city in central China.

The condition of the mission was critical. A large number of Chinese had been brought into the Church and needed supervision and instruction. Mr. Ingle was convinced from the very beginning that a church must be self-maintaining, self-disciplining, self-propagating, and began to apply these principles. Self-extension was his first care. Local growth made it impossible for him to wait for a sufficient number of Chinese clergy; and he gathered a few laymen close to him, worked into the very fiber of their lives the story and the motive of the Christ, led them from the old darkness to the new light, and so trained them to become catechists and evangelists to their people. As these men went to live in towns near Han-k‘ou and repeated this process among their brethren, Mr. Ingle went from point to point, meeting the groups of men he had interested. He examined them as to what they had learned, received as candidates for baptism those who had been instructed, explained difficulties, and, when they had been tested and taught for another six months, baptized them.

Extracts from his letters at this time are characteristic of the man: “On a recent trip to Han-ch‘uan,” he wrote, “I had the same sort of weather that we have had almost continuously
since Christmas—steady and heavy rain—but the trip was a pleasant and successful one for all that." Then follows an account of his rapid journey, with frequent stops to hold services, examine candidates, to discipline some and to encourage others, and to stimulate and guide the native catechists and evangelists. The examination of catechumens and even of applicants for admission to their number was no mere formality.

At one station, the wealthiest man in the city and a former military commander of high rank, wished to become a catechumen. He passed his examination, but had two wives and was an opium smoker. He promised to give up and provide financially for his concubine and also to discontinue the use of opium and asked to be admitted at the same time as the others, since the whole city knew of his connection with the Church and he would 'lose face' if he were rejected. Mr. Ingle held to the principle involved and refused the request. His decision was justified. The distinguished applicant stood throughout the service where his own servant was publicly admitted; his courtesy as Mr. Ingle's host was undiminished, and afterwards he fulfilled his promise of amendment and was then admitted into the Church.

Despite every care, modern China, like ancient Corinth, showed that, where new converts are taken directly from heathenism, self-discipline be-
comes a necessary part of the growing Church. Mr. Ingle followed the New Testament practise, and the offender whose sin had brought public shame on the Church was required to make public confession of his sin in the congregation, all the reparation possible, and submit to being deprived of Church privileges. He was obliged to attend the services as before, but must occupy the bench assigned to penitents. In addition, his name, the nature of the offense, and of the discipline imposed was written out and posted in the 'guest room',—the room in the mission open to and frequented by the public. When the offender had served his probation and proved the sincerity of his repentance, the sign was removed and he was publicly declared forgiven and restored. This system was begun and carried out in a loving spirit and with the approval of the native clergy.

The principle of self-maintenance was urged from the beginning. In the new stations the Church services were in the upper room of some Christian's house. Rude benches, Chinese wall scrolls, with Chinese inscriptions, a Chinese table for an altar, and the simplest cross alone marked the room as a church. Mr. Ingle was not afraid to withhold or withdraw financial aid in the interests of self-support. And under him the missions met New Testament conditions and attained a genuine Christian reality.
His consistent attitude toward the humblest catechist is summed up in the following advice to his fellow missionaries: "When you have chosen your men, keep an eye on them. Let them see that you are watching them and do not intend to allow any one to fall asleep at his post. Keep a list of the converts that they have brought in, and now and then call the workers to account for them. It will make them more careful. Don't merely scold them through the deacon, but talk to them face to face. And, above all, teach them. Don't suppose that, because they have been in the Church for years, they know everything. The best of them know little and read less. Meet them regularly in classes; give them lessons to prepare. I believe that the best way to train all workers is by meeting them regularly and intimately out of the pulpit, in classes, best held, I think, in our own houses, where we can act the host as well as the pastor."

In the midst of many details, Mr. Ingle placed the emphasis on the heart of the gospel in his dealings with those under him. One of them writes: "A fellow worker and I had so greatly differed and each so firmly believed himself in the right that it seemed to be a hopeless block to our coöperative work. I told Bishop Ingle of the affair, for I wanted his help in the matter, and I expected him to ask minutely of the rights and wrongs thereof. But not so, nothing was further
from his thoughts. All he said was, 'Doctor, if we foreign workers cannot manage to live together in Christian love, how can we hope to teach the Chinese to live so? Our many differences and eccentricities are for discipline, and serve as our finest opportunities of showing the natives how Christians live together in peace.' And the conversation ended right there. By such methods and with such a spirit, in ten years he built up in central China a strong native Church, well-ordered congregations, with its own native clergy, catechists, teachers, Bible women, and other helpers."

When a new missionary district was created, in 1901, he was made its first bishop. The pleasure of his associates at his election and their abiding affection and loyalty speak well for him and the character of his work. He had just returned from a year's furlough in the United States, during which time he had been traveling and making addresses almost constantly in the interests of his work, and returned to China in no condition to stand the strain of a bishop's life. Ill health was almost constant, but he insisted on keeping at his task of making modern equipment adequate to unprecedented opportunities. He kept his work in mind to the last and the day before he died he sent this message to the Chinese Christians and clergy: "Tell them that as I have tried to serve them in Christ's name while
living, so if God please to take me away from this world, I pray that even my death may be a blessing to them and help them to grow in the faith and love of Christ. May they be pure in heart, loving Christ for his own sake, and steadfastly follow the dictates of conscience uninfluenced by sordid ambitions or selfishness of any kind."

The next day when the end came, he gathered about him the members of his own family and a few of the mission staff, and began to pray in the same clear and rich voice all knew so well. He asked God to look with mercy on the past and to use to his glory all efforts put forth in his name. He prayed for his family, committing them to the care of the Father; for the members of the staff that they might be strong, brave, and united, never fearful or halting in the work committed to them. He prayed for the Church in China and for the Church at home, especially asking that God would stir His people in America to support the work more loyally and generously, giving more men and better men, men rooted and grounded in the love of Christ, to proclaim his gospel and establish his Church in China. When the sad day of burial came, St. Paul's Church in Han-k'ou, where less than two years before the young bishop had been consecrated, was twice crowded, one with a reverent congregation of Chinese Christians, and again with the members of the foreign community.
Out from his church they carried him to the foreign cemetery where his body was to be laid to rest, through streets lined with Chinese, many of them weeping as they realized that no more should they see in this life their friend and bishop.

His influence reached out far beyond his immediate work in China; his statesmanlike ability and his consecration had begun to be felt among the leaders of his Church in the United States, and in China there were many in other missions who recognized his wisdom and efficiency. Dr. Griffith John, of Han-k‘ou, who has been half a century in central China as the representative of the London Missionary Society, expressed the conviction of many others when he said that he was sure that if God had seen fit to spare Bishop Ingle’s life for twenty or thirty years, he would have become one of the greatest missionaries of modern times.

Reinforcements in China’s Uplift

It will be found most convenient in this rapid survey, to divide China’s century of missions into three periods: the first, of thirty-five years, from 1807 to 1842, the close of the Opium War; the second, of thirty-five years, from 1842 to 1877, the date of the first Missionary Conference; and the third, from 1877 to 1907.
In the first period, aside from the leaders already sketched, perhaps the only names that call for emphatic mention are those of the Rev. William Milne, Morrison's able and active associate from 1813 to 1822, and of Dr. Elijah C. Bridgman, the pioneer American missionary. In addition to Milne's notable achievements as educator, translator, and printer, he is to be remembered as an author of exceptional fertility,—one of his smaller productions, "The Two Friends," being still popular and effective throughout China. Dr. Bridgman's enduring monument is made up of the volumes of the Chinese Repository, which he founded and most ably edited from 1832 to 1851, his Chrestomathy, and his other literary and educational work.

In the second period, while the work of Dr. S. Wells Williams reaches back to 1833, it falls mainly in the second period. He followed Dr. Bridgman as editor of the Chinese Repository in 1851, was secretary of the United States legation, and produced The Middle Kingdom, which will probably always remain the standard authority on the Chinese Empire. Dr. Karl Gutzlaff, closing in 1851, at the early age of forty-eight, a life of intense activity and surprising erudition, has as his noblest memorials the Basel and the Rhenish Missionary Societies, formed largely because of inspiration which he gave. As successors of Dr. Morrison in the work of the
London Missionary Society, Dr. Hobson represented the union of medical and evangelistic work, Dr. James Legge made Chinese thought and the Chinese classics comprehensible to English readers, and with him must be linked Dr. John Chalmers.

Alexander and John Stronach, arriving in Amoy in 1844, gave themselves with great earnestness to street preaching, and the latter did much to fix the style of the Bible translation known as the Delegates' version.

Stephen Johnson, Mr. and Mrs. Peet, and Justus Doolittle carried forward the work of the American Board at Fu-chou from 1847; and during the same year Judson D. Collins and Moses C. White began in the same city the mission of the Methodist Episcopal Church, which has since spread so largely over the whole of China Proper. Dr. Stephen L. Baldwin and wife, and the Misses Beulah and Sarah Woolston entered the field in 1857, reinforcing the work of the founders. Virgil C. Hart and wife arriving at Fu-chou in 1866, the next year began at Chiu-chiang the development which is sending its radiance into the three provinces of An-hui, Chiang-hsi, and Hu-pei. Twenty years later they were called to go far up the Yang-tzü valley to reopen the West China Mission, after persecution had driven out the early founders in the wonderful field of Ssu-ch'uan. Finally when re-
covering from broken health, Dr. Hart led, into the heart of Ssū-ch‘uan, the mission of the Methodist Church in Canada.

With the coming of 1842 there was a marked opening of the gateway into China, and the Rev. Walter M. Lowrie, sent out by the American Presbyterian Board, entered Canton in that year. In June, 1844, Dr. D. B. McCartee, of this society, began work at Ning-po, and displayed in his development of the field unusual ability and knowledge of China. Dr. Lowrie also soon arrived at Ning-po, and Dr. A. J. Happer, Mr. French, and Dr. J. G. Kerr were later reinforcements. In 1843, Dr. J. D. Macgowan, representing medical work, began in this center the mission of the American Baptist Missionary Union, which spread widely into the surrounding territory and established a hospital. The Church Missionary Society of Great Britain had here as pioneers the names of Cobbold, Russell, and Burdon.

A brilliant group of printer-scholars are conspicuous among the uplifting workers of China, and not least for splendid and beneficent acquirements shine the names of Medhurst and Muirhead, Lockhart and Wylie, at Shanghai, the last reviewing in his Notes on Chinese Literature over two thousand treatises, and Dr. Lockhart being the first to begin medical work at Peking. Episcopal Mission operations at Shanghai, for
Great Britain and America date from 1844 and 1845, Bishop Boone being the American pioneer. At Shanghai also was built up the great printing and publishing establishment of the American Presbyterian Church, and in this marvelously growing center of eastern China the work of the American Southern Baptist Mission was commenced in 1847, and the year following that of the Southern Methodists.

The survey closes with the third period, from 1877 to the present. Though Dr. Nevius and his courageous wife began service as early as 1853, the most suggestive developments of his work, such as station-propagation, self-support, and training of converts, appeared after 1877. Likewise, the missionary career of J. Hudson Taylor, having its quiet and unnoticed beginnings in 1853, culminated in the amazing breadth and sweep of the China Inland Mission, until at life’s close he laid down its leadership in 1905. Dr. J. Kenneth Mackenzie left the influence of his life and rare devotion in the years from 1876 to 1888. John Van Nest Talmage, the faithful, unheralded worker, built the energy of a lifetime into the mission of the American Reformed Church at Amoy. Griffith John has completed a golden half-century of ideal missionary development, until his name is not only supreme in the great mid-China field, having its center at Han-k’ou, but loved and honored the world
around; while Dr. William Ashmore, of the American Baptist Missionary Union, by more than fifty years of remarkably fruitful service, has indissolubly linked his name with the difficult field of Swatau.

Reviewing in detail the life and the achievements of these pioneers, it is well-nigh inevitable to conclude that they have been men of phenomenal type, especially raised up by God to do the preliminary work. Consider the educational, the literary, the medical, and the evangelistic work actually accomplished by Morrison, Milne, Bridgman, Allen, and Martin; by Williams, Medhurst, and Legge; by Parker, Lockhart, and Kerr; and by Burns, Nevius, Taylor, Baldwin, Talmage, Ingle, John, and Ashmore! The workers die, but the work goes on. A long roll-call of native leaders, like Liang A-fa, enlisted by Milne, and a host of kindred souls in after times, might find here fitting memorial. The representatives of the women’s organizations of the home churches, now penetrating to all parts of the empire, are deserving of widest commemoration. The great army of martyrs, both of missionaries and of native Christians, bearing witness by their blood, in the face of sword and fire and cruel death, have forever consecrated our faith in the eyes of China’s millions. Let us learn, therefore, from this brief survey, what vast results are accomplished by even a few exponents of God’s
Some Living Pioneers
outreaching love, and from a contemplation of the yet greater tasks remaining, what a trumpet-call is sounding for men and women of like spirit with those who have gone before to enter into and complete their labors.

QUESTIONS ON CHAPTER V

AIM: TO APPRECIATE THE CONTRIBUTIONS TO THE WORK OF SOME OF THE LEADING MISSIONARIES TO CHINA

1. Why have modern Protestant missions a greater right to expect to survive than had the Nestorians?
2. What does the success of Corvino and Ricci indicate as to Chinese character?
3. Was there as much need at home in 1807 as to-day?
4.* Compare the discouragements at home which faced Morrison with those of missionary volunteers to-day.
5. What right had Morrison to expect results?
6.* Compare the difficulties that faced him on the foreign field with those of to-day.
7. Compare our encouragements with his.
8.* What sort of preparation should you make for translating the Bible for the first time into the language of a non-Christian people?
9. Ought the first translation to be aimed at the taste of the literary class or that of the common people?
10. Should you think it justifiable to have several different versions of the Scriptures?
11. How should you translate 1 Corinthians IX. 24 for a nation that does not run races?
12.* What precaution should you take to make sure that your translation was thoroughly intelligible?
13. Should you trust non-Christian helpers to give you words for Christian experiences?
14. Name several sorts of literature that you think pioneer missionaries ought to create.
15. What are to you the impressive lessons of Morrison's life?
16.* What advantages has medical work over all other missionary agencies?
17. What illustrations should you use in presenting the gospel to those who had come for medical treatment?
18. Do you think a medical missionary ought to undertake an operation that seemed likely to be unsuccessful?
19. What do you think was the relative value of Parker's medical and diplomatic work?
20. What were Burns' special qualifications as an evangelist?
21.* What things should you keep in mind in trying to master the language for evangelistic work?
22. What are the relative advantages of widespread itineration and work in a single place?
23. Which method do you consider more effective for spreading the gospel, that of Burns or of Bishop Ingle?
24. How were their methods affected by the different circumstances under which they worked?
25.* What sort of questions should you ask of candidates for baptism?
26.* Do you think that Bishop Ingle was justified in so strict a standard of discipline? Give reasons for your view.
27. How large a proportion of your time should you give to the time of training native helpers?
28.* What are the arguments for and against giving them responsibility?
29.* What advantages has the native helper over the missionary as a Christian worker?
30. What principles should you follow in your relations with fellow missionaries in China?
31. What lesson has Bishop Ingle's life for you?

FORMS OF MISSIONARY WORK
And Jesus went about all the cities and villages, teaching in their synagogues, and preaching the gospel of the kingdom, and healing all manner of disease and all manner of sickness.

—Matthew ix. 35.

Missionary effort in China is organized—as is successful missionary work in all lands—in the departments of medicine, evangelistic, literary, and educational work. It is carried on with the purpose of giving every person in the Chinese Empire a knowledge of the gospel as speedily as possible, of leading men and women to a personal union with Christ, of building them up in Christian character, and of creating as rapidly as possible a self-supporting native church.

—J. W. Bashford.

Let us bear in mind that the best methods cannot do away with the difficulties in our work, which come from the world, the flesh, and the devil; but bad methods may multiply and intensify them. For unavoidable difficulties we are not responsible; for those which arise from disregard of the teachings of Scripture and experience we are. Let us also remember that, while in undertaking the momentous task committed to us, we should, by the study of the Scriptures, prayer for divine guidance, and comparison of our varied views and experiences, seek to know what is the best method of work, still the best method without the presence of our Master and the Spirit of all truth will be unavailing.

—John Livingston Nevius.
VI

FORMS OF MISSIONARY WORK

It is too often forgotten that the words apostle, and missionary, although one of them is derived from the Greek and the other from the Latin, are in meaning identical. The Book of Acts shows how apostolic missionary work was done in the first century A. D., and in the twentieth century its essence remains the same.

The process by which entrance was obtained into new regions in China was everywhere substantially the same. The first stage was that of wide and incessant tours of exploration, by means of which a fuller knowledge was gained of the different provinces, and, what was of scarcely less importance, the people became accustomed to the sight of foreigners. The temporary headquarters of the travelers was a boat or an inn. When it was intended to attempt a lodgment, the visits grew more and more frequent and were more protracted. At last the opportunity would come to rent a place of some one hard pressed for money (a class of which China is full), and then trouble would begin. The literati would complain to the magistrate, who would overtly, or
more frequently covertly, encourage opposition until not improbably the bargain had to be annulled.

Sometimes this unequal contest lasted for months, sometimes for many weary years, but in the end the persistence, patience, tact, and unflailing faith of the missionaries always won, even though their open and secret enemies were innumerable and of the highest rank. In one instance of this sort, where an American mission had been again and again mobbed in a provincial capital,—the leader of their opponents being an ex-governor of a neighboring province,—and where it appeared that nothing could be done for them in Peking, the American minister did the foreign office (Tsung Li Yamen) a good turn in regard to a Continental Power, and the Chinese ministers gratefuly offering to make some return were requested to settle up all outstanding cases,—and suitable premises were speedily secured. The men and the women who did this pioneering in the face of howling mobs, often with scarcely a moment of assured respite, are certainly worthy of as much honor as those who first subdued the primeval wilderness of America in the face of hostile Indians. In some instances, however, especially following in the wake of relief in time of famine, mission stations seemed to be opened with very little outward ob-
struction. Yet it was always true that prejudice and passive resistance had to be lived down.

In the early stages of a mission it is almost impossible to trust any one, for one soon learns the accuracy of the generalization in the schoolboy's composition, that "Man is composed of water and of avaricious tissue." By degrees a little corporal's guard of inquirers gathers about, of whose motives it is, however, impossible to be sure, and it may be a decade before the first converts are baptized.

All Protestant missions make large use of street chapels to which everybody is welcome, where maps and pictures are hung, explanations being constantly given of essential Christian truths. By Roman Catholics, however, so far as we know, this agency is nowhere employed. Sometimes a mob collects and loots or destroys the chapel, which sooner or later is rebuilt. After a time it becomes an old story and is then neglected.

Visits to other cities and towns, perhaps originating in invitations from the curious, the impecunious, those having "an ax to grind," or the genuinely interested, gradually lead to the opening of new centers. Colporteurs are sent out with books to be explained and sold, or perhaps loaned, and with tracts to be sold, or in exceptional cases given away. The country is so vast and the population so dense, that to this form of
work there is literally no end. Some one must oversee the budding churches at a distance, and thus a system of itinerancy grows up. Meanwhile, the handful of baptized Christians, the inquirers, and the adherents will not improbably be persecuted, at first perhaps in small ways and then often with bitterness, being expelled from the clan, denied the use of the village well, and otherwise boycotted. Such persons must be looked after, advised, and encouraged. Thus there is evolved the work of a missionary bishop or superintendent.

At times the colporteurs and some of the more receptive inquirers are gathered into classes and given fuller instruction, forming the germ of a theological seminary, into which it sometimes develops. Here and there one more intelligent than the rest acts as a volunteer preacher, perhaps forsaking, or it may be retaining his former occupation.

Work for women by women is an integral part of an effective mission station in China—or indeed anywhere. This is begun and carried on under even greater hindrances and disabilities than other forms of work, because in China there is no precedent for the traveling about of unmarried women, whose position at first inevitably exposes them to misunderstanding if not to insult. Yet in the northeastern part of the Chiang-hsi province there is a whole chain of China Inland...
Mission stations "manned" altogether by ladies, and this in cities where at the time no man could have got a foothold, and when there were none available. Native pastors superintend the flock, which is visited at certain times by the provincial superintendent. In another instance, where ladies had begun a work in a far western province, the local magistrate when asked to drive them out replied, "What does it matter? They are only women!" But at last through a broken-down opium smoker, a class to whom missionaries owe much, a shabby place was secured. Amid great discomfort, with a total absence of privacy, and with constant swarms of curious and unsympathetic spectators, the next stage of the struggle was entered upon. When foreign ladies dress in Chinese costume some of the incidental disadvantages are diminished, but the all-prevailing Chinese suspicion is difficult to allay. A Chinese woman once remarked of some missionary ladies whom she had come to know a little, that they seemed to be very good people indeed, with only one defect,—they did not worship any gods!

Chinese women can be effectively reached only by women. The instruction of the converts is most essential, yet owing to their poverty, the pressure of domestic cares, the servitude to old-time custom, and the demands of their parents, husbands, children, and relatives, it becomes an
exceedingly difficult task. Women's classes even if held for but a short period afford valuable opportunities for instruction, the development of Christian character, and particularly for that social fellowship of which the lives of most Chinese women are painfully destitute. Many firm friendships are thus formed, and in these modest processes of Christian culture much admirable talent is often developed.

One of the distinct benefits which mission work brings to China is the object-lesson (all the more impressive because incidental and inconspicuous) of a Christian home, and Christian training and education of children. The second and third generation of converts have in this way received an impulse to introduce a new domestic life, the value of which is beyond estimation. The touring of women in the interior, though at first difficult and sometimes dangerous, is often an important part of their work, as soon as little companies of Christians begin to be collected in outstations.

A well-equipped mission station will have a dispensary and a hospital, the resort of thousands from near and from far. Multitudes refuse to come until their sufferings are intolerable and often incurable. Some come only to die, which in the earlier stages of the work may cause trouble—perhaps even riots. Medical tours furnish large opportunities for the promotion of
friendly feeling, and for extending the missionary sphere of influence. Nowhere is the missionary more in harmony with the command and the example of the Master than when, as he goes, he preaches and heals the sick. As a means of dissipating prejudice, the great advantage of the medical work is that it is a permanent agency (the sick, like the poor, we have always with us); that those who come, do so of their own accord, and for an object; that they are influenced at a most susceptible time; that a single patient may not improbably communicate his good impressions to many others while under treatment, and to a much larger number after he is discharged. The constant observation of the unselfish and unwearying fidelity of the Christian physician cannot fail to attract even the most unimpressionable Chinese, for he has never in his life either seen or heard of anything like it. Countless outstations have been opened through the direct and the indirect result of medical work. The opportunities of the evangelistic missionary physician and of the hospital chaplain are unexcelled.

In addition to other medical work, special attention is often paid to the opium habit. Opium smokers are the most hopeless class to be found in China, because, not only has their physical vitality been undermined, but their moral power as well, leading at last to a complete paralysis of
the will. Opium, unquestionably the greatest curse of the Chinese race, has probably done more to destroy it than war, famine, and pestilence combined. In the province of Shan-hsi it is a common saying of the Chinese that "eleven out of every ten" are smokers, even women using it, and their infant children being lulled to sleep with the noxious drug. Yet even there some of the best Christian workers have been reclaimed from a condition apparently hopeless.

The woes of Chinese medical treatment bear with special hardship on Chinese women. Their physical miseries are beyond estimate. The presence of an educated Christian medical woman in the sick-room, wise and winning, strong and sweet, is one of God's best gifts to China. It is an interesting circumstance that, in the city where Protestant missionary work was first attempted, after the lapse of almost a century (1903), the first woman's medical college in the empire was opened, under the care of Drs. Mary Fulton and Mary Niles, with a class of thirteen, and more applications than could be received. The career open to the medically educated Chinese young woman is one of great promise and vast possibilities.

The kindergarten has made its appearance late in China, but it has come to stay. It is as yet seen at its best in Fu-chou. It is encouraging that the Chinese themselves, with the assistance
of Japanese teachers, have adopted and are more and more introducing the system. As a means of utilizing a period of child life which the Chinese have for the most part allowed to run absolutely to waste, and as a means of attracting immediate attention and commendation on the part of uninterested and perhaps semi-hostile outsiders, the kindergarten has perhaps no rival.

In the mission station there will usually be established at an early stage a school for boys. The first pupils are any who can be got, but at a later period they will be mainly or wholly from Christian families, studying under a Christian teacher Christian books, as well as the Chinese classics. These rudimentary beginnings will probably develop into a well-graded system of instruction, terminating in a thoroughly equipped college. In one station a Manchu lad, virtually a beggar, was picked up by a kind-hearted lady and educated, becoming a teacher and a preacher, the little school meanwhile passing through the evolutionary process just mentioned.

Parallel with the education of the boys, but until lately at a great distance to the rear, runs the education of Chinese girls, without which there can be no true balance in the Church or in the home. The beginnings were generally small and often most discouraging, yet when the notion is once grasped that girls have as good minds as boys, and especially when it is comprehended
that even money-wise, it is in the end a good investment to teach them, the most conservative Chinese begin to give way. The recent change of front in the most advanced parts of China in regard to the education of women has brought the Christian girls' schools and colleges into a prominence which a few years ago would have been considered impossible. They are an essential factor in the coming Christian regeneration of China.

One of the most interesting and hopeful forms of work for Chinese women is the training school, into which the pupils—for the most part married women—are taken for a series of years, and, as in other schools, with fixed terms and vacations. Their studies result not only in a general familiarity with the Old and New Testaments, with special reference to imparting their knowledge, but perhaps also involve an acquaintance with outline geography, and the fundamental rules of arithmetic. They are thus enabled to keep their own accounts, and they readily command the respect of those with whom they come in contact. It is often a part of the plan to send these future Bible-women out into actual work for a year, with an experienced companion, to test their adaptedness to their new responsibilities, the like of which have never before been seen in China. These training schools have as yet been more fully developed in the Fu-chien province than
elsewhere, but in time they must become universal. China will never be profoundly affected until its women have been profoundly affected. For the achievement of this end, perhaps no agency more important than training schools for Christian women has ever been devised.

In a country with such highly skilled artificers as China, industrial education is conducted under much greater difficulties than elsewhere, particularly in the case of boys. In a few places these difficulties have been partly overcome by the introduction of improved looms for weaving, and also by other industries such as carpentry, basket-making and the like. Pupils in girls' schools sew, spin, weave, make drawn-work, lace, embroidery, and a large variety of articles knit with wool. The Roman Catholics, who as a rule are excellent practical managers, have always made a specialty of industrial work in varied forms. Protestants might learn much from them in all these directions.

The doubts which have sometimes been entertained, as to the wisdom of laying so much stress upon education as most American missions have always done, may be said to have passed away. The development of colleges rounded out the educational system of American missions at a time when the very conception of such institutions was alien to Chinese thought. Now that the government is opening them on a large scale,
they become more than ever a necessity for Christians. The oldest missionary society in China, long reluctant to do so, has recently begun to establish advanced schools. Christian youth who hold fast to their faith, equipped with a knowledge of what China has inherited from the past, as well as with the best which the West has to bestow, are indispensable for the renovation of China. In their education there are great dangers and immense possibilities.

Every missionary in every land is under obligations to the Bible societies which provide for the translation, the publication, and the distribution of the Scriptures. The British and Foreign Bible Society, which was founded in 1804, at once directed its attention to China, but its plan to publish a translation of a part of the New Testament found in the British Museum (the one used by Robert Morrison) was relinquished when it was ascertained that it would cost ten dollars a copy, and that no means existed of circulating it among the Chinese. In 1810 the society printed a translation of the Acts, by Mr. Morrison, and from that time to the present its activity has never ceased. It has published many versions in the literary style, in the mandarin, as well as in thirteen distinct local dialects, four of them printed in roman letters, as well as in the Chinese characters, while in two dialects editions have been prepared for the blind. It has
ST JOHN'S UNIVERSITY, SHANGHAI

NORTH CHINA UNION COLLEGE, NEAR PEKING

PEKING UNIVERSITY
also issued the Bible in Mongolian (two versions), in Kalmuc, and in Tibetan.

The system of agencies, sub-agencies, colporteurs, and Bible-women (of whom for ten years the average number has been thirty) constitutes a vast business enterprise, covering every part of China. The total circulation of Bibles, Testaments, and portions, from the beginning of the society's work to the end of 1905, was 13,245,263 copies, and it is worthy of notice that the increase in the last decade (5,200,908) was but little short of the total circulation for the first eighty years. This fact suggests the immense influence which this single instrumentality has exerted and is now yet more exerting for the regeneration of China.

The American Bible Society appeared in China soon after the first American missionaries (1834), and like its companion has been active in providing the Scriptures for the Chinese, and in circulating them widely. Its direct issues for 1905 were the largest of any year since it began work in China, amounting to 625,852 volumes, more than 98,000 in excess of any previous year. The Scotch Bible Society, organized much later than the others, is more free than either of its colleagues in allowing its colporteurs to sell Gospels and tracts together, and in circulating editions of the former with copious and much needed annotations.
The work of the Bible societies is fitly supplemented and complemented by that of the numerous tract societies, the principal ones having their roots in and receiving their nourishment from the great Religious Tract Society of London and the American Tract Society. The organizations having this work in hand are centered in Shanghai, Han-k‘ou, Fu-chou, and other ports, as well as in Peking, and in remote Ssü-ch‘uan. The field of the larger of these societies is not merely China itself, vast as it is, but the whole world, wherever the Chinese have emigrated. The proportional increase in the book circulation of some of these societies is quite equal to the growth of that of the Bible societies just mentioned, while the Christian periodicals which they publish are essential to the healthy development of the native Church.

The Christian Literature Society, at first called by a different name, was the outgrowth of the work of an able and a far-sighted Scotchman, Dr. Alexander Williamson, a man of broad gage, and wide influence, who prepared many valuable books. At his untimely death in 1891, Mr. Timothy Richard took the helm of the organization, which aimed to reach and to influence the intellect of China by translating the best books available, and also by the issue of an influential high-grade monthly magazine called The Review of the Times, edited by Dr. Young J. Allen. Both
Dr. Richard and Dr. Allen have produced a large number of important works which have been read in every part of the empire. The Society publishes also a monthly magazine for Christian readers, as well as a weekly paper, started by the Rev. Wm. A. Cornaby. The range of topics included in its book translations is wide,—religious, historical, biographical, scientific, anthropological, with works on comparative religions, and Bloch’s *Future of War*. In the absence of a copyright law Chinese publishers have paid the society the sincere compliment of pirating its works as soon as they appear, and upon a large scale, a practise which, while interfering with the financial receipts, unquestionably helps to carry out the object of the society to diffuse knowledge and light.

The great streams of Christian literature could not have been circulated without the aid of many mission presses, of which the largest is under the American Presbyterian mission at Shanghai. It has been furnishing Scriptures and Christian literature for the Chinese at home, as well as for Chinese scattered all over the world. This great institution has poured forth Bibles, Gospels, books, tracts, and magazines, sometimes at the rate of 90,000,000 pages per annum. The consolidated mission press of the American Methodists is also in Shanghai, and others are to be found in various parts of China, many of them
overworked and all of them busy. By their aid, the romanization of the dialects of China has been made effective in bringing to millions who can never learn to read the complicated characters, knowledge which else would have been unattainable. The same plan is now adopted with the widely spread mandarin, although under special difficulties and as yet with but partial success. It is a remarkable fact to which the Chinese are not as yet awake, that practically all the labor expended to make their language more serviceable to the needs of the people owes its origin to foreigners.¹

The first missionary conference appointed a committee to prepare text-books for schools. At the second conference further steps were taken which resulted in the formation of the Educational Association of China. This has been an important agency in unifying the action of those engaged in educational work, both by its publications, of which it has a considerable list, and by the discussions and action at its triennial meetings, of which the fifth was held in Shanghai in May, 1905. It is important in the present condition of education in China that this Association should have a permanent secretary and greatly extend the scope of its activities.

¹Within the last two years, however, a system of initials and finals represented by arbitrary characters has been invented by a Chinese scholar, and by its aid many have learned to read in a wonderfully brief period.
The new conditions in China have opened to missionaries many avenues of influence heretofore closed. Public addresses on subjects now of general interest have become widely popular from Shanghai to Ssū-ch‘uan, and from Canton to Peking. In the latter city a chapel of the American Board has for some time been used as a lecture hall, at which, on different days, both men and women have been instructed in current events, and many other topics, such as history, geography, hygiene, coal, and education. Princesses have attended these lectures, and one of them, the wife of a Mongol prince, gave an account of her tribulations in trying to introduce the education of girls among the Mongols, illustrating her success by exhibiting several of her pupils. A Manchu duke, a nephew of the empress dowager, gave an address on filial piety. The editor of a Peking daily and the editor of a Chinese woman’s journal, herself deeply interested in the subject, have given lectures, and have commended the plan in their papers. As an opportunity to reach the hitherto inaccessible but now intellectually alert higher classes, these openings are invaluable.

A cognate but more permanent form of influence is that of museums combined with lectures. Probably the best example of this is found in the work of the English Baptist Mission in Shan-tung. Nearly twenty years ago
this was begun in Ch'ing-chou, and more recently on a far larger scale in Chi-nan, the capital. The buildings are throughout Chinese in style. A model of a foreign cemetery affords opportunity to explain Western ideas as to regard for the dead, without attacking (or even mentioning) ancestral worship. Models of St. Paul's Cathedral, the Capitol at Washington, and other famous structures convey a realistic notion of Occidental architecture. Stuffed birds, animals, mounted fishes, huge globes, orreries, electrical machines, model railways, and dredging machines silently dispel darkness and prejudice. Large colored charts, showing for different countries their relative railway mileage, tonnage of merchant vessels, the output of gold, silver, iron, coal, and other products, in all of which China is represented only by a thin yellow line at the bottom, convince as arguments could never do. A young Confucianist, who came to scoff, retired after a protracted visit to remark to his uncle (an official): "Why, the only thing that China is ahead in is population!" This important institution, which from its inception has been under the charge of the Rev. J. S. Whitewright, has in the course of twenty years received more than a million visits, of which 247,000 were made during 1906. No better way of attracting educated and official China has ever been devised.
The great famine, which in the years 1877-78 overspread all the northern provinces of China, proved to be a wonderful opening through which to pierce the rough and forbidding exterior of Chinese prejudice. A large staff of missionaries, with a few from the customs service, personally administered the funds in the distressed districts. Four missionaries died of fever and overwork, one of whom was honored by the governor of Shan-hsi with a public funeral. In the famine of 1907, which affected about 4,000,000 persons, missionaries again rendered heroic service. Famine relief unostentatiously and wisely conducted proves a golden key to unlock many closed doors.

Asylums or villages for lepers have been established in five different provinces, where excellent work has been done. There are eight orphanages (one of them in Hongkong, but conducted by missionaries to the Chinese) caring for a great number of children—mostly girls. Eleven schools or asylums for the blind—the best known being that of Mr. Murray in Peking—are working what the Chinese justly regard as daily miracles, rescuing from uselessness and worse a class hitherto quite hopeless. A school for deaf-mutes conducted by Mrs. Mills in Chefoo, is an object-lesson in what may be done in that wide field. An asylum for the insane begun under great difficulties by the late Dr. J. G.
Kerr at Canton is likewise a pioneer in caring for a numerous but hitherto neglected class.

The plan of organizing the young people has been adopted by nearly every mission in China. It is recognized as a most useful method of training new converts to become strong and aggressive Christians. For large conventions the Chinese have an especial aptitude. As an evidence to the world of the earnestness and the enthusiasm of the body of young Christians and as a stimulus to the spirit of unity, great gatherings are quite as impressive as in the United States and Canada and much more valuable.

In response to invitations representing the missionary body, the Young Men's Christian Association entered China in 1895. Since its inception it has made rapid progress both among the young men in the cities and among the students in the institutions of learning. In the larger Chinese cities the Young Men's Christian Association has a peculiar value as a middle-ground between Christians and influential non-Christian Chinese, who are often quite ready to become associate members, assisting with friendly counsel and with financial backing. In Christian schools the association combines Christian students into a compact organization with wide affiliations. It affords an opportunity for the expression of the personal Christian life of the student, and gives scope and training for aggres-
sive work. It organizes and stimulates Bible study, and brings to every individual the call to service for others. In wholly non-Christian institutions where no other avowedly Christian influence could penetrate at all, the Young Men's Christian Association has sometimes been welcomed as soon as it was understood, for its social and its moral advantages. In these directions it has in China an unlimited field for usefulness.

In view of the completion of a century of Protestant missions, the Canton Missionary Alliance has undertaken to collect funds to the amount of $100,000 for the erection of a building which is to be under the charge of the Young Men's Christian Association of the port in which Protestant mission work was first begun. There are at present 27 foreign and 15 Chinese secretaries engaged in the China work.

At the urgent invitation of the National Committee of Japan, work was begun by the secretaries of the Chinese Young Men's Christian Association (and others) among the 16,000 or more Chinese students in that country under somewhat abnormal and morally perilous conditions. This has been conducted by relays of workers from China, both Chinese and foreign, developing with great rapidity and with many signs of promise of large and permanent usefulness, since these students must eventually occupy influential positions in their own land. Many
hundreds of them have attended the classes, and not a few have openly avowed their determination to live a Christian life.

The Young Women’s Christian Association has but recently reached China, and has at present three representatives. The first of these (Miss Martha Berninger) began work among the women and girls employed in the numerous steam-mills in and about Shanghai. The number of such operatives is estimated at more than 30,000, and, including those working in match factories, and other trades, may reach 40,000. Several Young Women’s Christian Associations already exist in schools for girls, which will be developed upon lines similar to those of the Young Men’s Christian Association.

A variety of religious organizations have passed the pioneering stage, and are now firmly established. Notwithstanding the reform movements, Christianity still remains the indispensable agent for the adequate mental, physical, social, moral, and spiritual renovation of China, touching the nation at every vital point. Diplomacy and commerce have limited fields and narrowness of purpose; while Christianity, being many-sided, has unlimited scope for its multiplied activities, and has for its objective the strengthening of every weak spot in the equipment of the Chinese.
QUESTIONS ON CHAPTER VI

AIM: To Realize the Challenge to the Church to Make the Most of the Agencies That Have Been Created

1. Has the work of foreign missions fulfilled its duty to a Chinese when it has proclaimed the gospel to him?
2. To what extent is it responsible for influencing his attitude?
3. If your brother were not a Christian, should you consider your duty to him discharged when you had once plainly stated to him the way of salvation?
4. Have foreign missions fulfilled their duty to a Chinese when he has professed conversion?
5. * When is the work of foreign missions considered to be complete in any country?
6. By what persons do you expect the bulk of the Chinese race ultimately to be led to Christ?
7. * How ought this expectation to affect our methods of work?
8. * Why are results so small in the first stages of missionary work in any country?
9. In your opinion, what agencies exert in Christian lands the greatest power in developing Christian growth?
10. How many of these agencies were present in the first period of mission work in China?
11. What do you estimate as the relative amounts of Christian influences then in circulation in China and in Christian America?
12. Describe the methods that the evangelistic missionary uses to present the gospel to the people directly.
13.* Sum up the principal obstacles that he has to encounter at first.
14.* How should you begin your address to a curious crowd in a street chapel?
15.* How should you treat those who professed interest?
16. What is the special value of training schools for women?
17. Arrange the agencies for overcoming prejudice in what you consider the order of their importance.¹
18. What general rules should the evangelist follow in order to overcome popular prejudice?
19. What is the special value of schools for the blind?
20. Are foreign mission boards justified in maintaining such institutions as asylums for the insane?
21. Arrange in what you consider the order of their effectiveness the agencies for presenting the gospel.
22.* What are the relative advantages of itineration, hospitals, and boarding schools, as agencies for presenting the gospel?
23.* How should you conduct a hospital and dispensary to make it of the greatest spiritual value?
24. Which three agencies do you think contribute most to the edification of converts?
25. Which three count for most in training workers?
26.* Which agencies will help the native church most in the matter of self-extension?

¹ To answer such questions to the best advantage a list of the agencies should be written out, so that they can be all under the eye at once.
27.* Which most in the matter of self-government?
28.* Which most in the matter of self-support?
29. Does the multiplication of methods of work that we have in Christian countries seem to you to be necessary?
30 Have we all the methods which you think we ought to have?
31. If this variety of method is necessary at home, ought we to expect to build up a strong Christian Church in non-Christian lands without it?
32. How ought we to expect the results of missionary work before these agencies have been created to compare with results afterwards?
33. What responsibility does this lay upon us to see that the agencies are maintained in effective operation?
34.* If you had $10,000 to invest in some one form of mission work in China, where should you place it at present to secure the greatest good?
35.* If an all-round man just graduating from college should ask you how he could be of most use in China, what should you tell him to do?
36.* What should you tell an all-round woman under similar circumstances?
37. How much money and how many volunteers do you think could be profitably used in China just now?
38. What call does the variety of present opportunities for service in China bring to you?

MISSIONARY PROBLEMS
The work of reform upon which China has entered is a herculean one. Many well-informed foreign observers predict that the movement will break down and the reaction will bring the country back to its ancient conservative ways. There are no doubt many obstacles in the way of success. The Chinese are attempting to bring about in government and society in a very few years what it required centuries for the Anglo-Saxon and other European races to achieve. When that day arrives there will be a new alignment among the great powers of the earth and new features introduced into politics and society, not for the hurt, I trust, but for the betterment of humanity. On that day we shall comprehend more fully the great truth proclaimed on Mars Hill 2,000 years ago, that "God hath made of one blood all nations of men to dwell on the face of the earth," and that all races are entitled to equal treatment in law and government.

—John W. Foster.

In our present position of missionaries representing different branches of the Church, closely related to one another in a common work, our methods simple and presenting many points of agreement, and our different systems of organization in a rudimental, undeveloped state, should we not make use of our opportunity to avoid as far as possible in the future the divergences which impair the unity and efficiency of the Church at home, retaining and perpetuating a degree of uniformity and cooperation which in Western lands seems impracticable? Is it not our duty to do this? Would it not be in accordance with the express teaching of our Savior and also with the wishes of most of those whom we represent? Would it not have a decided influence for good on the home Churches?

—John Livingston Nevius.
MISSIONARY PROBLEMS

The treaty rights of Chinese Christians are among the most pressing missionary problems. The American and the British treaties of 1858-60 contained a toleration clause (to which the Chinese offered no objection) in these terms: The religion of the Lord of Heaven and of Jesus Christ (Roman Catholic and Protestant) teach men to practise virtue and to do to others as men would be done by, and all persons shall be free to preach and practise these religions without molestation or interference. From the first, there were two views as to this article: first, that it was a great step forward analogous to the legalization of Christianity in the Roman Empire and an impressive testimony to the great principle of religious liberty; and, second, that it was from a political standpoint unwise, and not only of no real service to the interests of Christianity itself, but probably injurious. "The question of religious toleration," it is said, "is degraded by being thrust into the text of a treaty of amity and commerce, where it ranks equally with a provision for the opening of a new market or for the
fixing of a customs tariff. Above all, is such a question out of place in a convention dictated at the point of the sword.” What was theoretically secured by this article was the right of missionaries to preach Christianity to the Chinese, and that of the Chinese converts to accept it. But these rights, unlike others in the same treaties, are left undefined and without provision for enforcing them.

As in the Roman Empire, so in China, the introduction of Christianity brought disturbance of existing conditions. Every Chinese Christian was *ex officio* a nonconformist, but not to conform is to antagonize antiquity and to invite abuse. The clan system and the complex family life of one of the most litigious of peoples greatly increased the difficulty. Cases of persecution constantly sprung up, many of them very real and very distressing. If the missionary appealed to his consul, at best the matter was referred from one official to another, often nothing being done beyond the issue of an empty or semi-hostile proclamation which aggravated the trouble. If, as occasionally happened, the case was put through with vigor, while “justice” triumphed, a new set of antagonism to the foreign relation was aroused. In China it is always difficult to be sure of one’s facts in regard to any particular case. At last perhaps truth timidly emerges—but *never* the whole truth. Christians at times
used their new position to pay off old scores; at others, old scores paid off to Christians appeared in the guise of persecution. If the foreign shepherd did not act, he was certain to be reproached by his sheep as indifferent to the fate of the flock. Indeed, to sit passively when his converts were being outraged and sometimes murdered with Oriental barbarity was a moral impossibility. Yet if he interfered it was impossible to forecast the consequences. Doubts of the sincerity of the government and its officials have frequently made it difficult to be sure of any position. Imperial edicts may indeed be issued, ordering complete protection for both missionaries and converts, but perhaps accompanied, or followed, by confidential instructions not to carry them out.

One of the present mission problems in China is the adjustment between the East and the West. The effect of Japanese success in the war with Russia was at once felt in China. The cry of "China for the Chinese" was not a new one, but now it has a new meaning. The boycott of American goods which began a few weeks later was both an effect and a cause. Many young lads in American schools, fired with the new spirit, went out on a sympathetic strike, because the Chinese had been ill-used in America. There had indeed for some time been in all schools, governmental, private, and missionary
alike, an impatience of control, and a readiness to make demands, whether for better food, better accommodations, the remission of punishment, or the dismissal of an unpopular teacher, which was at once novel and ominous. In Shanghai an Independent Chinese Church appeared, asking for official recognition, in itself an excellent thing, for too much dependence on the foreigner has been a great evil, although the new move is not without its perils. A determination to establish the independence of the churches will be a great incentive toward overcoming the difficulties of self-support. The growing desire of the government and of the people to eliminate all foreign influence, renders the situation of those who conduct mission work one of increasing delicacy, requiring the wisdom of the serpent and the harmlessness of the dove.

Since 1900 the situation has materially improved. Friendly relations with local officials have done much to smooth the way, while the growing discrimination between the Roman Catholics and Protestants, and the wide recognition of the high aims and the good work of the Church have been of great service. Had the complex difficulties involved in the bestowal of rights without the means of enforcing them been foreseen, Protestants might have refused the doubtful advantage. But the public sentiment of Christendom would have refused to thrust
CHANG CHIH TUNG

TWO OF CHINA'S GREATEST VICEROYS

YUAN SHIH KAI
Christianity in the nineteenth century back into the baleful situation of the first century. Whenever the Chinese appoint just magistrates, not to be turned from the right by outside pressure, these difficulties will cease. Until then they will constitute a painful and a persistent problem.

A further problem is that of education. The new departure of the Chinese government in educational lines has put an end to the practical monopoly of Western learning on the part of mission schools. Free tuition, and sometimes the payment of most or of all other expenses by the State, would seem to make competition hopeless; but from the absence of true normal schools, and from many other causes, the teaching standards of the former must for some time remain below those of the latter. The worship of Confucius in many government schools excludes, and is intended to exclude, Christians. In the government schools especially there is a strong impulse to meddle with public affairs, not only by free discussion, but by sending telegrams direct to the foreign office (an unheard of thing in the past), suggesting and protesting. In a recent instance a large body of Shan-hsi students demanded the cancellation of a mining concession formerly given to an Anglo-Italian syndicate. One of their number threw himself into the ocean and drowned himself as a gentle protest, thus becoming a martyr whose fame is now celebrated
and in whose honor fiery resolutions are passed. There is a constant and an increasing danger that young Chinese reject the moral teachings and the wise restraints of the past, and drift into a theoretical skepticism combined with an epicurean license. Many of the 16,000 students at present in Japan return with an imperfect knowledge of that language, a smattering of many branches of learning, their self-conceit established and their morals undermined.

One of the chief perils of China at present is from its national sophomore class, unbalanced by any juniors, seniors, or graduates. There is danger of putting Chinese studies too much to one side, thus to some extent denationalizing the student. It is easy to educate young Chinese so that they will be dissatisfied with the comparative ignorance and lack of ideals of their homes, while yet without an equipment for aggressive work, and with no taste for self-denial or service to others. The abounding opportunities of well-educated young men and young women make it difficult to retain their services in the Christian Church, where they are indispensable. Infinite patience and consummate tact are required to meet these new educational problems of China.

There is also a problem of literature. Times have changed since two generations ago a Chinese Governor-General was captured by the British
and taken to Calcutta. Being asked on the voyage why he never read anything, he replied that all the books in the world worth reading were already stowed in his abdomen (memory). In a paper read at the meeting of the Educational Association of China in 1905, Mr. John Darroch called attention to the rapid changes taking place in the hitherto fossilized literature of China. In the previous year there were more than 1,100 new publications in the fifty-five book-shops of Shanghai, and many new books each month. A single firm, the "Commercial Press," employed 350 men in its printing department, and 20 in lithographing; with branch establishments in Canton and Han-k‘ou and agents all over China, and with expenditures of about $7,000 per month. In a single year fifty-seven novels were issued, including translations of Uncle Tom's Cabin, Treasure Island, Memoirs of Sherlock Holmes, Voyage to the Moon, and Tales from Shakespeare. Darwin's Origin of Species, Mill's Essay on Liberty, Spencer's Evolution, and the essays of Rousseau, Montesquieu, and especially Huxley are displayed in the shop-windows. In 1904, there were forty Christian and a hundred non-Christian periodicals. Under these revolutionized conditions there is a necessity for a much more extensive and varied Christian literature than exists, and also for far more apologetics and general works than have ever been pro-
duced. The universe and its complex phenomena, the history of mankind, and indeed all branches of knowledge should be presented from a Christian point of view to forestall and to counteract the agnosticism more and more widely prevailing in China. It is especially desirable that an increasing proportion of this work should be done by the rising race of Chinese Christian scholars. Such in brief is the problem of literature in the new China.

Then there is the problem of the relations with Roman Catholics. It is probably difficult for a Protestant to do full justice to Roman Catholic missions in China, because he cannot adopt their point of view. Matteo Ricci, perhaps the ablest man which that Church ever sent to China, effected his entrance and continued his residence in China by deceit, in accordance with the doctrine that the end justifies the means. On the same principle, the Father who was interpreter to Baron Gros in negotiating the French treaty of 1860 interpolated in the Chinese version four clauses not found in the (authoritative) French text. Of these the first two resembled the toleration clauses of the American and British treaties, the others authorized the punishment of those who persecuted Christians and conferred upon French priests the right to rent land and to buy or build houses at pleasure in any part of China. Although this fraud was soon detected, it was
strangely enough never objected to by the Chinese government.

After the Tientsin massacre (1870) the Chinese foreign office presented to the foreign ministers a memorandum in which complaints were made against the Roman Catholic Church of constantly interfering in law cases, of admitting and protecting bad men, of harsh enforcement of the provision for restoring property anciently in the hands of the Catholics, and of the unauthorized assumption on the part of the missionaries of official rank with its insignia and privileges. By the pressure of the French legation, the Chinese government nearly thirty years later was induced to confer this official rank upon the bishops and priests. The former ranked with the governor of a province and were entitled to demand an audience, the latter becoming the equal of officials of a lower rank, also having the right of audience at any time. Being obliged to make this concession, the government would doubtless have preferred to extend it to Protestants also, but the latter with unanimity refused it.

During the Boxer persecution the Roman Catholics suffered bitterly, but when the tide turned enormous indemnities were extorted, begetting much ill will. Friction in widely separated parts of China has continued to increase ever since. In 1905 a magistrate in Nan-ch'ang (the capital of Kuang-hsi), in despair of ad-
justing Catholic claims, committed suicide, which brought on a massacre in which not Catholics only but Protestants were murdered, and all China was thrown into a fever of excitement. As a rule the bishops are approachable and even friendly, and so also are many of the priests, but the latter are not infrequently deceived by their followers, many of whom, armed with the prestige of an irresistible corporation, use the Church for private ends. During the current year (1906) practical war has existed between Roman Catholic and Protestant Christians in the sub-prefecture of T'ai-chou, in the Chê-chiang province, each side accusing the other of lawless aggression, to the scandal of both Churches, and the disgrace of Christianity in the eyes of the peace-loving Chinese, who are obliged to send soldiers and a commission of high officials to investigate and to endeavor to adjust the quarrel. It has been previously pointed out that the course of the Catholics in China is morally certain to provoke reprisal whenever the government and the people feel strong enough to deal with them. By what means the present difficult situation is to be met in accordance with righteousness, and yet in the spirit of that charity which never fail-eth, is another one of the problems of China today.

Still further, there is the problem of comity and federation. It is a common error to sup-
pose that because Protestant Churches are working in China under many different forms, the Chinese are bewildered by their diversity. The truth is that the Chinese are accustomed to a wide range of variety in unity, as is illustrated in their own religious sects, where is found, in their own phrase, "resemblance large, difference small." When we hear that there are more than seventy organizations, with missionaries from America, and from six countries in Europe—those owning British allegiance representing England, Ireland, Scotland, Wales, Canada, Australia, and New Zealand—the magnitude of the Chinese Empire should not be overlooked. Unless, as rarely happens, there be some mutual antagonism, it is not the number of societies which causes embarrassment, but the absence of inter-relationship. Considerable progress has been made in this direction, but the problem is still far from solution.

By federation is meant such a coördination of individual units into a larger whole as to promote efficiency. The total destruction of all mission plants in northern China in 1900 made this more practicable there than elsewhere. The American Board, the American Presbyterian, and the London Missions have united in a Union College at T'ung-chou; a Union Woman's College, and a Union Theological Seminary in Peking; while these three missionary organiza-
tions, as respects medical work, are united in the Union Medical College of Peking, much the most important institution of its kind in China. In Shan-tung the American Presbyterian and the English Baptist Missions join in a union college at Weihien, and a union theological seminary at Ch'ing-chou, and are about entering upon a joint medical work in the provincial capital. In central China two American Presbyterian societies have likewise organized a union theological seminary at Nanking. The missions of the American Baptist Missionary Union and the Southern Baptist Convention have done the same in central China and have also unified their publication work throughout China. Two American Methodist societies have a common publishing house in Shanghai. The missions of three societies are planning to unite their educational work in Nanking. Similar plans in other provinces are under consideration. Steps have been taken to combine eight different branches of the Presbyterian Church in China,—English, Irish, Scotch, Canadian, and American,—into groups of synods, with the prospect in the future of one General Assembly for them all.

Still another problem is the unoccupied field. Notwithstanding the advances of the Church thus far, vast stretches of territory occupied by millions of inhabitants are scarcely touched. The magnitude of the problem numerically seems
well-nigh insurmountable. The province of Ssū-ch’uan having an area nearly equal to the province of Ontario and a population almost thirty times as large, has less than three hundred missionaries. Ho-nan about the size of Missouri, with a population equal to nearly half of the United States, has only a trifle over a hundred workers; and Hu-pei, with a population larger than that of England, has less than three hundred missionaries. Kuang-hsi, with an area equal to North and South Carolina and a population about equal to Canada, has scarcely more than fifty messengers. Shan-tung with as many people as France has about three hundred workers. Kuang-tung and Chiang-hsi have a population equal to Germany, and together they have less than six hundred missionaries. There is also the vast hinterland of dependencies, only the outskirts of which have been touched by Christian workers. China with its 400,000,000 of people has approximately 4,000 missionaries. If each missionary could preach to 1,000 different persons every week it would take two years to present the gospel only once to each individual. While the task seems tremendous in its enormity still there is no cause for despair. If Buddhism, an alien religion, can win its millions of adherents, it is reasonable to suppose that Christianity, with its incomparable Leader and uplifting message, can win the whole nation.
Again, there is the problem how best to present the gospel. This has always been one of the largest and most comprehensive of problems. The ideas which underlie Christianity are unfamiliar to Chinese thought. Upon words which have already a fixed significance strange meanings must be grafted. It may be remarked incidentally that the wide difference of opinion as to the best way of expressing in Chinese the concepts of God and of the Holy Spirit is often referred to as if it indicated a certain narrowness or perversity on the part of those using diverse terms, whereas it merely proves that there are not now and never have been for distinctively Christian ideas any term which is altogether free from objection. At the present time the different denominations in China are more nearly in agreement upon heretofore disputed points than ever before, with every prospect of growing unity in the future.

Each class of Chinese is fenced off from Christianity by its own barriers. The scholar finds it out of harmony with the teachings of the sages; the farmer and the laborer are too busy to listen and too dull to understand; while the merchant perceives that his business methods are inconsistent with its precepts, yet, in spite of this, real progress is constantly made. Undue emphasis upon the material benefits of Christianity tends to lower the authority of its moral mandate. On
the other hand to the average Chinese its spiritual aspects are at once incomprehensible and undesirable. The masses of China are as yet unaffected by Christianity. We know much more about China than we did; the Chinese also know much more about us. The illusion that Western lands are Christian lands has been dispelled. From one point of view, China was never more accessible to the influences of Christian philanthropy, to intellectual and to moral enlightenment; while from another, the antagonism to Occidental nations and to foreign religion was never stronger. By what wise means is it possible not merely to remove the Chinese wall of prejudice, but to convince the Chinese intellect, and to capture the Chinese will? How can we conserve the good of the old, while introducing the better and the best of the new? This is the present problem of the gospel in China.

Once more, there is the problem of ancestral worship. Ancestral worship has played an important part in the religious development of mankind, and it is the real religion of the Chinese people. Its theory contains much which is excellent and admirable—much also which is objectionable. Among Protestants there is a general agreement that Christianity cannot tolerate the rites—but Confucianism will not tolerate a religion which will not tolerate the rites. While in Japan, which received its civilization from
China, ancestral worship does not appear to hinder the spread of Christianity, and it is indeed seldom mentioned, in China it is the most serious barrier to the spread of Christianity among the educated class. How to remove it, or at least to make an opening through it, is one of the pressing problems of twentieth century missions in China.

Another problem is the development of the Chinese Church. The Chinese have a strong predilection for guilds and societies. The empire is full of the latter, most of which profess to practise virtue, but it may be remarked that no large movement from them to Christianity has ever taken place. When the Chinese once begin to realize the lofty purpose, the broad scope, the self-evident friendliness and hopefulness of the Christian Church, they are strongly attracted to it. In all the ages of Chinese history nothing like it has ever been known. From the beginning many have sought to use its shelter and its name for selfish ends. Since the failure of the tremendous assaults upon it in 1900 this has happened upon a great scale, requiring incessant vigilance and a firm control. The Church should be self-supporting, self-governing, and self-propagating. For a long time the first was but slowly and imperfectly realized, although much the greatest success in this respect has been among the poorest people. The number of
wholly self-supporting churches is now large and is rapidly increasing. Chinese society being more or less an oligarchy under democratic forms, while the husk of self-government is readily preserved, the kernel may disappear. The old, the learned, the man of official position, the wealthy, when they are in fault are not easily judged impartially even in America—how much greater is the difficulty in China. These inherent difficulties the Church can surmount and is surmounting, but gradually and with struggle. In self-propagation few such striking results have yet been secured as in Japan or Korea. The Chinese Church, however, has not as yet come to self-consciousness. In the not distant future we may expect a great expansion. The Chinese as a whole are hampered by poverty, but under normal conditions, when the right motives are presented, they are a generous people. How to keep it pure within, how to make it strong and aggressive without—this is the problem of the Chinese Church.

At the highly vitalized points of contact between the Occident and the Orient in our stirring twentieth century, perhaps the only people who have no problems to confront, are those who have been peacefully laid to rest. Living men have live issues, but however numerous and difficult these may be, it should be assumed as an axiom that, given the right men working in the right way, Christianity can and will solve them all.
QUESTIONS ON CHAPTER VII

AIM: TO REALIZE THE CALL OF THE PROBLEMS AT PRESENT AWAITING SOLUTION IN CHINA

1.* Should you have assented to the toleration clause in the treaties of 1858 and 1860? Give reasons for your answer.

2. If not, what should you have preferred?

3. Ought a Christian government to have different laws for its missionaries and for its merchants in foreign lands?

4. What would be your first step if a convert in China complained to you that he was being persecuted?

5.* Should you interfere under any circumstances? If so, under what circumstances? If not, why not?

6. What dangers to missions do you think are involved in the cry, "China for the Chinese?"

7. What hopeful possibilities does the cry contain?

8.* If you were a missionary, how should you act toward a native Christian community that was becoming restive under your oversight and yet seemed to need it?

9.* If you had charge of a Christian college in China, what would be your attitude toward former Chinese ideals?

10.* How should you try to keep your pupils at once sufficiently progressive and sufficiently conservative?

11. How should you try to keep them in sympathy with their families and homes?

12. What would be your attitude toward their new spirit of patriotism?
13. How should you try to influence their future career?

14. If a missionary were equally gifted as a preacher and a writer, how should you advise him to divide his time just now? Give reasons for your view.

15.* Why should Chinese Christian scholars write an increasing proportion of the Christian literature? Give several reasons.

16. If you were a missionary in a region where there were also Roman Catholic missionaries, how should you act toward them?

17. What should you do if a Roman Catholic convert should use his "pull" to oppress one of your converts?

18.* What are the arguments in favor of federation on the foreign field?

19. If there were only about 900 ordained missionaries in the United States and Canada, what do you think would be your chance of hearing their message?

20. What facilities would these missionaries have for circulating their message in this country that are lacking in China?

21. What proportion of the 4,000 missionaries in China do you think are able to give themselves to the work of active evangelization at any one time?

22. State the need of more workers in China as strikingly as you can.

23.* What should you study in addition to the language in order to present the gospel most effectively?

24.* What lines of thought should you follow to make your message clear and forcible in speaking to village peasants?
25.* What lines in speaking to scholars? To merchants?
26. What part of ancestral worship do you consider excellent and admirable?
27. What part do you consider objectionable?
28.* Can you suggest any way of retaining the former and removing the latter?
29.* What should you do to render the native Church self-supporting?
30. If you were a poor Chinese, what do you think would induce you to contribute to a church that the missionaries seemed much better able to support?
31.* What should you do to render the native Church self-governing?
32. How much of control do you think you ought to keep in your own hands?
33.* What should you do to render the native Church self-extending?
34. Should you encourage the very ignorant Chinese Christians to try to teach others?
35. Which three of all these problems seem to you most important?
36. What can you do to help in solving them?

TRANSFORMATION, CONDITION, AND APPEAL
We take pleasure in bearing testimony to the part taken by American missionaries in promoting the progress of the Chinese people. They have borne the light of Western civilization into every nook and corner of the empire. The awakening of China which now seems to be at hand, may be traced in no small measure to the hands of the missionaries. For this service you will find China not ungrateful. —Viceroy Tuan Fang.

But by the power of God the results come. We have seen unclean lives made pure, the broken-hearted made glad, the false and crooked made upright and true, the harsh and cruel made kindly and gentle. I have seen old men and women, seventy, eighty, and eighty-five years of age, throwing away the superstitions of a lifetime, the accumulated merit of years of toilsome and expensive worship, and when almost on the brink of the grave, venturing all upon a new preached faith and a new found Savior. We have seen proud, passionate men, whose word was formerly law in their village, submit to injury, loss, and insult, because of their Christian profession, until even their enemies were put to shame by their gentleness and were made to be at peace with them.

—J. Campbell Gibson.

Come to the empire with a practical preparation of various sorts; bring with you the social qualities of a Ricci, without his defects; store the mind with learning of varied scope to meet the intellectual needs of the day; come with a love that is undying for those who would perhaps put you to death if they dared; come above all as a manifest child of God, endued with all those spiritual graces which spring from the Holy Spirit and which are daily renewed in a consecrated closet. Let every power be laid upon the altar, and self be sunk in Christlike service.

—Harlan P. Beach.
VIII

TRANSFORMATION, CONDITION, AND APPEAL

TOTALLY unlike the China of 1807, when Robert Morrison began the first Protestant mission, is the China of 1907. Mentally to reconstruct the era of the emperor known as Chia Ch'ing (1796-1819) requires not only much knowledge of those times, but a vigorous historic imagination. With a pride of race not altogether unlike that of the Brahman, to the Chinese of the Central Flowery Empire, with its antiquity, its sages and its heroes, its classics and its culture, the traders from the West, who for three centuries had clung to the seaboard, were merely uncouth barbarians. Little enough, indeed had either side seen in the other to induce mutual respect.

During the times of greatest stress and strain, nothing could have induced Englishmen and Americans to put up with what they endured but the great profits of the trade, for "commerce like the rainbow bends toward the pot of gold." Except Roman Catholic missionaries, there were no foreigners in China but merchants, and no
merchants but in Canton. There they were all shut up in factories, occupying an area not more than a quarter of a mile in length, with an open space in front perhaps a hundred yards long by fifty yards in width, where, amid the observation of an unsympathetic host of "barbers, fortune-tellers, venders of dogs and cats, quack medicines, and trinkets," and of all the curious, the foreigners might, if they chose, take their exercise. If they undertook to row on the river, they risked being run into by crowding junks and drowned. If they took walks in the suburbs, or once a month penetrated three miles up the river to some flower gardens, they were invariably saluted with cries of "foreign devil," and were, besides, liable to be stoned.

At the close of the war of 1839-42, China was supposed to be at last accessible to the West, and a big book was written entitled: China Opened. When Peking had been captured in 1860 and another sheaf of treaties had been signed, China was again ascertained to be "open." Forty years later, during the Boxer episode, China was once more in need of being pried open. Sir Robert Hart, for fifty-three years a resident of China, much of the time at the head of the Chinese imperial customs, remarked in 1905 that, during the first five-and-forty years in that country, he seemed to be sitting as in a vault into

\[1\] Trading houses.
which during the whole period not a breath of air bringing in Western civilization entered. “The Chinese were apparently unaware of the existence of foreign nations. They seemed as dead to the issues of modern civilization as if it were removed from them by a thousand years.”

To-day every window is open and the breezes are blowing through in every direction. We shall have occasional thunder-storms. We must expect that, with these changed conditions; we may have a typhoon that will sweep some of us out; but we shall never go back to the old conditions. More than one chapter would be required for a comprehensive survey of recent changes in China. Of several of them incidental mention has already been made. They had been vainly urged upon China with varied iteration for half a century. Ten years ago scarcely any of them had yet been more than heard of; most of them have been definitely adopted within the past four years, and some of them within a few months. No other country has altered so much in so short a time as the hitherto immobile embodiment of Oriental fixity.

The greatest change of all is the complete abolition of a system of examinations having a sanction of nearly two millenniums, and the substitution of modern learning. Even compulsory education is to be tried in the metropolitan province under Yüan Shih-kai, and if successful will
be extended throughout the empire. Whether we consider the millions concerned or the consequences of the step, it may justly be regarded as the most comprehensive intellectual revolution in the history of mankind. Mental torpor has been succeeded by alertness of mind, and of body as well; for in the colleges and schools, with which China now swarms, athletics take a prominent place. Young men who but a few years since would have been taught the proprieties according to the Confucian "code for mummies," are now gazed at by thousands of excited spectators (including many high officials), making the hundred yard dash, putting the shot, executing the pole-vault, doing the long jump, ending with the tug of war, and the singular spectacle of prizes presented by a Chinese lady! With the flat cap and the semi-foreign uniform has come a new scholastic, a new provincial, a new national spirit,—the evolution of patriotism "while you wait."

Colleges for commerce, engineering, police, and many others are found everywhere. The whole educational enterprise of the government abounds in absurdities and crudities, such as opening provincial colleges in advance of intermediate or primary schools, and agricultural colleges with no adequate text-books or experimental farms. But the Chinese appreciate learning for its own sake. They have unlimited

WESTERN INNOVATION, SHANGHAI
patience and perseverance, and, like the Japanese, will eventually overcome all obstacles.

Police reform, street cleaning, arboriculture, chambers of commerce, new manufactures, industrial expositions, prison reform, telephones, and electric lighting, are impressive signs of the new life bounding through the national circulatory system. Formerly, whenever a Western nation had some grievance, it was settled by the opening of a new port. Now, of her own motion, China opens them in numbers to forestall and to limit foreign interference. Ten years ago there was in China one short railway. Now many lines built by Belgian, British, French, German, and Russian capital, probably aggregating more than 3,000 miles in length, are completed. A considerable number of partly finished routes are opened for traffic, while in addition there are a score or more of others, some projected, some well under way, all of which the Chinese, alive to the enormous profits certain to accrue, intend to build and to manage themselves. These changes imply within a measurable period a new industrial, manufacturing, and commercial China.

Within nine years a national postal system has been developed and extended to the principal cities of the eighteen provinces. At present there are about two thousand offices, one being added on an average every day. In 1904 the number
of articles handled was 66½ millions, and the following year 77 millions, while the parcels increased in the same period from 771,000 to over a million. The postal system is an innovation of great social, educational, and political importance.

Anti-footbinding reform, begun by missionaries generations ago, has within the past few years made such progress, in considerable part due to the energy and perseverance of Mrs. Archibald Little, the wife of a British merchant, that on the tenth anniversary of the meeting of a society to promote it (in November, 1906), it was disbanded and its work turned over to an influential Chinese organization which is taking it up with vigor,—a unique instance of an impulse from without enthusiastically adopted by the Chinese themselves.

A commission has long been engaged in a revision of the laws of China, a difficult but indispensable task which can be accomplished only gradually.

Much more spectacular, though of far less real importance, is the projected introduction of "constitutional government," as a result of the recent visit (1906) of imperial commissioners on a mission of inquiry to leading countries of the West. For such changes the Chinese are as yet unprepared, but being in reality, although not in appearance, among the most democratic
people in the world, there is no doubt that sooner or later they will secure self-government.

A serious effort is now being made to put an end to opium smoking,¹ which missionaries have been antagonizing since they first came to China. In Peking and Tientsin opium dens are being closed, inns and lodging-houses having opium-smoking apparatus are forced to remove it, and the schools and public offices are being purged of opium smoking incumbents. This reform will probably prove the most difficult of all undertakings, and when it shall have been accomplished throughout the whole country it will prove one of the most striking economic and moral reforms of the century.

Into the China of a hundred years ago the pioneers of missions came, but since all that was done previous to the treaty of 1842 was merely preparatory, it would scarcely be inaccurate to reckon the practical beginning of open evangelistic work from that date. That missionaries have been to some extent subject to the unfortunate

¹ It is noteworthy that the decree ordering the discontinuance of the use of opium was directly due to missionary initiative. In May, 1906, Dr. H. C. Du Bose of Su-chou, the President of the Anti-Opiuim League, had an interview with the Governor-General of the River Provinces, H. E. Chou-fu; and was told that, if a memorial signed by missionaries of all nationalities were sent to him, he would forward it to the Throne. Ruled sheets were sent to 450 cities and the returns gave 1,333 signatures, which were bound in a volume covered with yellow silk, and sent to Nanking, reaching there August 19th, whence they were forwarded to Peking. The Imperial Edict was issued September 20th. For a translation of the Opium Edict, see Appendix E.
limitations and the still more unhappy divisions of the Churches from which they came, may be not merely admitted but emphasized, for it shows the almost irresistible tendency of actual mission work to breadth of view and substantial union. That many mistakes have been made, sometimes due to errors and occasionally to lack of judgment, need not be denied; for it only affords an additional proof that the workers held their treasure in earthen vessels, thus making it more evident that for whatever has been accomplished the praise belongs, not to man, but to God.

During this century, as has been seen, there has been a mighty impact of Western civilization upon the civilization of the East. In this, commerce, diplomacy, and war, have all had their share of influence. The establishment of legations in Peking, of consulates at all the opened ports, the pervasive object-lesson of an honestly administered Chinese imperial maritime customs service, the illumination imparted by many thousand Occidentals domiciled in China, an able and intelligent foreign press, the visits of Chinese to foreign lands, and the return of students educated abroad—all these have been factors in the enlightenment of China. It is to be remembered also that by foreign intercourse dark shadows have also been thrown, but upon these in this connection it is unnecessary to dwell.
Missions are then but one among many forces which have been at work in the Celestial empire. But many of the other influences which have been mentioned could only be felt through here and there an exceptional man. All of them combined touched only the outer fringe of the country, or the banks of its chief river. Many men other than missionaries have greatly contributed to our knowledge of China and its people, but probably the number of those who have permanently influenced the people of China is small. Nearly all of them have lived beside the Chinese, and not among them, and for this reason their acquaintance with the real life of the people was of necessity partial and limited. Missionaries, on the other hand, have penetrated to every part of China and lived everywhere, in the large cities, in market towns, and in hamlets. They speak every dialect. They have been a constant force, an always growing force, an increasingly aggressive force. For many years it was an unintelligent criticism that their labors were devoid of result. In 1900 the same critics charged them with having turned the world upside down and brought on the Boxer earthquake. In the providence of God, Protestant missions had been established for two full generations before the great transformation of China began, in order that the seeds sown beside all waters might have time to germinate. So
little impression did decades of the most laborious effort appear to produce on China, that it was not inaptly likened to an attempt to melt a glacier by holding up to it a tallow dip.

What may it be soberly claimed that Christian missions in China have accomplished? First and chiefest, they have brought to China a new idea of God. If the Chinese ever had the idea of God at all, it had ages ago disappeared like an inscription on a worn coin. The monotheistic concept out-tops all other thoughts. In the absence of it, the Chinese have worshiped real or imaginary heroes, and have been under an intolerable bondage to the spirits of the dead and to demons. Confucian morality with all its excellences fatally lacks the sanction of a personal God of righteousness, holiness, justice, goodness, and truth. To any people there can be no greater gift than the knowledge of God as a Father, loving, caring for, and teaching his children. Without the unity of God there is no necessary uniformity of nature, to the comprehension of which the Chinese have never had a key, their discoveries being apparently the result of happy accidents, and not due to induction from perceived laws.

Christianity has bestowed upon the Chinese an altogether new idea of man, as by creation and by redemption the child of God. The fatherhood of God involves the brotherhood of man through
Jesus Christ, and thus for the first time the classic dictum that "within the four seas all are brethren" has become vitalized with meaning, and the relation between God and man has been established. In China, as in all Oriental lands, the individual is of comparatively little consequence; the family, the clan, society, are everything. Woman is unhonored. At precisely the points where Chinese social and family life is weakest, the immeasurable blessings of Christianity are most convincingly evident. It dignifies and ennobles man by revealing his individual accountability to God. It elevates woman, sanctions the relation between husband and wife, and glorifies alike motherhood and childhood.

Christianity proves its divine mission to China by its transformation of character, not in isolated instances only, but upon a large scale and with lasting effects. Gamblers, heavy opium smokers like some who in 1900 sealed with their lives the testimony to their reformation, proud scholars, the most hopelessly ignorant old women, multitudes mainly but not exclusively from the middle and the lower middle class of society have been recreated in the temper and the spirit of their minds and have begun to live a new life. In China as elsewhere many of the regions most difficult to open, as the Fu-chien province, have yielded the largest fruit. The province of Manchuria, on the other hand, where the mass of the
population are immigrants separated from their ancient homes and from their ancestral graves, have accepted Christianity upon a scale elsewhere unexampled.

The total number of Protestant workers in 1877 was 473, of whom 242 were connected with thirteen British societies, and 210 with ten American and two German organizations. The number of Chinese Christians was 13,000 in 91 stations, with 312 organized churches. Thirteen years later (1890), the societies had increased to forty, the male missionaries to 589, married women 391, and the unmarried women 316, a total of 1,296. The churches numbered 522, and the native Christians were nearly three times as numerous as in 1877 (37,387). More than 60 hospitals and 44 dispensaries treated, in 1889, above 348,000 patients. At the close of 1906,\(^1\) the total number of societies had increased to more than seventy; the total number of missionaries was 3,769, of whom 1,574 were men and 2,195 women,—a gain of nearly three hundred per cent. since 1890; native Christians, 191,985,—an increase of five hundred per cent. But these bald figures give no impression of the tremendous momentum which Christianity has gained, and which no statistical tables can exhibit.

It was once thought that the unemotional Chinese nature was unfavorable to strong relig-

\(^1\) For more detailed statistics, see Appendix I.
ious impressions; but it is now a frequent observation that the Chinese are not only as susceptible to spiritual truths as are Occidentals, but often much more so, for the reason that they have not frittered away their moral sense by resistance to repeated appeals. The wonderful phenomena connected with evangelistic work in churches and schools in widely separated parts of China, as well as among Chinese wholly outside of Christian influences, are of great interest and value as evidencing a mighty force hitherto wholly unknown. Chinese evangelists, tactful, consecrated, and of deep spiritual power, are more and more appearing, whose influence will be increasingly felt among their own people. Here is the human side of the energy which is to transform China.

The oral proclamation of the gospel, with a view to the regeneration of individuals, has always been the key-note of Protestant missionary work. Amid great discouragements, fiery trials, bitter disappointments, this enterprise has been steadily prosecuted, until much of China is dotted with nearly 4,709 twinkling points of light, each representing a mission station planted in the cold and loveless Oriental atmosphere—a dynamo tirelessly giving out in all directions light and heat. Sometimes, in the midst of much apparent success, a glacial epoch has set in. But lives of blameless self-sacrifice eventually overcome prejudice and suspicion, and in an ever-increas-
ing ratio there is progress. The quest for results is more or less vain. Without ignoring or depreciating tables of statistics, true mission work in China may be said to be indefinitely beyond and above them. While they record merely external phenomena, missions are introducing a Christian sociology,—a new moral and spiritual climate.

It is by the indefatigably persistent diffusion of its literature that Christianity has largely prepared the way for the new era in China. Much of the country has been sown with books and tracts, and although multitudes of them seem to accomplish nothing, yet this is in appearance only, for books penetrate where the living voice can never be heard. A work like the late Dr. Faber's *Civilization East and West* has been an invaluable handbook to progressive Chinese, official and non-official, by showing upon what lines China should be reformed. The *Review of the Times*, with its constant essays upon China and her neighbors, and indeed upon all themes of importance, has been a light shining in a dark land. Dr. Allen's history of the Chinese-Japanese war, Dr. Richard's *History of the Nineteenth Century*, countless books and periodicals, have added each its silent quota of influence. The aggregate effect of this vast total is beyond computation.

As we have seen, toward breaking down the initial walls of prejudice, no agency can compete
with the hospital and dispensary, which, though at first often bitterly antagonized, eventually win their way to the favor of peasant and of prince. Here also statistics are merely the stuffing of the dried skin of truth, but what must be the value of 340 fully qualified foreign physicians with their native assistants, giving in 1906, in 461 hospitals and dispensaries, 1,125,422 treatments? Every orphanage, every school for the blind, every leper refuge, all reaching down to the defective and the dependent classes, are testimonies to a new spirit introduced from without, which is not only making itself felt, but is winning for itself the sincere tribute of imitation.

The educational activities of missions in China have been incessant. Of the fourteen institutions of college grade, twelve are American, exhibiting the emphasis which Americans almost invariably place upon this agency. The total number of pupils at present under instruction, in missionary colleges and schools in China, is 53,293. From the days of Dr. S. R. Brown, whose early beginnings in Macao and Hongkong produced a few men who became leaders in China, down to the present day, the potency of this instrument, upon which the perpetuation and expansion of the Church in China depends, has been recognized. The education of Chinese girls in mission schools was but yesterday regarded by nearly all Chinese with amusement tinged with
ridicule. Yet so great is the change that almost before the fully developed woman's colleges can be acclimated in China, they have become the ideal of the Chinese also. It was at the especial command of the empress dowager that the imperial commissioners visited Wellesley College, to witness for themselves what has been done by and for American women, and to learn what must be done in China. There are already signs that the impending education and elevation of the nearly two hundred millions of Chinese women will impart to the national development such an impetus as has never before been known; and humanly speaking it will have been largely brought about through the work and influence of Christian women in China.

Missionaries in China have studied the country, the people, and the language. They have examined Chinese literature, and have made compendious dictionaries of the language and of nearly every important dialect. They have carefully investigated its religions in all their aspects, and the results of all these labors have been freely given to China and to the world. But their great task has been to preach Christ and to explain Christianity. The knowledge which they have imparted has penetrated to the palace of the emperor, to the yamens of the highest officials, and to the dwellings of the poor. This is evidenced by the allusions to Christian teachings met with
in the native press, as well as by volumes concerning other than Chinese religions now and again put forth by those occupying the highest official positions. Some of these works exhibit a surprising familiarity, not only with the Bible, but with Church history, and a friendliness of tone which ten years ago would never have been shown. The uncounted lives of Chinese Christians sacrificed in the convulsion of 1900, the many missionary martyrs, consecrated men, heroic women, and tender children, have not been—will not be—without result in the future regeneration of the empire. Without as yet accepting Christianity, China is now learning from Christian lands, and having entered upon this course must of necessity do so more and more.

The 3,769 men and women in the Protestant foreign mission ranks in China might all be gathered into a single modern auditorium. Scattered throughout the empire they are the chief of staff, the captains and the generals of a mighty army. Collectively they represent an accumulation of knowledge and experience concerning China and the Far East not elsewhere to be matched. They are, in an important sense, interpreters of the West to the East and of the East to the West. They constitute an intelligent, a sympathetic, and a permanent body of mediators between the two.
China has always been the largest, and its peculiar conditions will continue to make it the most important mission field in the world. There is a deep need of the outpouring of the Spirit of God all over the land upon the hearers of the gospel, and not less upon the readers of Christian books. The profoundest need of the Christian Church in China is such an infilling of God’s Spirit as shall fit it for the great task of evangelizing the empire. It has already among its leaders many noble men and women, but as yet they are relatively few. To train the coming race of Chinese civil and mining engineers, electricians, railway builders and managers, by whom the empire is to be developed, required experts from Western lands. It is not less so in the far deeper mining and higher building of the Church of God in China. There is not now a general summons to “all sorts and conditions of men” to enter China, but only to the best, physically, intellectually, spiritually. The call is for men and women of an evangelistic temper and spirit to do among the growing churches of China the work which was done by the leaders mentioned in the Book of Acts, a work of inspiration and of uplift. Long before they know enough of the language to enter upon it, such men and such women will find their field.

The call is for consecrated and thoroughly qualified teachers, professors, and association sec-
retaries, for schools and colleges already existing, as well as for the great union colleges which are yet to be—perhaps one in every province, perhaps a great Christian university for all China. At present the drift among the young students is overwhelmingly toward the dazzling opportunities afforded by the new China. The need of a strong personal influence upon them, by wise men and winning women from Christian lands, is one of the most imperative anywhere to be found. There is an unceasing demand for skilful physicians, men and women, not to conduct hospitals and dispensaries merely, but to introduce into China the new medicine with Christian accessories, one of the wisest, sanest, most hopeful of enterprises. There is urgent need for men and women called of the Lord to help prepare the new Christian and general literature for the illumination of hundreds of millions of minds and hearts. As yet, not one-half of one per cent. of the books which ought to be provided has been produced. Is there elsewhere any call like this? In every part of the vast field there is a demand for strong and wise all-round missionary statesmen, to advise, control, and guide in the difficult emergencies always arising. Such men must indeed be trained, but with the right material under right conditions they will be developed. In every mission there is great need of able and experienced
business men, to promote efficiency and to eliminate waste.

How is it that American missions have relatively so few *self-supporting missionaries* working, not independently, but coördinately with others? In each department of activity their numbers should be greatly increased. The young men and young women who are needed are those who have first been infilled by the Spirit of God. They must know their Bibles that they may be able to wield the sword of the Spirit. They must know how to pray, and must have unlimited faith in this mightiest of weapons. They must be men and women of vision—"visionaries" they will be termed—of the pattern of those who in 1806 knelt under the Williamstown haystack, undaunted by the indolent torpor of the Church or the alert hostility of the world. They must have at least some assimilated and funded knowledge of what has been done toward establishing the kingdom of God on earth, and of the vast work which yet remains undone and not begun. Two generations ago such knowledge was exceptional, now, thanks to the mission study classes, it is common. They should be men and women who are not anxious lest they be not prominent, or even lest they be altogether unknown. They should be willing to subordinate the insubordinate personal element, to esteem others better than themselves, and even, if need
be, to work under others. They should know men and how to approach and win them. They should have had actual experience of some form of actual work before venturing to spread their unfledged wings in Oriental gales. Having once for all faced the question of a life-work, and having decided it intelligently and conscientiously in the light of the Word of God, the call of God, and by the Spirit of God, they will be in no danger of abandoning it without as clear a call to leave as they had to enter it. They should have good health, and be able to pass the examination of any life insurance company. They should be active in mind, versatile and adaptable. "There are very few such young people," some will say. There are unlimited numbers of them—or, if not, there should be. In other lines of enterprise, the demand creates the supply. The man that could do great things at home, in strong competition with hosts of others, may do much greater things abroad, where there is no competition at all. Not until the best young men and women of the Christian Church recognize the magnitude and the urgency of the work, to do which the Church was by her Master set apart, but which she is visibly not doing, will the anemic life of that Church be replaced by the glow of returning health.
In all the varied departments already noted there is indefinite scope for young men and young women of tact, skill, and consecration. No one is wise enough to forecast the future, yet it is altogether probable that the door of opportunity may not always be open. It is not a call to sacrifice, but to privilege; to the most permanently productive investment of influence, and to the dedication of the highest powers to the mightiest task yet remaining to the Christian Church. Unless to every reader it be a call to earnest prayer for the regeneration of China this book will have failed of its purpose. "And the teachers that be wise shall shine as the brightness of the firmament; and they that turn many to righteousness as the stars for ever and ever."

QUESTIONS ON CHAPTER VIII

AIM: TO REALIZE WHY CHINA NOW PRESENTS THE GREATEST CALL THAT HAS EVER COME TO THE CHRISTIAN CHURCH

1. How does China compare with the other un-evangelized nations of the earth in material resources?
2. How does she compare in vastness of population?
3. How do the Chinese compare with other non-Christian peoples in the desirability of their race traits?
4. In view of all this, what will probably be the future position of China relative to the other nations?
5.* What does the introduction of Western industrial methods promise for China as compared with other non-Christian nations?
6.* How will Chinese character be affected by new freedom in family and social life?
7. What possibilities of Chinese character do you think the best features of the Chinese religions indicate?
8. What limitations do these religions impose on Chinese character?
9. Has greater Christian earnestness and ability been spent on any other non-Christian field?
10. Do you know of any field where the agencies already in operation give the Christian Church greater leverage?
11. Do you know of any field where the problems awaiting solution have more significance for the future?
12.* Arrange the recent changes in what seem to you the order of their missionary importance. Give reasons for your view.
13.* What will be some of the effects on the nation of the new education? What of the postal system. What of the anti-foot-binding crusade?
14. Do you think that there is now any possibility that China will revert to her old ways? Give reasons for your view.
15. Have changes of such importance ever affected so vast a population in so brief a time?
16.* Will the new material changes strengthen or weaken the Chinese social and moral forces already existing?
17.* How will the diffusion of education affect these forces?
18.* How will the entrance of Western industrial methods affect them?
19.* What sort of moral forces will be needed in Chinese society under the new conditions?
20.* Through what agencies do you think the needed moral forces can best be introduced into Chinese society?
21. How do other agencies compare in your mind with those of missionary work?
22.* What is the special value of Christian literature at this time? Of medical work? Of educational work?
23. Why do you think the missionaries exercise the influence that they do?
24.* From a comparison of statistics and from other considerations, what do you think of the prospect for results in China in the next fifty years?
25. Compare this with other calls now before the Christian Church.
26.* State as impressively as you can the opportunity of the present in China.
27. What claim has this opportunity on your money and prayer and life?

Appendix A

APPENDIX A

THE ORTHOGRAPHY AND PRONUNCIATION OF CHINESE NAMES

There is no entirely satisfactory method of representing all Chinese sounds in roman letters. Furthermore, in different parts of the empire many of those sounds materially vary. Early writers on China adopted the French spelling and pronunciation. Those who have followed have too often written—as travelers still do—every man that which is right in his own ears. Within the last forty years, however, the system of romanization of Sir Thomas Wade may be said to have become definitely established, and is indeed the only standard. As with any system there are infelicities, but its general adoption in China renders advisable its use out of China as well. It should be studied by the aid of the appended key to pronunciation borrowed from Professor Beach's *Dawn on the Hills of T'ang.* The vicious and intolerable mispronunciation of Chinese names now generally current ought thus to be gradually corrected.

A few observations should be made on some exceptions to the use of Wade's system, and on the division and hyphenation of Chinese names. The names of a few Chinese cities have a well-recognized notation which it would be affectation to attempt to alter. It is as out of place to insist upon writing Kuang-chou fu for Canton, or T'ien-ching for Tientsin, as to set down Napoli and Bruxelles for Naples and Brussels. There are other words in which it is likewise inexpedient to sacrifice intelligibility to mechanical uniformity. In
central China a final letter is often dropped, and thus grew up the notation Pekin and Nankin, instead of Peking and Nanking, which should always be used. There is an aspirate usually marked by an inverted apostrophe, as T'ai P'ing.

The names of cities should not be written as one word—e. g., Paotingfu, but separately with or without capitals, either Pao Ting Fu or Pao-tint fu; never Pao-tint-fu. The first two syllables are related in meaning (Guarding Tranquillity), while the third shows the rank of the city as prefectural (governing a group of county-seats).

The surname precedes the name and should always be separately written without the hyphen. If the personal name has two characters they may be written separately, or better connected by a hyphen. These principles may be illustrated in the three syllables connoting the designation of China's best known modern statesmen. Do not write Lihungchang; or Li-hung-chang; or Li-Hung-Chang; but either Li Hung Chang, or (better) Li Hung-chang.

- *a* as in father
- *ai* as in aisle
- *ao* as *ow* in *now*
- *ch* as *j* in *jar*
- *ch* as in *change*
- *ê* as in *perch*
- *e* in *eh, en,* as in *yet,* when *eu* in *machine,* when *it* stands alone or at the end of a word
- *i* as in *pin,* when before *u* and *ng*
- *ia* as *eo* in *geology*
- *iao* as *e ou* in *me out*
- *ie* as in *siesta*
- *ih* as *er* in *over*
- *iu* as *eu* in Jehu, when *h* is omitted
- *j* as the first *r* in regular
- *k* as *g* in game
- *k* as *k*
- *ng* as in *sing*
- *o* as *oa* in boa-constrictor
"ou as in though
*p as b
p’ as p

*Those thus marked have no close English equivalents. Consonants followed by an aspirate (‘) are almost like the same in English; the same consonants without the aspirate are more difficult to correctly pronounce."
APPENDIX B

BIBLIOGRAPHY

Instead of an exhaustive bibliography, it has seemed desirable to print a selected list of books with annotations. [Not arranged alphabetically.]

Reference Books

The standard reference work in English. The chapters on government, literature, religions, and history are especially valuable.

A series of articles on a wide range of subjects arranged alphabetically.

A concise summary of China and missionary work. Contains a valuable pronouncing vocabulary of Chinese names and stations.

Country and People

The best work on the characteristics of the Chinese by a judicial and truthful observer and illuminating writer. A most entertaining and readable book. [Editors.]

A description of village life in north China, its institutions, public characters, and family life. The best account of Chinese social life that has ever been written. [Editors.]

A valuable and very readable statement of the Chinaman, as he really is, by an unbiased and efficient writer.

Written by one who was for years closely connected with Chinese life as a diplomat. The author handles the Chinese questions with a master hand.

Reminiscences covering nearly fifty years by one of the oldest living foreigners in China, ex-president of the Imperial University.

Denby, Charles. China and Her People. 2 Vols. L. C. Page & Co., Boston. Illustrated. $3.00

An account of China and her people, with an excellent chapter on Foreign Missions, by a statesman who served thirteen years as a United States Minister to China.

An attractively written description of life in various parts of China, by the wife of a British merchant, who had a special opportunity for observation.

Describes a journey from Han-k'ou to the great Buddhist center, Mount Omei. Although written twenty years ago, it is one of the standard works on western China.

A series of sketches of life, customs, and ideas in the Swatau region.

A brief autobiography of one who is a native of China, now in America. One of the most attractive books to place in the hands of the ordinary reader.

An analysis of the commercial, political, and missionary forces that are contributing toward the uplift of the nation, by a keen observer and entertaining writer.

Hardy, E. J. John Chinaman at Home. Charles Scribner’s Sons, New York. Illustrated. $2.50 net.

Written by one who was a chaplain of the British forces at Hongkong for a number of years. Describes in interesting style the Chinese, and gives an account of a number of journeys.

Special Subjects

A trumpet-call to the nation written ten years ago. A book that has exerted an immense influence.

A history of China, giving special attention to the last three centuries. Rather anti-Chinese in tone.
Appendix B

Dealing with the commerce, sciences, literature, religion, education, and history. Written after fifty years of diligent study.

Probably the best statement of the laws of China and their relation to commerce, written by one who was for years a representative of the United States government.

A statement of educational conditions in China and Japan, written by one who is sympathetic in his attitude to the Occident and the Orient. Although conditions have changed since this was written, it is still the best statement on this subject in the English language.

McNabb, R. L. The Women of the Middle Kingdom. Jennings & Graham, Cincinnati. Illustrated. 75 cents.

A brief statement of the needs and present opportunities for missionary work among the women of China.

Religions

One of the most satisfactory statements of the teachings of China's indigenous religions to be found in brief compass.

Four lectures delivered on Confucianism and Taoism, including a comparison with Christianity by one of the ablest English authorities.

An account of the introduction and history of Buddhism in China, and the most valuable statement of the northern view of Buddha and his teaching.

Missions

Mission problems and methods discussed by one who has had wide experience, and who has a keen sense of the needs of China. It contains much valuable information on the social and religious life of the Chinese.

Although published several years ago, it is one of the best accounts of China and missionary work.

An exceedingly well written volume, treating missionary problems, their failures, their successes, and achievements, in a scientific and statesmanlike manner.
Appendix B

A very suggestive discussion of the methods of the senior missionary of the United Free Church of Scotland in Manchuria.

Biographies

A splendidly written account of a most spiritual medical missionary who was made famous by becoming physician to the family of Li Hung-chang.

Compiled from letters, diaries, and other sources, and written in a most charming manner.

A full account of one of China’s leading woman missionaries who was prominent in educational work.

Interesting and instructive biographical sketches of Morrison, Mackenzie, Gilmour, Nevius, Mackay, and Princely Martyrs of China’s Spiritual Renaissance.

A thrilling story, as told by themselves, of two heroes of the Boxer uprising. They are now students in America, and one is a direct descendant of the great Confucius.
Appendix B

A most remarkable account of one of China's foremost native leaders. "It is an absorbing story of a unique character in a thrilling time."

The account of an active student volunteer in the home land, and his brief period of work and martyrdom in China.

Thompson, R. Wardlaw. Griffith John. A. C. Armstrong & Son, New York. Illustrated. $2.00.

The story of fifty years of mission work of Griffith John, one of the foremost missionaries of China to-day.
APPENDIX C

LIST OF THIRTEEN LARGE CITIES

Chinese cities are discriminated as *fu* (called by foreigners prefectural); *chou* (sub-prefectural); and *hsien* (district, or county). (The *t'ing* is relatively unimportant, and may be disregarded.) Each *fu* governs two or more cities of the lower rank. Some *chou* cities also govern *hsien*, thus being virtually prefectural. It is important to remember that the title of a city (as e. g., Pao-ting *fu*) may refer to the space within the walls with the suburbs (as with us), or it may denote the entire area governed by the magistrate of that city. In this sense cities, towns, and villages, are rightly said to be "in" another city.

It is desirable to familiarize the name and position of at least a few Chinese cities, of which thirteen have been selected for brief characterization. There are in the eighteen provinces about 1,677 walled cities. The number of treaty ports is at present something over

2 It might naturally be supposed that nothing would be easier than to ascertain the exact number of "administrative cities" in China, but in reality it is impossible to speak with absolute certainty. Methods of enumeration do not appear to be the same, and "official" lists disagree. Prefectural cities (*fu*), of which in the eighteen provinces there are 181, should be omitted, since they are also enumerated as counties (*hsien*). The province of Sheng-ching is sometimes included in China Proper, and again excluded. There are in all four "Provinces" outside the Great Wall, with a total of at least 97 cities; and if Inner and Outer Mongolia are taken into the reckoning (with a totally different nomenclature) there would be many more.
forty, several of them without trade of any importance.

Peking (Northern Capital), a designation rather than a “proper name,” the official title being Shun-t’ien fu. This was a capital of China in the Mongol Dynasty, abandoned on the incoming of the Mings (1368), but reoccupied in 1403. It was taken without opposition by the Manchus in 1644. Since the stirring events of 1900 it has been greatly altered, but it continues to be perhaps “the most interesting city in Asia.” (Population, 1,600,000.)

Tientsin, the port of Peking, and the gateway of several provinces, is situated about 40 miles from the sea, and is destined to be a place of growing importance as a commercial, a railway, and an educational center. Like Peking, by means of the Siberian line, it is now connected with Europe by rail. It is the residence of the Governor-General of Chih-li, at present much the most important official in the empire. (Population, 750,000.)

Pao-ting fu (Bow-ding), the nominal capital of Chih-li, is on the Ching-Han (Peking to Han-k‘ou) Railway, 88 miles from Peking. It was the scene of missionary massacres in 1900. It has been greatly improved within recent years, and although not large in the area of its walls, it is in the midst of a fertile and populous region. It has now become an important educational center.

Shanghai (Shäng-hi), on the Huang-fu, a tributary of the Yang-tzū, is the commercial metropolis of China. Its foreign settlements are thoroughly cosmopolitan and in a way democratic. It was formerly an insignificant county-seat, and the adjacent land was devoted to market-gardens, some of which now bear a value com-
parable to lots in London or New York. (Population, 651,000.)

Hang-chou fu (Hâng-jo), the capital of Chê-chiang (Ju-jeâng), was the metropolis during the latter part of the Sung dynasty (A. D. 1129-1280). It is considered by all travelers one of the most beautiful cities in situation, surroundings, and richness. (Population, 300,000.)

Su-chou (Soo-jo), about 55 miles distant by rail from Shanghai, was proverbially the Paris of China, and ranked with Hang-chou as the "heaven-on-earth" of the Chinese. It was largely destroyed by the T'ài P'îng rebels fifty years ago. (Population, 500,000.)

Nanking (Southern Capital) has only lately become a treaty port. It was the first capital of the Mings, and was captured by the T'ài P'îng (Ti Ping) rebels, who were the means of its ruin for the time. It was here that the leaders of that movement were captured. (Population, 270,000.)

Han-k'ou (Hän-ko), already mentioned, with Han-yang (Hän-yâng) across the river Han (Hän), and Wu-ch'ang fu (the provincial capital) on the south bank of the Yang-tzü, may be regarded as the inland center of the Chinese empire. It is destined to be one of the great workshops of the world. (Population, 870,000.)

Fu-chou fu (Foo-jo), on the Min, was like Shanghai one of the five ports opened by the British treaty of 1842. It is in a beautiful situation, and is the metropolis of the Fu-chien (Foo-jeen) province. (Population, 624,000.)

Canton, on the Pearl River, has for almost four centuries been a trading port for European ships. It is one of the most important marts in China, and in its history exhibits all the changing phases of Occidental intercourse with the Celestial empire. (Population, 900,000.)
Chung-ch'ing (Joong-ch'ing), on the upper Yang-tzü, is the commercial emporium of the imperial province of Ssu-ch'uan (Ssu-chooân). Population, 600,000.

T'ai-yüan fu (Ti-yüan), the capital of Shan-hsi, was the scene of the massacre of 45 Continental, British, and American missionaries, Roman Catholic and Protestant, in 1900. It has wide streets and is laid out in imitation of Peking.

Hsi-an fu (She-än), the capital of Shen-hsi, is, not excepting Peking, the best built and best kept city in China, and has been the capital of the empire for a longer time than any other. It is the back door of the eighteen provinces, and among its crowds are representatives of all parts of central Asia. It came into notice in 1900 as the refuge of the imperial court, after its flight from Peking.

¹ Statesman's Year-Book, 1906.
APPENDIX E

Opium Edict, September 20, 1906.

"1. Farmers are forbidden to plant new ground to poppies, and the area now used for that purpose must be diminished ten per cent. each year, and cease entirely at the end of the tenth year.

2. All persons who use opium are required to register their names with the police and obtain permits which will allow them to purchase a given quantity of the drug at certain periods. All persons over sixty years of age may continue its use as at present, but all persons under that age will be required to reduce their consumption by twenty per cent. yearly, and cease to use it entirely at the end of five years. The permits are to be renewed annually, and the allowance indicated upon them will be reduced twenty per cent. in time and in quantity. At the end of the five years, persons under sixty-five years of age who continue to use opium will be compelled to wear a distinctive badge which will advertise them publicly as opium fiends.

3. All government officials, even princes, dukes, viceroys, and generals, less than sixty years of age, must give up the habit within six months or tender their resignations.

4. All teachers and students must abandon the habit within one year.

5. All officers of the army and navy must abandon the habit at once.

1 The Baptist Missionary Magazine, April, 1907.
6. Dealers in opium are required to take out licenses, and to report all purchases and sales to the police. Their purchases of stock must decrease annually at the rate of twenty per cent, and at the end of five years must cease altogether.

7. The number of licenses issued will decrease in the same proportion, so that the opium shops will be abolished gradually.

8. The sale of pipes, lamps, and other smoking appliances must cease within the year.

9. All places of public resort for opium smoking are to be closed, and those who are addicted to the habit must practise it at their own homes.

10. Violations of this law are to be punished by the imprisonment of the offenders and by the confiscation of all their property.

11. The importation of morphia and other medicinal forms of opium and hypodermic syringes is permitted under most stringent regulations, and the sale limited to practising physicians.

12. The government will establish dispensaries at which medicines to counteract the craving for opium will be furnished to the public free of cost."
APPENDIX F

DATES OF IMPORTANT EVENTS IN MODERN CHINESE HISTORY

A. D.
1275 Marco Polo arrived at Court of Kublai Khan.
1516 Portuguese arrived at Canton.
1575 Spanish arrived at Canton.
1580 Father Roger and Matteo Ricci entered Canton.
1622 Dutch arrived in China.
1635 English arrived at Canton.
1660 Tea first carried to England.
1670 Beginning of trade with the East India Company.
1719 Beginning of commerce with Russia.
1784 First American merchant vessel left New York for China.
1792 Earl Macartney received by the emperor.

The Forward Mission Study Courses

"Anywhere, provided it be forward."—David Livingstone.

Prepared under the direction of the YOUNG PEOPLE'S MISSIONARY MOVEMENT

The Forward Mission Study courses are an outgrowth of a conference of leaders in Young People's Mission Work, held in New York City, December, 1901. To meet the need that was manifested at that conference for Mission Study Text-books suitable for young people, two of the delegates, Professor Amos R. Wells, of the United Society of Christian Endeavor, and Mr. S. Earl Taylor, Chairman of the General Missionary Committee of the Epworth League, projected the Forward Mission Study Courses. These courses have been officially adopted by the Young People's Missionary Movement, and are now under the immediate direction of the Editorial Committee of the Movement. The books of the Movement are now being used by nearly forty home and foreign mission boards or societies of the United States and Canada.
The aim is to publish a series of text-books covering the various home and foreign mission fields, and written by leading authorities. The entire series when completed will comprise perhaps as many as forty text-books.

The following text-books have been published:

1. **The Price of Africa.** (Biographical.) By S. Earl Taylor.
2. **Into All the World.** A General Survey of Missions. By Amos R. Wells.
3. **Princely Men in the Heavenly Kingdom.** (Biographical.) By Harlan P. Beach.
4. **Sunrise in the Sunrise Kingdom.** A Study of Japan. By John H. DeForest.
5. **Heroes of the Cross in America.** Home Missions. (Biographical.) By Don O. Shelton.
8. **Aliens or Americans?** A Study of Immigration. By Howard B. Grose.

These books are published by mutual arrangement among the home and foreign mission boards, to whom all orders should be addressed. They are bound uniformly, and are sold for 50 cents, in cloth, and 35 cents, in paper, postage extra.

Study classes desiring more advanced text-books are referred to the admirable series published by the Central
Committee on the United Study of Missions. The volumes already published are:

**Via Christi.** A Study of Missions before Carey. By Louise Manning Hodgkins.
**Lux Christi.** A Study of Missions in India. By Caroline Atwater Mason.
**Dux Christus.** A Study of Missions in Japan. By W. E. Griffis.
**Christus Liberator.** A Study of Missions in Africa. By Ellen C. Parsons.
**Christus Redemptor.** A Study of the Island World. By Helen Barrett Montgomery.
**Gloria Christi.** The Achievements of Missions. By Mrs. Anna Robertson Brown Lindsay.
